

## (\*)E. U. de Enfermaría (Povisa)

### (\*)ORGANIZACIÓN ACADEMICA

(\*)  
En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales ENFERMEROS.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que constantemente aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión ENFERMERA abarca los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas.

Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias medicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus CUATRO FUNCIONES : ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes. Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

- El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.
- El fomento de la aplicación práctica de los conceptos teóricos.
- Evaluación continuada del alumno por medio de tutorías.

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten. Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

### ORGANIZACIÓN CURSOS ACADÉMICOS

El plan de estudios de Grado tiene 240 CRÉDITOS ECTS distribuidos según tabla:

#### TIPO CREDITOS A CURSAR POR EL ALUMNO/A:OFERTA DEL CENTRO

Formación básica (FB) 60

Obligatorios 78

Optativos 12/ 24

Prácticas externas 78

TFG (Trabajo fin de grado) 12

**TOTAL 240**

#### DISTRIBUCIÓN MATERIAS CURSO/SEMESTRE :

MÓDULO	MATERIA	ASIGNATURA	ECTS	CARÁCTER (OBLIGATORIA/OPTATIVA)	CUATRIMESTRE	CURSO

		ATENCIÓN DE ENFERMERÍA EN EMERGENCIAS Y CATÁSTROFES	6	OPTATIVA	1º	4º

Las materias son cuatrimestrales finales.

El calendario de examenes , los horarios y las guías docentes de las asignaturas de cada curso, se rigen según normativa de la Universidad de Vigo en ellas podeis ver :

- ☐ Competencias de la materia
- ☐ Programa materia
- ☐ Planificación docente
- ☐ Metodología docente
- ☐ Tipos evaluación
- ☐ Bibliografía

#### (\*)PERSONAL DOCENTE

#### (\*)PERSONAL ACADÉMICO GENERAL E.U.ENFERMERÍA POVISA:

Será requisito ineludible para ser profesor/a de la Escuela tener la titulación requerida por la legislación vigente y obtener la

"**VENIA DOCENDI**" de la Universidad de Vigo para la materia o disciplina que vaya a desarrollar.

La "**VENIA DOCENDI**" será solicitada por la Escuela con carácter previo a la formalización de cualquier contrato de profesorado; tendrá el carácter de permanente, salvo revisión realizada a propuesta del Delegado de la Universidad.

La "**VENIA DOCENDI**" será otorgada por el Rector a petición de los respectivos centros adscritos y después del informe del delegado de la Universidad.

La "**VENIA DOCENDI**" constituye un requisito explícito por parte de la Universidad de Vigo de que cada profesorado de un centro adscrito cumple con los requisitos exigidos para la docencia en el centro y facultan, al mismo tiempo, para firmar las actas oficiales de calificación de los estudiantes.

El profesorado que no posea "**VENIA DOCENDI**" no podrá formar parte del cuadro de personal docente ni ejercer la docencia en un centro adscrito a la Universidad de Vigo.

La selección del personal docente e investigador de los centros adscritos se llevará a cabo respetando los principios de igualdad, mérito y capacidad de acuerdo con lo establecido en la legislación vigente.

El nombramiento y contratación del personal docente e investigador de los antedichos centros le corresponden al titular de los mismos, una vez que los candidatos propuestos soliciten de la Universidad de Vigo la "**VENIA DOCENDI**" correspondiente.

La figura de coordinador/a de curso, asegura la adecuada coordinación docente en el proceso de programación de la evaluación continuada de las materias en cada curso académico a través de reuniones de seguimiento y coordinación.

Esas reuniones de curso, arrancarán con una inicial, previa al comienzo de curso, en la que el coordinador planteará un calendario de actividades cuyo fin último es que no se produzcan solapamientos entre las distintas actividades que se proponen en las distintas guías docentes. Adicionalmente, esas reuniones iniciales servirán también para corregir la tendencia a incluir un excesivo número de actividades.

