

(*)E. U. de Enfermaría (Povisa)

(*)ORGANIZACIÓN ACADEMICA

(*)
En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales ENFERMEROS.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que constantemente aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión ENFERMERA abarca los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas.

Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias medicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus CUATRO FUNCIONES : ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes. Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

- El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.
- El fomento de la aplicación práctica de los conceptos teóricos.
- Evaluación continuada del alumno por medio de tutorías.

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten. Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

ORGANIZACIÓN CURSOS ACADÉMICOS

El plan de estudios de Grado tiene 240 CRÉDITOS ECTS distribuidos según tabla:

(*)PERSONAL DOCENTE

(*)PERSONAL ACADÉMICO GENERAL E.U.ENFERMERÍA POVISA:

Será requisito ineludible para ser profesor/a de la Escuela tener la titulación requerida por la legislación vigente y obtener la

"**VENIA DOCENDI**" de la Universidad de Vigo para la materia o disciplina que vaya a desarrollar.

La "**VENIA DOCENDI**" será solicitada por la Escuela con carácter previo a la formalización de cualquier contrato de profesorado; tendrá el carácter de permanente, salvo revisión realizada a propuesta del Delegado de la Universidad.

La "**VENIA DOCENDI**" será otorgada por el Rector a petición de los respectivos centros adscritos y después del informe del delegado de la Universidad.

La "**VENIA DOCENDI**" constituye un requisito explícito por parte de la Universidad de Vigo de que cada profesorado de un centro adscrito cumple con los requisitos exigidos para la docencia en el centro y facultan, al mismo tiempo, para firmar las actas oficiales de calificación de los estudiantes.

El profesorado que no posea "**VENIA DOCENDI**" no podrá formar parte del cuadro de personal docente ni ejercer la docencia en un centro adscrito a la Universidad de Vigo.

La selección del personal docente e investigador de los centros adscritos se llevará a cabo respetando los principios de igualdad, mérito y capacidad de acuerdo con lo establecido en la legislación vigente.

El nombramiento y contratación del personal docente e investigador de los antedichos centros le corresponden al titular de los mismos, una vez que los candidatos propuestos soliciten de la Universidad de Vigo la "**VENIA DOCENDI**" correspondiente.

CUADRO GENERAL DEL PROFESORADO SEGÚN CATEGORÍA ACADÉMICA, SU VINCULACIÓN CON LA UNIVERSIDAD Y SU DEDICACIÓN AL TÍTULO.

La figura de coordinador/a de curso, asegura la adecuada coordinación docente en el proceso de programación de la evaluación continuada de las materias en cada curso académico a través de reuniones de seguimiento y coordinación.

Esas reuniones de curso, arrancarán con una inicial, previa al comienzo de curso, en la que el coordinador planteará un calendario de actividades cuyo fin último es que no se produzcan solapamientos entre las distintas actividades que se proponen en las distintas guías docentes. Adicionalmente, esas reuniones iniciales servirán también para corregir la tendencia a incluir un excesivo número de actividades.

Se busca, por tanto, que la evaluación continuada se materialice en una distribución equilibrada de tareas a lo largo de todo el curso académico, apoyada en una programación racional de las materias. Para lograrlo, se dispondrán con cierta periodicidad reuniones de seguimiento y el coordinador del curso emitirá informes de seguimiento, destinados a mantener informados al Profesorado y Dirección sobre incidencias y eventos relevantes. Al finalizar el curso se celebrará una última reunión destinada a hacer balance y destacar posibles problemáticas a resolver para el siguiente curso.

RELACIÓN DE COORDINADORES CURSO ACADÉMICO:

Coordinador **1º** Curso:

Vicente Suárez González

Coordinador **2º** Curso:

Esperanza Mª Giraldez Miranda

Coordinador **3º** Curso:

Alicia Muiños Álvarez

Coordinador **4º** Curso:

Alfonso Eduardo Maldonado Arroyo

Además, existen las figuras del coordinador/a de prácticas externas (de ser el caso) y del trabajo de fin de grado, que se encargarán de coordinar los distintos/as tutores/as.

La Escuela de Enfermería de POVISA establecerá reuniones periódicas con las escuelas ubicadas en Vigo que comparten centros de prácticas para facilitar la coordinación vertical entre cursos de las prácticas y el intercambio de experiencias.

