Subject Guide 2019 / 2020

Mechanism and machine theory						
Subject Mechanism and machine theory  Code V12G363V01303  Study Degree in Industrial programme Technologies Engineering  Descriptors ECTS Credits Choose Year Quadmester 6 Mandatory 2nd 1st  Teaching Spanish Galician English  Department  Coordinator Fernández Vilán, Ángel Manuel Segade Robleda, Abraham  Lecturers González Baldonedo, Jacobo López Campos, José Ángel Segade Robleda, Abraham  E-mail asegade@uvigo.es  Web http://faitic.uvigo.es  General description well as his applications in the field of Mechanical engineering. It also covers and provides the students with most important concepts related with Mechanism and Machine Theory. The students will know and apply kinematic and dynamic analysis methods for mechanical systems both with graphical and analytical method and also through effective use of simulation software. Furthermore, this subject serves as an introduction of	IDENTIFYIN	G DATA				
machine theory  Code V12G363V01303  Study Degree in Industrial programme Technologies Engineering  Descriptors ECTS Credits Choose Year Quadmester 6 Mandatory 2nd 1st  Teaching Spanish Galician English  Department  Coordinator Fernández Vilán, Ángel Manuel Segade Robleda, Abraham  Lecturers González Baldonedo, Jacobo López Campos, José Ángel Segade Robleda, Abraham  E-mail asegade@uvigo.es avilan@uvigo.es  Web http://faitic.uvigo.es  General description  This subject is intended to provide the students with basic knowledge about Mechanism and Machine Theory well as his applications in the field of Mechanical engineering. It also covers and provides the students with most important concepts related with Mechanism and Machine Theory. The students will know and apply kinematic and dynamic analysis methods for mechanical systems both with graphical and analytical method and also through effective use of simulation software. Furthermore, this subject serves as an introduction of	Mechanism	and machine theory

and also through effective use of simulation software. Furthermore, this subject serves as an introduction of						
some aspects about machinery design; a topic that will be cover thoroughly in future subjects of the Degree						
25 a deposite about machinery accign, a copie that this be cover thoroughly in factore subjects of the begree		some aspects about machinery design; a topic	that will be cover thorou	ighly in future s	subjects of the Degree.	

## Competencies Code

Learning outcomes	
Expected results from this subject	Training and Learning Results

Contents	
Topic	
Introduction to mechanism and machine theory	Introduction
	Definition of Machine, Mechanism and Kinematic Chain Link/part and
	linkage/joint
	Classification
	Kinematic Diagram, modeling, and symbology (nomenclature)
	Mobility
	Degrees of freedom
	Synthesis of mechanisms
Geometrical analysis of mechanisms.	Introduction
	Calculation methods of placement
	Loop closure equations
Kinematic analysis of mechanisms	Fundamentals
	Graphical methods
	Analytical methods
	Matrix methods
Static analysis of mechanisms	Fundamentals
	Force reduction (Graphical Methods)
	Work/Power Virtual Methods

Dynamic analysis of mechanisms	Fundamentals Machine general dynamics Machine Work and Power Balanced Dynamics of rotors
Cam mechanisms	Fundamentals Flat cams
	Cam synthesis
Power transmission mechanisms	Fundamentals
	Gears Mechanism
	Other mechanisms

Planning			
	Class hours	Hours outside the classroom	Total hours
Lecturing	23	19.5	42.5
Problem solving	9.5	30	39.5
Laboratory practical	18	47	65
Essay questions exam	3	0	3

<sup>\*</sup>The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Lecturing	Clase magistral en la que exponen los contenidos teóricos.
Problem solving	Resolución de problemas utilizando los conceptos teóricos presentados en aula.
Laboratory practical	Realización de tareas prácticas en laboratorio docente o aula informática

Personalized assistance			
Methodologies	Description		
Lecturing	Group or individual tutorials will be held during office hours to strengthen the acquired knowledge and to guide and assess the proposed works/papers .		
Problem solving	Group or individual tutorials will be held during office hours to strengthen the acquired knowledge and to guide and assess the proposed works/papers.		
Laboratory practica	I Group or individual tutorials will be held during office hours to strengthen the acquired knowledge and to guide and assess the proposed works/papers.		

Assessment				
	Description	Qualification	Training and Learning Results	
Laboratory practical	Attendance and participation as well as practices reports, papers, and tests will be rated. However, to be evaluated, students must attend a minimum of 7 practice sessions; otherwise, students won to be evaluated and will get 0 points.  Learning outcomes: all will be graded	20		
Essay questions exam	Final and mid-term tests will be focused on the contents taught at classes and laboratory sessions.  Learning outcomes: all will be graded.	80		

## Other comments on the Evaluation

Students must achieve a 5 or higher grade\* to pass the subject, following these rules:

- Students are required to attend and utilized the laboratory/Computer room. Practices reports, papers, and tests for
  each practice session as well as proposed works/papers from tutorials will be evaluated and graded with a maximum
  of 2 points of the final grade. This grade will be kept for the second term in the student sevaluation records (July).
  To be evaluated, students must attend a minimum of 7 practice sessions; otherwise, students won to be evaluated
  and will get 0 points.
- 2. For those students who have been officially granted the right to waive their continued evaluation, there will be a mandatory final test where they will be able to get a maximum grade of 2 points. However, an advanced request must be made to the professor to prepare the necessary materials for this test.
- 3. The final test will have a maximum grade of 8 points.

\* Grades are calculated using a system of numerical qualification from 0 to 10 points conforming to the Spanish current legislation (RD 1125/2003, 5 September; BOE 18 September).

Ethical commitment: An adequate ethical behaviour of the student is expected at all times. In case an unethical behaviour is detected (copying, plagiarism, unauthorized use of electronic devices, and others); the student will be considered unfit to meet the necessary requirements to pass the subject. In this case, the overall qualification in the current academic year will be a Fail grade (0.0).

The use of any electronic devices during tests is completely forbidden unless is specified and authorized. The fact of introducing unauthorized electronic devices in the examination room will be considered reason enough to fail the subject in the current academic year and the overall qualification will be a Fail grade (0.0).

Tests Schedule: This information can be found along with any updates at the center (university) webpage.

#### Recommendations

### Subjects that continue the syllabus

Machine design I/V12G380V01304

Automobiles and railways/V12G380V01941

Design of hydraulic machines and oleo-pneumatic systems/V12G380V01914

Machine design II/V12G380V01911

Computer-aided mechanical design/V12G380V01915

Transport engineering/V12G380V01945

Thermal engines and machines/V12G380V01913

Systems for data analysis, simulation and validation/V12G380V01933

Hybrid and electric automotive vehicles/V12G380V01944

#### Subjects that it is recommended to have taken before

Graphic expression: Graphic expression/V12G380V01101

Physics: Physics I/V12G380V01102

Mathematics: Algebra and statistics/V12G380V01103

Mathematics: Calculus I/V12G380V01104

Mathematics: Calculus II and differential equations/V12G380V01204

## Other comments

Requirements: to enrol in this subject, it is mandatory to have passed or at least, to be enrolled of all first year subjects. In case of discrepancies, the Spanish version of this guide prevails.