Se busca, por tanto, que la evaluación continuada se materialice en una distribución equilibrada de tareas a lo largo de todo el curso académico, apoyada en una programación racional de las materias. Para lograrlo, se dispondrán con cierta periodicidad reuniones de seguimiento y el coordinador del curso emitirá informes de seguimiento, destinados a mantener informados al Profesorado y Dirección sobre incidencias y eventos relevantes. Al finalizar el curso se celebrará una última reunión destinada a hacer balance y destacar posibles problemáticas a resolver para el siguiente curso.

### **RELACIÓN DE COORDINADORES CURSO ACADÉMICO:**

Coordinador **1º** Curso:

Vicente Suárez González

Coordinador **2º** Curso:

Esperanza Mª Giraldez Miranda

Coordinador **3º** Curso:

Alicia Muiños Álvarez

Coordinador **4º** Curso:

Alfonso Eduardo Maldonado Arroyo

Además, existen las figuras del coordinador/a de prácticas externas (de ser el caso) y del trabajo de fin de grado, que se encargarán de coordinar los distintos/as tutores/as.

La Escuela de Enfermería de POVISA establecerá reuniones periódicas con las escuelas ubicadas en Vigo que comparten centros de prácticas para facilitar la coordinación vertical entre cursos de las prácticas y el intercambio de experiencias.

Con ello se persigue analizar las distintas propuestas de mejora, establecer criterios básicos de evaluación y organizar actividades conjuntas que afecten a más de una materia, por citar algunos objetivos concretos.

En definitiva, el sistema de coordinación que se propone constituye un elemento fundamental en la introducción de los nuevos objetivos y metodologías y, sobre todo, servirá para profundizar en una mejor y mayor coordinación entre docentes y entre éstos y el Centro.

En un futuro, dado que la coordinación del conjunto de actividades resulta clave para el adecuado aprovechamiento del alumnado, se pretende continuar este diseño, adecuándolo a las nuevas exigencias y tratando de garantizar niveles satisfactorios de coordinación vertical y horizontal.

### **PERSONAL NO DOCENTE E.U.ENFERMERÍA POVISA:**

#### **PAS: PERSONAL DE ADMINISTRACIÓN Y SERVICIOS.**

- 1 Jefe de Servicios administrativos

- 1 oficial administrativo a tiempo completo.
- 1 auxiliar administrativo a tiempo completo

#### (\*)INFORMACIÓN ESTUDIANTES PRIMERO Y TRASLADOS

(\*)

#### ESCUELA UNIVERSITARIA DE ENFERMERÍA POVISA

#### INFORMACIÓN GENERAL.

La Escuela Universitaria de Enfermería de POVISA, adscrita a la Universidad de Vigo, nació oficialmente en el año 1991 bajo el patronazgo del HOSPITAL POVISA con la idea de desarrollar una función docente que consideraba adecuada y beneficiosa para un HOSPITAL de sus características, formando profesionales de Enfermería que cuando terminaran sus estudios, pudieran pasar a formar parte de la División de Enfermería del hospital.

Nuestra Escuela se rige por la Legislación Universitaria vigente, y por tanto, el Plan de Estudios está homologado y compartido por las otras E.U.E. adscritas a la Universidad de Vigo, la cual emite el título de Grado en Enfermería, lo que nos permite una comunicación fluida y facilita los posibilidades de traslados de estudiantes entre las Escuelas que en su momento pudieran surgir.

Las clases teóricas se imparten en las instalaciones en la calle Romil 75-77 y las prácticas se realizan en los distintos Departamentos, Servicios y Laboratorios del Hospital Povisa, y en hospitales de la red pública, así como en Centros de Salud y Residencias de la Tercera edad.

#### EQUIPO DIRECTIVO:

- **Director:** Alfonso García Suárez
- **Subdirectora:** M<sup>a</sup> Concepción Agras Suárez
- **Secretario:** Ángel Marcial Pérez

Además cada uno de los cursos del Grado tiene un tutor que será referente de los alumnos con respecto a temas relacionados con la docencia.

