General	(*)O obxectivo desta materia é que o estudant			
description	nunha e en varias variables e de cálculo integ debe cursar na titulación.	rai nunha variable que son	necesarias į	oara outras materias que

## Training and Learning Results

Code

Expected results from this subject	
Expected results from this subject	Training and Learning
	Results
Understanding of the basic knowledge of differential calculus of one and several variables	
Understanding of the basic knowledge of integral calculus of functions of one variable.	
Use of differential calculus techniques for locating extrema, local approximation of functions and	
numerical resolution of systems of equations	
Management of the techniques of integral calculus for the calculation of areas, volumes and	
surfaces.	
Use of computer tools to solve problems of differential calculus and integral calculus	

Contents	
Topic	
Convergence and continuity	Introduction to real numbers. Absolute value. Euclidean space R^n.
	Successions. Series.
	Limits and continuity of functions of one and several variables.
Differential calculus of functions of one and	Differential calculus of real functions of one real variable
several variables	Differential calculus of functions of several real variables
Integral calculus of functions of one variable	The Riemann integral. Calculus of primitives.
	Improper integrals.
	Applications of the integral.

Planning			
	Class hours	Hours outside the classroom	Total hours
Problem solving	20.5	30	50.5
Laboratory practical	12.5	5	17.5
Lecturing	32	39	71
Problem and/or exercise solving	3	3	6
Essay questions exam	2	3	5

<sup>\*</sup>The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	
	Description
Problem solving	The professor will resolve problems and exercises type and the student will have to resolve similar exercises.
Laboratory practical	They will employ computer tools to resolve exercises and apply the knowledges obtained in the classes of theory.
Lecturing	The professor will expose in the theoretical classes the contents gives the matter.

Personalized assistance			
Methodologies	Description		
Problem solving	The professor will attend personally the doubts and queries of the students.		
Laboratory practical	The professor will attend personally the doubts and queries of the students.		

Assessment			
	Description	Qualification	Training and
			Learning Results
Problem and/or exercise	They will make controls written and/or works.	60	
solving	The weight of each one of them will not surpass 30% of the		
	continuous evaluation.		
Essay questions exam	It will do a final examination on the contents of the whole of the	40	
	matter.		

#### Other comments on the Evaluation

The continuous eval. carry to cape on the previously exposed criteria. Those students that do not receive to the continuous eval be evaluated with a final examination on the contents of the whole of the matter, that will be the 100% of the note.

The continuous eval. of the students in second announcement consist in an examination on the contents of the whole of the matter, that will be 100% of the note.

#### Commitment:

"It expects that the present student a behaviour ethtic o suitable. In case to detect a behaviour no-ethic o (copy, plagiarism, use of electronical devices unauthorised, and others) consider hat the student doesnt the necessary requirements to surpass the matter. In this case the calification in the present course will be of suspense (0.0)."