Con ello se persigue analizar las distintas propuestas de mejora, establecer criterios básicos de evaluación y organizar actividades conjuntas que afecten a más de una materia, por citar algunos objetivos concretos.

En definitiva, el sistema de coordinación que se propone constituye un elemento fundamental en la introducción de los nuevos objetivos y metodologías y, sobre todo, servirá para profundizar en una mejor y mayor coordinación entre docentes y entre éstos y el Centro.

En un futuro, dado que la coordinación del conjunto de actividades resulta clave para el adecuado aprovechamiento del alumnado, se pretende continuar este diseño, adecuándolo a las nuevas exigencias y tratando de garantizar niveles satisfactorios de coordinación vertical y horizontal.

PERSONAL NO DOCENTE E.U.ENFERMERÍA POVISA:

PAS: PERSONAL DE ADMINISTRACIÓN Y SERVICIOS.

- 1 Jefe de Servicios administrativos

- 1 oficial administrativo a tiempo completo.
- 1 auxiliar administrativo a tiempo completo

(*)INFORMACIÓN ESTUDIANTES PRIMERO Y TRASLADOS

(*)

ESCUELA UNIVERSITARIA DE ENFERMERÍA POVISA

INFORMACIÓN GENERAL.

La Escuela Universitaria de Enfermería de POVISA, adscrita a la Universidad de Vigo, nació oficialmente en el año 1991 bajo el patronazgo del HOSPITAL POVISA con la idea de desarrollar una función docente que consideraba adecuada y beneficiosa para un HOSPITAL de sus características, formando profesionales de Enfermería que cuando terminaran sus estudios, pudieran pasar a formar parte de la División de Enfermería del hospital.

Nuestra Escuela se rige por la Legislación Universitaria vigente, y por tanto, el Plan de Estudios está homologado y compartido por las otras E.U.E. adscritas a la Universidad de Vigo, la cual emite el título de Grado en Enfermería, lo que nos permite una comunicación fluida y facilita los posibilidades de traslados de estudiantes entre las Escuelas que en su momento pudieran surgir.

Las clases teóricas se imparten en las instalaciones en la calle Romil 75-77 y las prácticas se realizan en los distintos Departamentos, Servicios y Laboratorios del Hospital Povisa, y en hospitales de la red pública, así como en Centros de Salud y Residencias de la Tercera edad.

EQUIPO DIRECTIVO:

- **Director:** Alfonso García Suárez
- **Subdirectora:** M^a Concepción Agras Suárez
- **Secretario:** Ángel Marcial Pérez

Además cada uno de los cursos del Grado tiene un tutor que será referente de los alumnos con respecto a temas relacionados con la docencia.

TUTOR 1º CURSO:

- **VICENTE SUÁREZ GONZÁLEZ** profesor de la materia **PSICOLOGÍA** de 1º curso

TUTOR 2º CURSO:

- **MARÍA GIRALDEZ MIRANDA** profesora de la materia **INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA** de 2º curso.

TUTOR 3º CURSO:

- **ALICIA MUIÑOS ALVAREZ** profesora de la materia **ENFERMERIA CLINICA III** de 3º curso.

TUTOR 4º CURSO:

- **EDUARDO MALDONADO ARROYO** profesor de la materia de **TFG** de 4º curso.

PLAN DE ESTUDIOS

En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales **ENFERMEROS**.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que, constantemente, aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión **ENFERMERA** abarca **los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e**

incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas. Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias médicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus **CUATRO FUNCIONES: ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA** que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes.

Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

□*El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.*

□*El fomento de la aplicación práctica de los conceptos teóricos.*

□*Evaluación continuada del alumno por medio de tutorías.*

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten.

Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

NORMAS GENERALES:

La asistencia a clases se rige por normativa de la Universidad de Vigo.

Durante la asistencia y permanencia en las instalaciones del Centro:

- No está permitido fumar ni utilizar telefonía móvil.
- No está permitido utilizar el ascensor destinados a estudiantes y profesores con problemas de movilidad física.
- Podrá utilizarse la biblioteca del Centro, así como las aulas destinadas a los trabajos de grupo que están en el semisótano.
- Es imprescindible cuidar el aspecto personal, aseo y las formas de convivencia básicas así como las instalaciones que debemos mantener para que puedan ser utilizadas adecuadamente por todos.

