General description (*)Trátase dunha asignatura de carácter obrigatorio, incluída no módulo do título de grao denominado: O Traballo Social, conceptos, modelos, teoría e aplicación. Dentro deste sitúase na materia denominada: Métodos, modelos e técnicas de Traballo Social. Ten por obxectivo principal que o alumnado se achegue a intervención profesional do Traballo Social, coñecendo e anizando o seu concepto tanto clásico como dende unha perspectiva crítica na relación de axuda. Para operar de forma científica na profesión de Traballo Social é imprescindible que o alumnado coñezca, manexe e analice as diferentes perspectivas teórico-metodolóxicas da disciplina en relación ás habilidades, técnicas, instrumentos e documentos utilizados no Traballo Social para garantir unha adecuada intervención. Sin olvidar que calquera perspectiva empregada debe estar en consoancia có respecto os Dereitos Humanos.

Training and Learning Results

Code	
A2	Students know how to apply knowledge in their work or vocation in a professional manner and have competences that are usually proven through preparation and defence of arguments and problem-solving in their area of study.
A3	Students have the ability to gather and interpret relevant data (usually within their study area) to make judgements that include a reflection on the relevant social, scientific or ethical issues.
A4	Students can transmit information, ideas, problems and solutions to both specialised and non-specialised public.
A5	Students have developed the necessary learning skills to undertake further studies with a high degree of autonomy.
B1	Capacity to work and value of conjoint way with people, families, groups, organisations and communities his needs, limitations, difficulties, unrests and circumstances
B2	Analyse social situations subject to intervention, plan, develop, implement, review and evaluate social work practice with individuals, families, groups, organisations, and communities and with other professionals.
B3	Work with the people so that they are self-sufficient and with capacity to manifest his needs, wishes, points of view and circumstances
B5	Manage and be responsible, with supervision and support, for the practice itself within the organization
B6	Demonstrate professional competence in the exercise of social work
C1	To build professional relationships with the aim of identifying the most appropriate intervention.
C2	To work with persons, families, groups, organizations and communities, to help them make informed decisions about their needs, circumstances, risks, preferential options and resources, taking into consideration issues of cultural diversity (and therefore, the specificities of ethnic, cultural, linguistic diversity), the need to promote equality between men and women, the need to move to an environmentally sustainable society, and to defend the values of peace.
C4	To respond to situations of crisis through assessment of the urgency of situations, planning and development of actions to deal with them and through reviewing of results.
C5	To interact with persons, families, groups, organizations and communities in order to bring about changes, promote development and improve their conditions of life through the use of the methods and models of Social Work, monitoring regularly the changes that are taking place with the aim of preparing the completion of the intervention.

- C6 To prepare, produce, implement and assess the plans of intervention with the client system and the professional colleagues, to negotiate the supply of services that must be used and review the efficiency of the plans of intervention with the people involved in order to adapt them to changing needs and circumstances. All this, taking into consideration the ethical obligations of the profession concerning trust, proximity, friendliness, equal relations, respect for cultural diversity, etc.
- C7 To contribute to the establishment of networks to deal with the needs and work towards the achievement of the programmed results, examining them with the people involved and the support networks they might have or develop; particularly, in the case of women (abused women, regular caregivers of people with disabilities, people with mental and other disabilities[]), taking into consideration the specific characteristics of Galicia as a country with a geographically dispersed population, a marked contrast between rural and urban spaces, numerous abandoned areas and an ageing population (which requires larger networks).
- C9 To work on types of behavior that imply a risk for the client system through the identification and assessment of the situations and circumstances that determine such behavior and the implementation of strategies to change them.
- C10 To analyze and systematize the information provided by everyday work as a basis to change and improve the professional strategies that must respond to emerging social situations.
- C11 To use mediation as a strategy of intervention aimed at alternative resolution of conflicts.
- C12 To design, implement and assess projects of social intervention.
- C13 To defend situations, families, groups, organizations and communities and act on their behalf if the situation warrants.
- C14 Prepare and participate in decision-making meetings to better defend the interests of individuals, families, groups, organisations and communities.
- C19 To manage and present social records and reports, making them comprehensive, faithful, accessible and updated as a guarantee for decision making and professional assessments, being particularly cautious when it comes to preserving user[]s confidentiality rights, professional confidentiality and data protection rights.
- C20 To work efficiently within interdisciplinary and []multiorganizational[] systems, networks and teams with the aim of cooperating in the establishment of goals, objectives and implementation times, contributing also to dealing constructively with possible existence of disagreements.
- C22 To investigate, analyze, assess and use the knowledge available in the present time about the best practices of Social Work to review and update one[]s own knowledge frameworks.
- C23 To work within the accepted standards for the practice of Social Work and to secure one[]s own professional development through the use of professional knowledge and techniques as a means to justify decisions, reflecting critically about them and resorting to supervision as an instrument to improve and assess one[]s own professional practice.
- C24 Manage conflicts, dilemmas and complex ethical problems by identifying the same and designing strategies to overcome them and reflect on the results
- D1 Capacity for analysis and synthesis
- D2 Organization and planning skills.
- D3 Capacity for reflection
- D6 Knowledge of the specific culture of the autonomous community.
- D7 Learning and mastering of new technologies
- D8 Information-management skills.
- D9 Problem-resolution skills.
- D10 Decision-making
- D11 Work in and with diverse teams
- D12 Interdisciplinary teamwork.
- D14 Interpersonal relations skills.
- D15 Recognition and respect towards diversity and multiculturalism
- D16 Critical-thinking skills.
- D17 Ethical commitment
- D18 Independent-learning skills.
- D19 Adaptation to new situations
- D20 Creativity.
- D21 Leadership skills.
- D22 Entrepreneurship skills.
- D23 Striving for quality.
- D24 Sensitivity toward environmental issues, equality between men and women, culture of peace, etc.

