Contents	
Topic	
1. English grammar	UNIT 1
2. Vocabulary/Use of English	Reading: CO2 and the Greenhouse Effect (or similar related topic).
3. Technical-scientific language	Speaking: Job interviews (part one).
4. Speaking	Speaking: Dates, mathematical expressions, web sites and email
5. Listening	addresses, chemical formula.
6. Reading comprehension	Speaking: Parts of an oral presentation: Introducing oneself.
7. Writing	Listening: Repairing a car (or similar related topic).
8. Direct and inverse translation of specific parts	Writing: Reports.
of the discourse	Grammar: Present participle and past participle adjectives.
9. Oral presentations	
1. English grammar	UNIT 2
2. Vocabulary/Use of English	Reading: Using Mobile Phones and Computers to Transmit Information (or
3. Technical-scientific language	similar related topic).
4. Speaking	Speaking: Giving definitions.
5. Listening	Speaking: Job interviews (part two).
6. Reading comprehension	Speaking: Parts of an oral presentation: Giving purpose.
7. Writing	Listening: Land windfarms (or similar related topic).
	Listening: Off-shore windfarms (or similar related topic).
of the discourse	Writing: Letter of Motivation.
9. Oral presentations	Grammar: The -ing form at the beginning of a sentence and the formation
·	of nouns.
1. English grammar	UNIT 3
2. Vocabulary/Use of English	Reading: Running Dry (or similar related topic).
3. Technical-scientific language	Speaking: Job interviews (part three).
4. Speaking	Speaking: Oral presentations: Time Schedule and signposting.
5. Listening	Listening: Scientists say Climate Change is Real and Possible (or similar
6. Reading comprehension	related topic).
7. Writing	Listening: Geothermal Energy (or similar related topic).
	Grammar: Clauses of reason, purpose, contrast, and result.
of the discourse	Writing: Descriptions.
9. Oral presentations	LINUT 4
1. English grammar	UNIT 4
2. Vocabulary/Use of English	Reading: Capturing CO2 is Costly and Difficult (or similar related topic).
3. Technical-scientific language	Speaking: Describing shapes, forms, and materials: comparison and
4. Speaking	contrast.
5. Listening	Speaking: Describing devices, machines, components, etc. by its shape,
6. Reading comprehension	form, and material.
7. Writing	Speaking: Oral Presentations: Indicating the visual aids and handouts used
8. Direct and inverse translation of specific parts of the discourse	
	Listening: Supply Chain (or similar related topic). Listening: Mobile phones (or similar related topic).
9. Oral presentations	Grammar: Adverbs of sequence; revision of passive voice; contracted
	relative clauses.
1 English grammar	UNIT 5
1. English grammar	
2. Vocabulary/Use of English	Reading: Superconductivity in Orbit (or similar related topic). Speaking: Job interviews (part four).
3. Technical-scientific language	Speaking: Job Interviews (part four). Speaking: Oral Presentations: Summing up; concluding; making
4. Speaking	
5. Listening6. Reading comprehension	recommendations and questions; thanking. Listening: Innovation is Great: Part 1 (or similar related topic).
7. Writing	Listening: IT-related Problems (or similar related topic).
	Listening: Innovation is Great: Part 2 (or similar related topic).
of the discourse	Grammar: Verb tenses expressing future; contracted time adverbial
Oral presentations	clauses; order of adjectives.
3. Orai presentations	ciauses, order or aujectives.

1. English grammar

2. Vocabulary/Use of English Reading: Magnets and Electromagnets (or similar related topic).

UNIT 6

3. Technical-scientific language Speaking: Job interview (part five and six). 4. Speaking Speaking: Oral presentations: Expressing processes: description and

5. Listening report of experiments..

6. Reading comprehension Listening: Two Great Engineering Innovations (or similar related topic). 7. Writing Listening: MIT seeks Moral to the Story of Self-driving Cars (or related

8. Direct and inverse translation of specific parts

Grammar: Cause and effect: "if" clauses, and noun clauses. of the discourse

9. Oral presentations

Planning			
	Class hours	Hours outside the classroom	Total hours
Introductory activities	1	0	1
Troubleshooting and / or exercises	4	15	19
Autonomous troubleshooting and / or exercises	4	15	19
Group tutoring	2	0	2
Classroom work	8	0	8
Presentations / exhibitions	9	20	29
Others	6	15	21
Short answer tests	4	15	19
Practical tests, real task execution and / or simulated.	12	20	32

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Introductory activities	Activities aiming at introducing the subject, establish contact with students, and to gather information about their previous knowledge of the English language.
Troubleshooting and / o exercises	r Analysis and problem solving activities in relation to exercises concerning grammar and vocabulary, and communicative skills.
Autonomous troubleshooting and / or exercises	Activities focused on dealing with problems and/or exercises in relation to this subject. Students r develop skills to autonomously analyse and solve problems and/or exercises.
Group tutoring	Tutor and tutees carry out joint reviews for discussing issues concerning the so far course achievements and learning process.
Classroom work	The practice activities in connection to the four communication skills: listening comprehension, speaking, reading comprehension, and writing, as well as Use of English in Technical English.
Presentations / exhibitions	In order to assess communication skills, students, in group or individually, accomplish guided Technical English oral and writing presentations.
Others	Role-play activities whose purpose is to improve students speaking skill, and to increase their participation in order to prompt the interaction of the group in English.