#### TUTOR 1º CURSO:

- **VICENTE SUÁREZ GONZÁLEZ** profesor de la materia **PSICOLOGÍA** de 1º curso

#### TUTOR 2º CURSO:

- **MARÍA GIRALDEZ MIRANDA** profesora de la materia **INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA** de 2º curso.

#### TUTOR 3º CURSO:

- **ALICIA MUIÑOS ALVAREZ** profesora de la materia **ENFERMERIA CLINICA III** de 3º curso.

#### TUTOR 4º CURSO:

- **EDUARDO MALDONADO ARROYO** profesor de la materia de **TFG** de 4º curso.

#### PLAN DE ESTUDIOS

En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales **ENFERMEROS**.

**ENFERMERÍA** es hoy en día una disciplina compleja del área de salud, con un gran impacto social que, constantemente, aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión **ENFERMERA** abarca **los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e**

**incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas. Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.**

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias médicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus **CUATRO FUNCIONES: ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA** que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes.

Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

□*El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.*

□*El fomento de la aplicación práctica de los conceptos teóricos.*

□*Evaluación continuada del alumno por medio de tutorías.*

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten.

Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

## **ORGANIZACIÓN CURSOS ACADÉMICOS**

- INGLÉS TÉCNICO 6 ECTS, 2º Semestre , FORMACIÓN BÁSICA

### **SEGUNDO CURSO**

- INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA 6 ECTS ,1º Semestre, FORMACIÓN BÁSICA
- ÉTICA Y LEGISLACIÓN 6 ECTS, 1º Semestre ,OBLIGATORIO

- FARMACOLOGÍA Y DIETETICA 9 ECTS, 1º Semestre, FORMACIÓN BÁSICA
- ENFERMERÍA CLÍNICA I 9 ECTS, 1º Semestre ,OBLIGATORIO
- ENFERMERÍA CLÍNICA II 6 ECTS, 2º Semestre, OBLIGATORIO
- ENFERMERÍA COMUNITARIA II 9 ECTS, 2º Semestre, OBLIGATORIO
- GESTIÓN DE ENFERMERÍA 6 ECTS, 2º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS I 9 ECTS, 2º Semestre, OBLIGATORIO

### **TERCER CURSO**

- ENFERMERÍA CLÍNICA III 6 ECTS , 1º Semestre, OBLIGATORIO
- ENFERMERÍA MATERNO INFANTIL 9 ECTS ,1º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS II 15 ECTS , 1º Semestre, OBLIGATORIO
- ENFERMERÍA GERIÁTRICA Y CUIDADOS PALIATIVOS 6 ECTS ,2º Semestre, OBLIGATORIO
- ENFERMERÍA EN SALUD MENTAL 6 ECTS, 2º Semestre, OBLIGATORIO
- PRACTICAS CLINICAS III 18 ECTS, 2º Semestre, OBLIGATORIO

### **CUARTO CURSO**

- OPTATIVA I 6 ECTS, 1º Semestre, OPTATIVO
- OPTATIVA II 6 ECTS, 1º Semestre, OPTATIVO
- PRACTICAS CLÍNICAS IV 18 ECTS, 1º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS V 18 ECTS ,2º Semestre, OBLIGATORIO
- TRABAJO FIN DE GRADO 12 ECTS, 2º Semestre ,OBLIGATORIO

Las materias son cuatrimestrales finales.

El calendario de exámenes se rige según normativa de la Universidad de Vigo, (**se adjunta**).

Tenéis a vuestra disposición en la página de la EUU POVISA [www.cepovisa.com](http://www.cepovisa.com) un enlace con la Universidad de Vigo para la visualización de las guías docentes de las asignaturas de cada curso:

En ellas podéis ver:

- Competencias de la materia
- Programa materia
- Planificación docente
- Metodología docente
- Tipos evaluación
- Bibliografía

**NORMAS GENERALES:**

La asistencia a clases se rige por normativa de la Universidad de Vigo.