Competencies

Code

- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A5 Students have developed those skills needed to undertake further studies with a high degree of autonomy.
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B16 To be able to use health information systems.
- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- C2 To know the use and indication of nursing care-related health products
- C9 To know the physiopathologic processes, its declarations and the factors of risk that determine the states of health and illness in the different stages of the vital cycle.
- C13 To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
- C28 To know adult health alterations, identifying manifestations appearing in different phases
- C29 To identify care needs arising from health problems.
- D1 Analysis and synthesis ability
- D2 Organization and planning ability
- D3 Information management ability.

Topic

1. Distinction go in the concepts: Ethics, *Deontología and Right.	Brief historical development of the Ethics and the *Bioética. 1.1. Definition of ethics and moral, origin and meaning. 1.2. The ethical dimension of the person: the very moral and the end of the *obrar human. 1.3. Basis and forcing of the moral norm: concept of responsibility.
2. Codes *Deontológicos.	Codes *Deontológicos. Report *Belmont: 2.1. Principle of *Beneficencia. 2.2. Principle of Autonomy. 2.3. Principle of the *Maleficencia. 2.4. Principle of Justice.
3. The juridical regulation and *deontológica of the right of the patients.	3.1. Differences and similarities between normative and ethical Codes. 3.2. Methodology stop the resolution of ethical problems. 4. The Juridical regulation and *Deontológica of the right of the patients: current ethical Dilemmas, common in the exercise of the profession: 4.1. The professional secret and the profession *nurse. 4.2. The consent informed. 4.3. Voluntary interruption of the Pregnancy, questions around the voluntary abortion. 4.4. The terminal patient, the Euthanasia and the Suicide Assisted. 4.5. The truth in front of it ill. Attention *humanizada, spiritual Attention. 4.6. Ethical aspects of the investigation in subject of Health service: human Experimentation, genetic Manipulation. Project human Genome. *Fecundación, Procreation, Reproduction. 4.7. Ethical aspects around the Transplant of organs. 4.8. Right and owe of users and professional: 4.8.1. Right and owe of the patients. 4.8.2. Right the strike in the Health service.
5. Knowledge of the legal frame and valid official to develop work them own of the professional of infirmary.	5.1. The sanitary professional of the century XXI. - Advance of the *Medicina and of the society in general. - The new sanitary professional. Of the independence to the most absolute control. - The *medicina defensive. - Causes that originated the proliferation of claims. 5.2. Application of wool law 26/1984 of 19 of general July stop the defence of the consumers and users it the cases of medical responsibility. 5.3. The *medicina and a science of means without that can guarantee the result. 5.4. *Medicina *curativa And *medicina *satisfactiva. Difference go in both. Study *jurisprudencial.

6. Ethical and Juridical rule in relation with the professional secret.
- 6.1. Analysis of the concept and range.
 - 6.2. Legislative antecedents.
 - Swearing *hipocrático.
 - Declaration of Gin.
 - Spanish constitution (Law of the Professional Secret).
 - Code of *Deontología Medical.
 - Law of Health service.
 - Law of Protection of Data.
 - Law 3/2001 of him Consent Informed.
 - Law 41/2002 of the Autonomy of the Patient.
 - Law 3/2005 of the Consent Informed of Galicia.
 - 6.3. Exceptions to obligation of secret.
 - 6.4 penal Consequences of the disclosure of secrets.
 - 6.5 civil Consequences of the disclosure of secrets.
 - 6.6 Comment sentences it of the second section of the high court of date 4 of April of the 2001 by rape of said professional secret.
 - 6.7 final Considerations.
-