Personalized attention

Methodologies Description

Group tutoring

By group tutorials we mean the meeting of tutor and tutees in the classroom, and personal advising during tutorial hours. The aim of group tutorials and personal advising is to offer students guidance about the purpose of the course, to encourage learning strategies, guidance in the performance of assignments and exercises, a thorough analysis of the so-far obtained assessment scores, or advice for the successful completion of the Technical English examination.

Assessment			
	Description	Qualification	Training and Learning Results
Classroom work	Practical tasks in relation to listening comprehension and writing skill.	30	
Presentations / exhibitions	Performance of the speaking skill in relation to engineering topics, aimed to consolidate a fluent communication in English.	20	
Others	To reach a competent level of speaking in given situations, in order to comment and discuss distinctive features of a specific topic.	20	

Short answer tests	These are in relation to testing grammar usage and its applications in the Technical English framework. Students perform short answers exercises such as fill in the gaps, transformation cloze, multiple choice, etc. to test their knowledge of the linguistic skill of Use of English.	10
Practical tests, real tas execution and / or simulated.	kThe performance of reading comprehension assessments carried out on articles about technology dissemination.	20

Other comments on the Evaluation

1. Particular considerations

There are two assessment systems. Choosing a system excludes the other.

1.1. Continuous assessment

To qualify under the system of continuous evaluation, students are required to attend 80% of the total lecture hours with academic progress and involvement. Therefore students not attending the total hours of the percentage established will lose this option. Students making use of the continuous evaluation counts 100% in the assessment of their final grade with the course assignments and testings. The failure to complete the assignments requested along the course will be counted as a zero (0.0). The assignments requested must be delivered or submitted by the deadlines and dates marked beforehand.

1.2. Final assessment

Students making use of the only evaluation or final examination sit for examination with a final overall assessment, taking place on the oficial date established by the School of Industrial Engineering. To this end, students should consult the School web site, where the examination date and time are specified in accordance to students subject attendance either Campus or City Centre (Torrecedeira).

2. Final subject assessment result

2.1. Continuous assessment

The final mark for this subject is computed taking into consideration all the skills practiced during the course. Therefore each of them counts as follows:

Listening: 20%. Speaking: 40%. Reading: 20%. Writing: 20%.

The sum of these four skills represents the 80% for the mark, whereas Use of English examination sums up 20%.

So the final mark will be established adding skills and Use of English tests up to 100%, being 5 (five) the mark necessary to obtain a pass in all skills and Use of English tests.

Students, who in the publication of the first assessment record, have scored a non-pass in one or several skills, must retake the part or parts for the corresponding failed skills in the July exam of 2018 to obtain a pass. In case of a second non-pass in July 2018, students must undergo examination for all skills in future courses. Therefore, those passed parts will not be taken into account in the future or subconsequent to course 2017-2018.

Partial or total plagiarism in any of the assignment or activity will result in an automatic non-pass on the subject. Plead ignorance of what plagiarism is, will not exempt students of their responsibility in this regard.

2.1. Final Assessment (May and July)

The only assessment is computed as follows:

Listening: 20%. Speaking: 40%. Reading: 20%. Writing 20%.

The sum of these four skills represents the 80% for the mark, whereas Use of English examination sums up 20%.

So the final mark will be established adding skills and Use of English test up to 100%, being 5 (five) the mark necessary to obtain a pass in all skills and short answer tests.

Regarding July assessment (second call assessment) continuous evaluation students will undergo examination for the specific parts of the subject contents not completed; while students of the only examination who failed in the previous exam notification (first call) must undergo an assessment of the total subject contents (100%).

Both continuous assessment and final assessment will take into account not only the relevance and appropriateness of the content of the answers, but also their linguistic correctness.

3. Additional considerations

3.1. Forbidden materials or devices

In addition, during the examinations no dictionaries, notes or electronic devices (mobile phones, tablets, PCs, etc.) will be allowed.

3.2. Information and deadlines

It is students responsibility to check FAITIC or their e-mails to be kept up to date on the uploaded teaching materials, as well as to be aware of examination or submission dates.

3.3. Erasmus students

All the comments here indicated also pertain to Erasmus students. In the event of not being able to access information on FAITIC, students have to contact the teacher to solve the problem.

3.4. Ethical commitment.

Students are requested to present an adequate ethical behaviour. In case of detecting an unethical behaviour (coping, plagiarism, use of not authorized electronic devices, and others) will be considered that the student does not meet the requisites necessary to pass the subject. In this case, the global qualification in the present academic course will be of a fail (0.0).

Recommendations

Other comments

It recommends have a previous knowledge of the English tongue. It splits of a level To2 to reach the level *B1, according to the European Frame of Reference for the Tongues of the Council of Europe.

Likewise, we recommend the continuous evaluation by the methodology employed to practise and settle the contents of the subject. Therefore, the active participation of students during lectures will be an indispensable requirement to pass this Technical English II subject.

To enrol in this subject it is necessary to have passed or be enrolled of all the subjects of the inferior courses to the course in that it is offered.