Durante la asistencia y permanencia en las instalaciones del Centro:

- No está permitido fumar ni utilizar telefonía móvil.
- No está permitido utilizar el ascensor destinados a estudiantes y profesores con problemas de movilidad física.
- Podrá utilizarse la biblioteca del Centro, así como las aulas destinadas a los trabajos de grupo que están en el semisótano.
- Es imprescindible cuidar el aspecto personal, aseo y las formas de convivencia básicas así como las instalaciones que debemos mantener para que puedan ser utilizadas adecuadamente por todos.

**Competencies**

## Code

A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
A4	Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
A5	Students have developed those skills needed to undertake further studies with a high degree of autonomy.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B8	To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
C28	To know adult health alterations, identifying manifestations appearing in different phases
C29	To identify care needs arising from health problems.
C30	To analyze collected data in the assessment, prioritize the problems of the adult patient, establish and execute care plan and its assessment.
C32	To select interventions to treat or prevent deviations from health-related problems.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D7	Critical reasoning.
D8	Autonomous learning.

**Learning outcomes**

General description	The matter consists of two very differentiated parts: The maternal infirmary that occupies of the *atención a the woman and mother; and the childish infirmary whose aim is the boy in his different evolutionary stages until the adulthood.  Like general aims, the student, when finalising the *asignatura will be able of: - Obtain knowledges and necessary skills on appearances of cares of technicians of maternal infirmary-childish, that allow *capacitarlo to develop practises it nurse of an ideal form - loan integral cares so much to the woman as to the boy, from his *nacimiento until the adolescence, in the different levels of attention of health: promotion, prevention, recovery and rehabilitation. Taking into account his individuality and, the familiar context and partner-environmental in which they manage - Develop a critical spirit *investigador in the *área of the maternal infirmary-childish, that allow him enrich his development and training.			

**Competencies**

## Code

- A1 Students have demonstrated knowledge and understanding in an area of study that comes from the basis of the general secondary education, and it is often found at a level that, if well supported on advanced text books, it also includes some aspects that involve knowledge from the forefront of their field of study.
- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A4 Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
- A5 Students have developed those skills needed to undertake further studies with a high degree of autonomy.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B4 To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
- B5 To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B8 To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B10 To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- C34 To identify the characteristics of women at different stages of the reproductive cycle, the climacteric and the alterations that may appear, providing the necessary care at each stage.
- C35 To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
- C36 To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
- C37 To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.

C38 To apply techniques that integrate nursing care, establishing a therapeutic relationship with children and their caregivers

C39 To select interventions aimed to healthy and ill children, as well as those derived from diagnosis and treatment methods.

C40 To be able to provide training and information for health to parents or primary caregivers.

D1 Analysis and synthesis ability

D2 Organization and planning ability

D3 Information management ability.

D4 Problem solving and decision making.

D5 Multidisciplinary and multilingual teamwork

D6 Skills in interpersonal relationships

D7 Critical reasoning.

D8 Autonomous learning.

D9 Adaptation to new situations. Initiative and entrepreneurial spirit. Creativity

## Learning outcomes

## Contents

Topic

1.-Anatomical memory of the female genital tract	1.1- Characteristic anatomical 1.2- Half of clamping, vascularization and innervation.
2.- Feminine genital cycle.	2.1- Ovulation 2.2- Menstruation
3.- Puberty and climacteric	3.1- Definition 3.2- Diagnostic 3.3- Treatment
4.- Diagnose of the pregnancy.	4.1- Physiological and psychological modifications of the pregnant woman
5.- Prenatal controls	5.1- Perinatal infection
6.- Dietary and hygiene advice in the pregnant woman.	6.1- maternal Education
7.-Main medical problems that they can arise in the pregnant woman.	7.1- Pathology medical and surgical in pregnant woman
8.- Main problems that affect to the fetal development	8.1- premature Childbirth 8.2- Detachment premature of placenta 8.3- previous Placenta 8.4- IRG 8.5- prolonged Pregnancy
9.- Childbirth	9.1- Start 9.2- Definition 9.3- Causes 9.4- Periods
10.- Follow-up of the labouring woman during the phases of childbirth.	10.1- Obstetric Interventions. Cares of infirmary