7. General laws that have repercussion envelope to profession.
- The Consent informed. Previous considerations:
 - 7.1 Concept of consent informed.
 - 7.2 The general law of health service
 - 7.3 The Galician law @regulador of the consent informed and of the clinical history. Analysis of the articles 1 to 9 of said law.
 - 7.4 state Law @regulador of the autonomy of the patient and of rights and duties in subject of information and clinical documentation. Law 41/2002.
 - 7.5 Analyses of the Galician law 3/2005 that modifies the law 3/2001 of 28 of May @regulador of the consent informed and of the clinical history of the patients.
 - 7.6 aesthetic Surgery and analogous cases.
 - 7.7 urgent Cases.
 - 7.8 The back information to the act to medical intervention. *Prescripciones Stop the good execution of the treatment.
 - 7.9 Cases of experimentation *biomédica.
 - 7.10 Responsibilities that can be demanded by defect in the consent. Study *jurisprudencial.
 - 7.11 vital Testament, wills anticipated. Special reference to law 3/2001 envelope the consent informed and the clinical history.
- 8.2 legal Regulation.
- IT) General Law of Health service and Real Decree that it develops.
 - *B) Law of Protection of data.
 - *C) Analysis of the Law 3/2001 of Galicia envelope the Consent Informed and Clinical History.
 - *D) Analysis of the Regulatory Law of the Autonomy of the patient and of rights and duties in subject of information and clinical documentation. Law 41/2002.
 - And) Analysis of the Galician Law 3/2005 that modifies the Law 3/2001 of 28 of May @regulador of the consent informed and of the clinical history of the patients.
9. The Law of Protection of Data. Application in the sanitary field:
- 9.1 Concept of data of personal character.
 - 9.2 Levels of second security the type of data.
 - 9.3 Rights of the affected.
 - 9.4 due Sanctions.
 - 9.5 The Agency of Protection of Data. Functions.
 - 9.6 The protection of data in hospitals.
 - 9.7 Guarantees of the *hard-working.
 - 9.8 Guarantees of the system established by the Sanitary Institution.
 - 9.9 practical Questions envelope to Law of Protection of Data.
 - 9.10 Legislation envelope to protection of data in the sanitary field.
 - 9.11 penal Jurisprudence and civil within the scope of the Law of Protection of Data.
 - 9.12 Resolutions of the Agency of Protection of Data.
10. Safe that protect the sanitary activity:
- 10.1 Reasons that justify the *formalización of a sure.
 - 10.2 Roads by the that can initiate the claim.
 - 10.3. Alternatives and types of *aseguramiento sanitary.
 - 10.4 Conditions of the policies.
 - 10.5 Coverage of the policies.
 - 10.6 economic Limits.
 - 10.7 temporary Limit.
 - 10.8 Coverage of the policies.
 - 10.9 *Concorrencia of policies of civil responsibility of the professional and of the hospitable centre.
 - 10.10 Conclusion.
11. The responsibility in general and the derivative of the sanitary performance:
- 11.1 Elements of the crime.
 - 11.2 Forms of *culpabilidad
 - 11.3. Participation in the crime
 - 11.4. Penal responsibility derived of the work in team.
 - 11.5. Juridical consequences of the crime inside the medical professional activity.
 - 11.6. Denomination of the penalties.
 - 11.7 The civil responsibility
12. Crimes *tipificados in the Penal Code and related with the sanitary activity:
- 12.1 Crime of abortion out of the cases allowed in the Law.
 - 12.2 Injuries to the @feto.
 - 12.3 Crimes against it greet public.
 - 12.4 Homicide with *imprudencia.
 - 12.5 Alteration in quantity, dose and composition of medicines.
 - 12.6 Disclosure of professional secrets.
 - 12.6 Injuries by *imprudencia professional.
 - 12.7 Abortion by *imprudencia professional.
 - 12.8 Abandonment of the sanitary services.
 - 12.9 Damages to the @feto by *imprudencia.
 - 12.10 Expedition to sale of medicines *deteriorados or expired.
13. Right and owe of the patients:
- 13.1 legislative Analyses
 - 13.2 Definition and development of the right and owe of the patients.
14. The responsibility of the sanitary institutions:
- 14.1 civil Responsibility subsidiary in the penal procedure
 - 14.2 civil Responsibility direct.
 - 14.3 Responsibility in the administrative contentious road
 - 14.4 administrative Responsibility by *incumplimiento of the law of protection of data or another legislation inside the sanitary field.
15. Functions and Disciplinary Regime of the *Diplomados and/the Graduated in Infirmary:
- 15.1 Functions in open institutions.
 - 15.2 Functions in institutions closed.
 - 15.3 Functions in medical zones.
16. It transplant of organs. Legal requirements:
- 16.1 *Obtención of pertinent organs of alive donors.
 - 16.2 Extraction of organs or other pieces *anatómicas of the died.

