General	(*)O obxectivo desta materia é o				
description	nunha e en varias variables e de	e cálculo integral nur	nha variable que son	necesarias	s para outras materias que
	debe cursar na titulación.				

Training and Learning Results

Code

- B3 CG3 Knowledge in basic and technological subjects that will enable students to learn new methods and theories, and provide them the versatility to adapt to new situations.
- B4 CG4 Ability to solve problems with initiative, decision making, creativity, critical thinking and the ability to communicate and transmit knowledge and skills in the scope of industrial engineering in the field of Industrial Electronic and Automation.
- C1 CE1 Ability to solve mathematical problems that may arise in engineering. Ability to apply knowledge about: linear algebra, geometry, differential geometry, differential and integral calculus, differential equations and partial differential equations, numerical methods, numerical algorithms, statistics and optimization.
- D1 CT1 Analysis and synthesis.
- D2 CT2 Problems resolution.
- D6 CT6 Application of computer science in the field of study.
- D9 CT9 Apply knowledge.
- D14 CT14 Creativity.
- D16 CT16 Critical thinking.

Contents			
Topic			
Convergence and continuity	Introduction to real numbers. Absolute value. Euclidean space R^n.		
	Successions. Series.		
	Limits and continuity of functions of one and several variables.		
Differential calculus of functions of one and	Differential calculus of real functions of one real variable		
several variables	Differential calculus of functions of several real variables		
Integral calculus of functions of one variable	The Riemann integral. Calculus of primitives.		
	Improper integrals.		
	Applications of the integral.

	5	5 17.5

^{*}The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Problem solving	The professor will resolve problems and exercises type and the student will have to resolve similar exercises.
Laboratory practical	They will employ computer tools to resolve exercises and apply the knowledges obtained in the classes of theory.
Lecturing	The professor will expose in the theoretical classes the contents gives the matter.

Personalized assistance		
Methodologies	Description	
Problem solving	The professor will attend personally the doubts and queries of the students.	
Laboratory practical	The professor will attend personally the doubts and queries of the students.	

Assessment					
	Description	Qualification	Traini	ng and Resu	
Problem and/or exercise solving	They will make controls written and/or works. The weight of each one of them will not surpass 30% of the continuous evaluation.	60	B3 B4	C1	D1 D2 D6 D9 D14 D16
Essay questions exam	It will do a final examination on the contents of the whole of the matter.	40	B3 B4	C1	D1 D2 D9

Other comments on the Evaluation

The continuous eval. carry to cape on the previously exposed criteria. Those students that do not receive to the continuous eval be evaluated with a final examination on the contents of the whole of the matter, that will be the 100% of the note.

The continuous eval. of the students in second announcement consist in an examination on the contents of the whole of the matter, that will be 100% of the note.

Commitment:

"It expects that the present student a behaviour ethtic o suitable. In case to detect a behaviour no-ethic o (copy, plagiarism, use of electronical devices unauthorised, and others) consider hat the student doesnt the necessary requirements to surpass the matter. In this case the calification in the present course will be of suspense (0.0)."