11.- Workshop: Taking of vaginal samples	11.1- Characteristic of the cervix 11.2- Requirements for the taking 11.3- Technical of the taking 11.4- Colposcopy
12.- Breastfeeding	12.1- Physiology 12.2- Problems but frequent.
13.- Taken care of infirmary in the puerperium.	13.1- Puerperal Infection
14.- Abortion.	14.1- Ectopic Pregnancy 14.2- *Mola
15.- Family Planning	15.1- History 15.2- Advice 15.3- Methods
16.- Menstrual Disorders	16.1- Amenorrhoea 16.2- abnormal uterine Bleedings 16.3- Dysmenorrhea
17.- Gynecological infections	17.1- I Diagnose and treatment
18.- Gynecological tumors	18.1- Definition 18.2- Diagnostic 18.3- Staging 18.4- Treatment
19.- The child. Pediatrics and childcare	19.1- Concepts and evolution 19.2- social Appearances 19.3- child Health in Spain
20.- The recently born	20.1- Characteristic 20.2- Assessment and attentions 20.3- preventive Measures 20.4- neonatal Problems
21.- Infant feeding	21.1- Breastfeeding, artificial feeding and mixed 21.2- complementary Feeding 21.3- Feeding after one year old
22.- High-risk neonate	22.1- preterm 22.2- low weight for his G.A. 22.3- immature 22.4- postage newborn
23.- Psychosocial appearances: child Education.	23.1- Education techniques and educational errors 23.2- The familiar environment 23.3 The game and the TV
24.- Services of child health.	24.1- child Maltreatment
25.- Childish hospitalisation	25.1- Preparation for the hospitalisation 25.2- Reaction of the boy and his parents in front of the illness and hospitalisation. 25.3- Assistance to the ill boy 25.4- Particularities of the child hospitalisation
26.- Principles of surgical infirmary	26.1- Cares preoperatives and postoperatives 26.2- Accidents in the infancy
27.- Nutrition and nutrients.	27.1- nervous Anorexia and false anorexia 27.2- Obesity and his factors 27.3- special Diets
28.- Metabolism of the water. Water-electrolyte equilibrium.	28.1- Dehydration: Types and treatment 28.2- Acid-base balance. 28.3- Acidosis and alkalosis and, his mechanisms of compensation
30.- Genetic medical.	30.1- congenital and hereditary Illnesses 30.2- congenital Errors of the metabolism
31.- Common childhood illnesses by devices and systems	31.1- endocrine System 31.2- Nervous system 31.3- Psychopathology. Mental retardation. Test of sicomotor development 31.4- Sense organs: vision and audition 31.5- digestive Device 31.6- Cardio-vascular diseases 31.7- Hematology 31.8- Injuries of the skin: Exanthematous diseases. Burns. 31.9- Genitourinary system 31.10- Osteo-articulate system

**Competencies**

## Code

- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A5 Students have developed those skills needed to undertake further studies with a high degree of autonomy.
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B4 To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B10 To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- B12 To apply the ethical and deontological code of Spanish nursing, understanding the ethical implications of health in a world in transformation.
- B13 To apply the principles of health and socio-health financing and use properly the available resources
- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B16 To be able to use health information systems.
- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- C4 Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
- C8 To apply the technologies and information systems and communication of health care
- C11 To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
- C12 To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.
- C17 To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
- C18 To know and apply the principles underlying the comprehensive nursing care
- C19 To lead, assess and provide comprehensive nursing care, to individual, family and community.
- C22 To promote the involvement of individual, groups and family in their health-disease process.

C23 To identify factors related to health and environment issues, to assist people in situations of health and disease as members of a community.
C24 To identify and analyze the influence of internal and external factors in the level of health of individual and groups.
C25 To apply methods and procedures in its scope to identify the most important health problems in a community.
C26 To analyze statistical data related to population studies, identifying possible causes of health problems.
C29 To identify care needs arising from health problems.
C31 To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
C33 To have cooperative attitude with the different members of the team.
C35 To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
C36 To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
C37 To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.
C42 To identify structural, functional, psychological and life forms changes, associated with the aging process
C44 To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
C49 To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
C50 To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
D2 Organization and planning ability
D3 Information management ability.
D4 Problem solving and decision making.
D5 Multidisciplinary and multilingual teamwork
D6 Skills in interpersonal relationships
D7 Critical reasoning.
D8 Autonomous learning.
D11 Sensitivity towards environmental issues.