8. Specific laws medics.	8.1 Organic Law 15/1999 of Protection of Data of Personal Character. 8.2 Law 3/2001 of Galicia of him Consent Informed and of wool Clinical History. 8.3 Law 41/2002 basic @regulador of the autonomy of the patient and of rights and obligations in subject of information and clinical documentation. 8.4 Law 3/2005 of Galicia, that modifies partially the Law 3/2001 of the consent informed and of the clinical history.
9. Problems related with the start *and final of the life.	The voluntary interruption of the pregnancy since the legal point of view: 9.1 Concept. - Abortion acceded by the pregnant. - Abortion no acceded by the pregnant. - Violent abortion *without intention. 9.2 *Suppositions *collected in the current *Law of the Abortion. 9.3 *Exceptions. 9.4 Requirements stop the practice of the abortion.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	20	20	40
Case studies / analysis of situations	18	18	36
Tutored works	14	56	70
Introductory activities	2	0	2
Long answer tests and development	1	0	1
Multiple choice tests	0.5	0	0.5
Short answer tests	0.5	0	0.5

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Exhibition by part of the professor of the contained envelope to subject object of study, theoretical bases and/or guidelines of one work, exercise or project to develop pole student.
Case studies / analysis of situations	Analysis of a done, problem or real event with the aim to know it, interpreted, resolved, generate hypothesis, contrast data, *reflexionar, complete knowledges, diagnosed and trained in alternative procedures of solution.
Tutored works	Activity developed in a half virtual in the that debate diverse subjects related with the academic field and/or professional.
Introductory activities	Activities *encamíñadas to take contact and gather information envelope the students, as well as to present the subject.

Personalized attention

Methodologies	Description
Tutored works	The first day of kind will expose the content of the subject and will schedule the development of the works *grupais. It Will attend to the student to guide it in the his academic difficulties.
Case studies / analysis of situations	The first day of kind will expose the content of the subject and will schedule the development of the works *grupais. It Will attend to the student to guide it in the his academic difficulties.

Assessment

	Description	Qualification	Training and Learning Results
Case studies / analysis of situations	Proof in the that presents a situation or problematic already given or that can gave, splitting of the different factors *involucrados, the analysis of the antecedents, conditions, of the situation, etc.	10	
Tutored works	The student presents the result obtained in the manufacture of one document envelope to thematic of the subject, in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. Can be carried out of individual way or in group, of oral form or writing	20	
Long answer tests and development	Proofs for evaluation of the competitions purchased that include open questions envelope a subject. The students owe to develop, relate, organize and present the knowledges that have envelope to subject in an extensive answer.	30	
Multiple choice tests	Proofs for evaluation of the competitions purchased that include questions closed with different alternatives of answer (true/false, multiple election, *emparellamento of elements...). The students select an answer go in a number limited of possibilities.	20	

Short answer tests Proofs for evaluation of the competitions purchased that include direct questions
envelope a concrete aspect. The students owe to answer of direct and brief way
in base to the knowledges that have envelope to subject. 20

Pharmacology and dietetics

Subject	Pharmacology and dietetics			
Code	V53G140V01203			
Study programme	(*)Grao en Enfermaría			
Descriptors	ECTS Credits 9	Choose Basic education	Year 2nd	Quadmester 1st
Teaching language	Spanish Galician			
Department				
Coordinator	Gayoso Rey, Mónica			
Lecturers	de Miguel Bouzas, José Carlos Gayoso Rey, Mónica Maldonado Arroyo, Alfonso Eduardo			
E-mail				
Web	http://www.cepvisa.com			
General description	The Pharmacology like scientific discipline is the knowledge of the drug, of the destination that suffers in the organism and of his mechanism of action, in which they base his therapeutic properties and adverse reactions.			