				C22	

Laboratory practice	Completion, in writing and individually, of a practical test, in relation to the case studies and practical exercises developed throughout the semester: at least it will deal with the techniques of narrative support and the realization of an open social report.	40	B6 C10 C12 C19 C22 C23 C24	D1 D3 D8 D9 D10 D15 D17 D19 D20 D24
Problem and/or exercise solving	Proof by writing envelope to interview and delivery of autonomous practices envelope the same.	10	B3 B6 C9 C10 C23	D3 D6 D8 D9 D10 D16 D17 D18 D23 D24

Other comments on the Evaluation

In order to pass the subject, each of the planned tests (seminar, portfolio, multiple-choice tests and practical tests) must be passed previously and independently. Students will not be assessed if they do not complete the tasks assigned (in due time and form) for the seminars and practical exercises.

Students are warned that no marks will be kept for the following year, this aspect applies to both continuous assessment and global assessment students.

ASSESSMENT SYSTEMS

1.- CONTINUOUS EVALUATION (DESCRIPTION AND REQUIREMENTS): it is aimed at those students who have a minimum attendance of 80% in the lectures and a maximum of 2 absences in the seminars, in addition they must have delivered the assignments in due time and form. If they do not comply with this requirement, they will be assessed by the global assessment system (single test). The tests and scores are those that appear in the evaluation methodologies, and each one must be passed independently in order to pass the course.

GLOBAL EVALUATION (SINGLE TEST): students who do not meet the minimum attendance requirements (lectures and seminars). These students will be assessed in this way: they will have to pass the same competences as the continuous assessment students in a single final exam, which will consist of several parts. As this is a single test, students who do not pass the first part, i.e. the dossier, will not have access to the rest of the tests; then the test (examination of objective questions), and if they do not pass, the practical tests (interview and social report) will not be assessed. The tests to be taken are as follows (as well as the assistants must pass each of the tests listed below of the single test independently):

1.-Submission of a dossier with the practical work and exercises developed in the seminars (they must be supervised continuously by the teacher prior to final presentation), throughout the semester and will be delivered at the end of the teaching, prior to the rest of the tests, in an internal document in Moovi the deadlines will be established). It will score 15%, if this is not delivered on the requested date or is not apt, you will not be able to access the rest of the tests (as it is a single test that requires that all parts are passed).

b.-Final exam in the official call, exam type of objective questions (same format and correction system as for the assistants). It will score 30% of the marks.

c.-Written test on the interview and delivery of autonomous practices on the same. It will score 15%.

d.-Practical laboratory test: written completion of cases and practical exercises (will be evaluated provided that the first part of the dossier and the multiple-choice test have been passed), the exercise is the same as for students of continuous assessment. It will score 40%.

WARNING: The continuous monitoring of classroom activities and the communication with students related to the course will be assessed in the same way as for continuous assessment students.

Other comments

A MOOVI will upload a photo at the beginning of the course, as well as our personal details or contact telephone number.

IMPORTANT: it is a subject that requires previous knowledge of theoretical-methodological content subjects in Social Work, which are taken previously, it is advisable to have knowledge of them to ensure proper development and acquisition of the skills of this particular subject (take into account at the time of enrollment).

- 1.-To work and to study in a continuous way advances notably the overcoming of the subject, since it is a subject that requires to settle of continuous form the contents.
- 2.-To read the topics of the master session before the same, in order to improve the understanding of the general explanation of the teacher, as well as to bring elaborated the doubts to the classroom to be able to solve them according to the needs of the students.
- 3.-To bring the day the activities planned for each seminar.
- 4.-Plantexar all the doubts about any aspect of the subject to the teacher, both in the classroom (in relation to the contents and exercises) and in the office tutorías (for other aspects related to the subject or to sink in doubts that for question of time it is not possible to do it in the classroom). È important to go titorizando the correction of the exercises throughout the course, to guarantee the overcoming of the dossier and practical examination.
- 5.-Students in attendance: it is important that they do the exercises and tests gradually throughout the semester in order to guarantee the result of the practical tests.

-This subject is part of a faculty committed to the sustainability of the environment and people. According to this philosophy, this subject will promote educational practices based on low environmental impact materials in coherence with the principles of sustainability (ODS).