## Contents

### Topic

Rotatory of practical \*preprofesionales that allow the application and the acquisition of competitions and of the theoretical and methodological knowledges of the Infirmary to the clinical practice, in centres \*asistenciales, \*sociosanitarios and hospitals.

Realisation of the activities referred to the periods of clinical practices in the corresponding services \*asistenciales, applying taken care of basic and specific infirmary, according to individual needs of each patient, as well as technical and procedures.

Realisation \*portafolios in each period.

## Planning

	Class hours	Hours outside the classroom	Total hours
Teaching and/or informatives events	4	8	12
Introductory activities	4	3	7
Case studies / analysis of situations	8	8	16
Clinical practice	224	112	336
Reports / memories of practice	0	2	2
Portfolio / dossier	0	2	2

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

	Description
Teaching and/or informatives events	Conferences, talks, exhibitions, round tables, debates... Realised by *ponentes of prestige, that allow to deepen or complement the contents of the matter.
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the matter.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, *reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.
Clinical practice	The student develops the activities in a context related with the exercise of the profession in the area of Sciences of the Health.

## Personalized attention

Methodologies	Description
Clinical practice	The manager of the service will realise follow-up of the evolution of the student in the unroll of his activity and will resolve the possible incidents that can arise.
Case studies / analysis of situations	They will pose questions on the follow-up of a patient or clinical evolution of the same.
Tests	Description
Reports / memories of practice	The first week will inform on his *cumplimentación, insisting in the importance of his personal assessment on the fulfillment of aims, relation with the professional team, patient and families, like this how has been his global assessment of the period developed.

Portfolio / dossier	The first week will explain to the student his *cumplimentación; in him it will reflect the register of the daily activities that the/the student realises or observes daily, as well as the degree of difficulty of the same according to his perception.
---------------------	--

## Assessment

	Description	Qualification	Training and Learning Results
Clinical practice	Continuous evaluation by part of the tutor/to corresponding to identify particular needs of the student (25%) and of the professional / team of the service (70%), valuing the acquisition of the competencies assigned, following the *modelola established, that structures in: practical theoretical/knowledges, attitudes, skills and fulfillment of the norms.	95	B1 C4 D5 B3 C11 D6 B6 C12 B11 C17 B13 C18 B15 C19 C24 C29 C31 C33 C35 C36 C42
Reports / memories of practice	Report of the student in which it includes fulfillment of aims, relation with the professional team, patient and family and global assessment of his rotation in the service assigned.	2.5	B7 D3 D5 D6 D8
Portfolio / dossier	Document filled by the student that reflects his perception on the degree of difficulty or observation of the different activities and technical.	2.5	C4 C8 C11 C12 C17 C22 C31 C33 C49

## Other comments on the Evaluation

In case that the/the student do not deliver, in time and forms the \*portfolios and the memory of practices, \*repercuteirá negatively in the note, subtracting &nbsp;a 5 % of the qualification &nbsp;of the corresponding period.&nbsp;To&nbsp;the clinical practices II are linked two periods, will be necessary to reach a minimum qualification of four points on ten in each one of the evaluations, to be able to opt to the approved. In units of hospitalisation and centre \*sociosanitarios, will realise Plans of Attention of Infirmary, that will evaluate inside 25% corresponding to the tutor/to (10 % \*PAES).The faults of assistance no justified will suppose the suspense and the immediate interruption of the period, whereas if it treats of faults justified will allow a maximum of 4, that will be of compulsory recovery in the period established for such end by the manager of the \*asignatura.