Competencies

Code				
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.			
B9	To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.			
B10	To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.			
C3	To learn about the different groups of drugs, the principles of their authorisation, use and indication, and their mechanisms of action.			
C4	Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.			
C5	To know and assess the nutritional needs of healthy people and problems of health throughout the vital cycle, to promote and reinforce healthy eating guidelines.			
C6	To identify the nutrients and the food in where they are.			
C7	To identify the nutritional problems of major predominance and to select the suitable dietetic recommendations			
C8	To apply the technologies and information systems and communication of health care			
D1	Analysis and synthesis ability			
D3	Information management ability.			
D4	Problem solving and decision making.			
D7	Critical reasoning.			

Learning outcomes

Expected results from this subject	Training and Learning Results		
Be able to differentiate the different groups of medicines, the principles of his permission,use and indications, as well as the foundations *farmacodinámicos and *farmacocinéticos involved.	A3	C3 C4 C8	D3 D4
Be able to evaluate the profits expected and the risks associated to the administration of medicines, so much from the populational point of view as of the individual patient.	A3 B10	C3	
Be able to apply the principles that govern the rational and efficient use of the *farmacoterapia.		C3 D1 D7	
Know realise guidelines and healthy indications in the healthy population in the distinct stages of the life, in function of age and sex.	B9 B10	C8	D3
Know identify the situations of nutritional risk. Know realise nutritional interventions and establish guidelines and recommendations in the prevention or treatment of the illness.		C5 C6 C7	D1 D4

Contents

Topic

1.- Concepts of pharmacology and drugs, principles and general mechanisms of action of the drugs	Pharmacology: concept and aims. Division of the Pharmacology. Concept,medicine and drug. Nomenclature and category of the medicines.
--	---

2. Forms of dosage. Stability of the medicines	*Posología, dosage, caducity and conservation of the medicines.
3. *Farmacocinética Of the medicines: Absorption, distribution, metabolism, elimination, clinical implications.	Absorption, distribution, metabolism and elimination.
4. *Farmacodinamia Of the medicines.	General concept of action and pharmacological effect. The pharmacological receptor. Affinity and intrinsic activity. Drugs *agonistas and antagonistic. Power and efficiency of the drugs.
5. Foundation of the *posología and of the diet *posológico.	Roads of administration of the medicines. Study of his characteristics.
6. *Farmacoterapia In function of the most frequent problems.	Pharmacology of the illnesses *infecciosas: general principles, selection and associations of antibiotics. Antibiotics *betalactamicos. Antibiotics *aminoglucósidos. *Glucopéptidos. *Oxazolidinonas. *Estreptograminas. *Macrólidos And *lincosamidas. *Tetraciclinas. *Cloranfenicol. Other antibiotics. *Quinolonas. *Sulfamidas. *Trimetoprima. *Cotrimoxazol. *Nitrofurantoina. Pharmacology of the infections by *micobacterias. Drugs *antifúngicos. Drugs *antivíricos. Drugs *antisépticos. Drugs *antiparasitarios: Protozoons, Helminths and Arthropods. Chemotherapy *antineoplásica. Pharmacology of the immunity. Vaccines and serums. *Inmunosupresores. *Inmunomoduladores And *inmunoestimulantes. General anaesthetic drugs. Local anaesthetics. Drugs *antipsicóticos *neurolépticos. Antidepressant drugs and *antimaníacos. *Ansiolíticos. Sedatives. Hypnotic drugs. Drugs *antiepilepticos and *antiparkinsonianos. Analgesic drugs *opiáceos. *Psicoestimulantes. *Psicomiméticos. Addiction to drugs and other substances. Analgesic drugs *antipiréticos anti-inflammatories no *esteroideos (*AINEs). *Antiarríticos. Medicines of the Autonomous Nervous system. *Simpaticomiméticos And *simpaticolíticos. *Parasímpaticomiméticos And *parasímpaticolíticos. *Bloqueantes Neuromuscular. *Autacoides And his antagonists. *Glucósidos Cardiac. *Antiarrítmicos. *Antiangularinosos And *antihipertensivos. *Broncodilatadores, *antitusígenos *mucolíticos and *expectorantes. Other drugs used in respiratory illnesses. *Antiácidos, *antieméticos and *eméticos. *Laxantes And *antidiarreicos. Pharmacology of the blood coagulation. Drugs *antianémicos. *Corticoides. Pharmacology of the thyroid. Pharmacology of the endocrine pancreas. *Andrógenos. Oestrogens and *progestágenos. Contraceptives *hormonales. Drugs *hipolipemiantes. Drugs *uricosúricos and *antigotosos. Vitamins. Physiological paper and therapeutic utilisation. *Coenzimas.
7. Adverse effects of the medicines.	Farmacological interactions.
8. Nutrition and dietary: historical Development of the nutrition and the dietary, the concept of nutrients and energy.	Introduction to the history of the nutrition. Evolution of the nutrition. Description of the *fundamentos nutritional.
9. Factors that determine the energetic needs, needs and nutritional recommendations.	*Determinantes Of the energetic requests. Predictive equations of the energetic expense.

10. Study of the foods like source of energy and nutrients.	Energetic requests in situation of fast. Energetic requests in situation of acute aggression.
11. Modifications that suffer the foods with the processed.	Metabolism of the *macronutrientes.
12. Study of the feeding of the healthy people and in the distinct moments of the vital cycle.	Nutrition in the infancy, adolescence and *senectud.
13. Study of the assessment of the nutritional state of the individuals.	Nutritional assessment. Regulation of the energetic balance and of the corporal composition.
14. *Dietoterapia In function of the most frequent pathologies	*Dietoterapia Of the renal illnesses. Nutrition and immunity. Nutritional cares in the alterations *metabolicas. Nutritional cares in the alimentary intolerances. Nutrition and alcohol hospitable Entry and dietary Nutrition artificial Requests in pathological situations.

Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	2	0	2
Master Session	69	138	207
Seminars	2	0	2
Troubleshooting and / or exercises	2	5	7
Case studies / analysis of situations	2	3	5
Multiple choice tests	1	0	1
Short answer tests	1	0	1

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the *asignatura.
Master Session	Exhibition by part of the professor of the contents on the matter object of study, theoretical bases and/or guidelines of a work, exercise or project to develop by the student.
Seminars	Activities focused to the work on a specific subject, that allow to deepen or complement the contents of the matter. Can employ as I complement of the theoretical classes.
Troubleshooting and / or exercises	Activity in which they formulate problem and/or exercises related with the *asignatura. The student has to develop the suitable or correct solutions by means of the *ejercitación of routines, the application of formulas or algorithms, the application of procedures of transformation of the available information and the interpretation of the results. It is used to use as I complement of the lesson *magistral.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, *reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.

Personalized attention

Methodologies	Description
Seminars	Activities focused to work on a specific topic, allowing delve or supplement the contents of the field. They can be used to supplement the lectures.
Troubleshooting and / or exercises	Activity which formulated problem and / or exercises related to the course. The student should develop appropriate solutions or right through the exercise routines, application of formulas or algorithms, application processing procedures available information and interpretation of the results. It is often used to complement the lecture.
Case studies / analysis of situations	Analysis of an event, issue or actual event in order to know, interpret, solve, generate hypotheses, comparing data, reflect, complete knowledge, diagnose and training in alternative dispute resolution procedures.

Assessment

Description	Qualification Training and Learning Results

Multiple choice tests	Proofs for evaluation of the competitions purchased that include enclosed questions with different alternative of answer (true/false, multiple election, *emparejamiento of elements...). The students select an answer between a number limited of possibilities.	95	C3 C4
Short answer tests	Proofs for evaluation of the competitions purchased that include direct questions on a concrete appearance. The students have to answer of direct and brief way in base to the knowledges that have on the matter.	5	A3 B9 C5 B10 C6 C7

General description	Subject destined to the knowledge of the patologias so much medicas how quirúrgicas,takes how the distinct cares that the professional of Enfermaria exerts.			

Competencies

Code

A2	Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
C28	To know adult health alterations, identifying manifestations appearing in different phases
C29	To identify care needs arising from health problems.
C30	To analyze collected data in the assessment, prioritize the problems of the adult patient, establish and execute care plan and its assessment.
C31	To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
C32	To select interventions to treat or prevent deviations from health-related problems.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinar and multilingual teamwork
D7	Critical reasoning.
D10	Motivation for the quality.
D11	Sensitivity towards environmental issues.

Topic

SUBJECT 1: INTRODUCTION To The SURGICAL MEDICAL INFIRMARY.	1. GENERALITIES. 1.1. Nomenclature of the surgical acts: 1.2. Diéresis: hemostasia, Tomía, paracentesis, lisis. 1.3. Main actions on the organs: Extirpation, Ostomía, anastomosis, Pexia, Plastia. 1.4. Synthesis.
	2. SURGICAL INTERVENTION: 2.1. Surgery second his location: interns, external. 2.2. Surgeries second his greater and lower complexity. 2.3. Surgeries second his purpose: curativas, reparadoras, palliative and plastic and aesthetic. 2.4. Surgeries according to days of stay: CMA and conventional. 2.5. Surgeries according to situation. 2.6. Programmed and surgeries of urgency.
	3. ANAESTHESIA: TYPES And PATIENT PREPARATION. 3.1. Anaesthesia. Concept and types of anaesthesia. 3.1.1. General anaesthesia. 3.1.2. Regional local/ anaesthesia. 3.1.3. Raquianesthesia 3.1.4. Epidural
	4. COMPLICATIONS post SURGICAL: 4.1. Shock: types of shock. 4.1.1. Shock and anaesthesia. 4.2. Bleeding. 4.3. Respiratory complications. 4.4. Disorders of consciousness. 4.5. Vascular complications. 4.6. Other complications: 4.6.1. Pain. 4.6.2. Inflammation and secondary general reaction. 4.6.3. Wounds and infection. Surgical infections.
	5. SURGICAL PATHOLOGY 5.1. Pathology induced by toxic. 5.2. Pathology tumoral and surgery oncológica. 5.3. Immune answer. Transplante. Sida
SUBJECT 2: ATTENTION OF INFIRMARY IN The PERIOPERATORIO.	2.1. Cares of infirmary in the *preoperatorio. 2.1.1. surgical Entry 2.1.1.1 physical Assessment general: age, nutritional state, immunological situation, concomitant Illnesses. 2.1.1.2 Proofs diagnósticas of routine 2.1.1.3 Drugs with special characteristic 2.1.2 Transfer to the operating theatre 2.2 Cares of infirmary in the intraoperatorio. 2.2.1. Functions of Infirmary 2.2.1.2 Placing of the patient: positions according to IQ. 2.3 Cares of infirmary in the postoperatorio. 2.3.1 POSTOPERATORIO IMMEDIATE 2.3.2 POSTOPERATORIO MEDIATO
SUBJECT 3: ATTENTION OF INFIRMARY To THE PATIENT PERSON WITH DISORDERS OF THE BALANCE HIDROELECTROLITICO And BASIC ACID, SYNDROME HEMORRÁXICA, INFLAMMATION, INFECTION, SHOCK, PAIN.	3.1 Shock. I process nurse to the patient in state of shock. 3.2 Bleeding. Treatment with blood and hemoderivados. 3.3 Pain. I process nurse to the patient with pain. 3.4 Wounds and infection. Infections of the surgical wound.

SUBJECT 4: The/THE PATIENT WITH ALTERATIONS TEGUMENTARIAS.	4.1 Alterations of the skin: 4.1.1 Foliculitis 4.1.2 Abscessos 4.1.3 Burns 4.1.4 Injuries. 4.2 Alterations of the fabric graso: celulitis
SUBJECT 5: THE/THE PATIENT WITH PROBLEMS OF GASEOUS EXCHANGE.	5.1 Ventilation and diffusion. 5.2 Oxigenoterapia. 5.3 Respiratory Insufficiency 5.4 mechanical Ventilation. 5.5 Pathologies related with the gaseous exchange: 5.5.1 Asthma. 5.5.2 EPOC. 5.5.3 Infections (Bronquitis, Pneumonia, absceso). 5.5.4 pulmonary Tumors. Respiratory insufficiency.
SUBJECT 6: THE/THE PATIENT WITH PROBLEMS IN THE FUNCTIONS: CARDIOVASCULAR, CIRCULATORY And HAEMATOLOGICAL.	6.1 Cardiopathies, Valvulopatías, Pericardiopatías, Cardiac Insufficiency 6.2 Cardiopathy isquémica 6.3 Endocarditis. 6.4 Foundations of the Electrocardiograma (ECG) 6.5 Disorders of the rhythm 6.6 Hipertensión arterial 6.7 Anaemias 6.8 Leukaemias 6.9 Poliglobulina