Web	<a href="http://www.cepovisa.com">http://www.cepovisa.com</a>		
General description	The subject of "Geriatric Infirmary and palliative cares" treats to provide to the student the knowledge of the modifications that produce in the individual with the age, since aspects no alone *bio-physiological and functional but also partner-economic that have in this group of population a signification of sum importance and transcendence, treats equally of the taken care that owe to mete out to the elderly healthy and ill, as well as of the suitable attitude when meting out the *devanditos cares. Also *engloba the palliative cares since the personal perspective, social and familiar and boarding the cares that mete out in the *devandita situation.		

This subject imparts in the third course of the Degree of Infirmary, and is a subject \*cuatrimestral.

## **Competencies**

### **Code**

- A1 Students have demonstrated knowledge and understanding in an area of study that comes from the basis of the general secondary education, and it is often found at a level that, if well supported on advanced text books, it also includes some aspects that involve knowledge from the forefront of their field of study.
- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A4 Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
- A5 Students have developed those skills needed to undertake further studies with a high degree of autonomy.
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B5 To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- B14 To establish mechanics of evaluation, taking into account the scientific, technical and quality aspects
- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B18 To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
- C8 To apply the technologies and information systems and communication of health care
- C41 To understand changes associated with the aging process and its impact on health.
- C42 To identify structural, functional, psychological and life forms changes, associated with the aging process
- C43 To know the most common health problems in elderly.

C44	To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
C49	To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
C52	To know palliative care and pain control to provide care that soothe the situation of patients in advanced or terminal illness situation.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork
D6	Skills in interpersonal relationships
D7	Critical reasoning.
D8	Autonomous learning.
D9	Adaptation to new situations. Initiative and entrepreneurial spirit. Creativity
D10	Motivation for the quality.
D11	Sensitivity towards environmental issues.

### Methodologies

	Description
Troubleshooting and / or exercises	Activity in the that formulate problems and/or exercises related with the subject. The student owes to develop the suitable or correct solutions by means of it practice of routines, the application of formulas or algorithms, the application of procedures of transformation of the available information and the interpretation of the resulted. It usually employ how supplement of the lesson masterly.
Case studies / analysis of situations	Analysis of a done, problem or real event with the aim to know it, interpreted, resolved, generate hypothesis, contrast data, reflect, complete knowledges, diagnosed and trained in alternative procedures of solution.
Tutored works	The student, of individual way or in group, elaborates a document envelope to thematic of the subject or prepares seminars, investigations, memories, essays, summaries of readings, conferences, etc. Generally it treats of an autonomous activity of the student that includes the research and collected of information, reading and handle of bibliography, editorial... Student that includes the research and collected of information, reading and handle of bibliography, editorial...
Forum Index	Forums in the that It is proposed the student that think on different concepts of the subject. And in the that the students deepen owes reflexions and think of assertive form envelope the vision of the rest of the mates.
Proceedings	Activities group, in the that the students expose the their ideas and argues them envelope a subject related that subject. Of the same form listen other ideas and argues so as to have different view and therefore it enrich his field of knowledges. The debate will be moderate pole professor to guide and drive the debate inside the field professional.
Seminars	Exhibition by part of the professor of one fear related with the subject and that supplements and enriches the knowledge of the students in relation with the field of the Geriatric Nursing.

Master Session	Exhibition by part of the professor of the contained envelope to subject object of study, theoretical bases and/or guidelines of one work, exercise or project to develop pole student.
----------------	---

### Personalized attention

Methodologies	Description
Troubleshooting and / or exercises	The student will owe to resolve exercises proposed that they remitted by mail electronic and that will serve even to keep a discussion *có @docente no that *reflexionará on concepts keys of this *asignatura. Also it will owe to calculate extracting data of the different INE *índices *y *tasas related with the aging in Spain
Case studies / analysis of situations	The student owed to resolve different cases proposed pole professor in group and of individual form related that subjects (determine the cares *más suitable in different clinical situations that manifests in *Xeriatría, know apply scales of *valotrcion of the AVD and envelope the Cognitive state etc)
Tutored works	The student *desenrolará in the kind in group being *tutorizará teaching pole, diverse exercises on active aging, organisation of the taken care in of geriatric centres, etc.
Forum Index	They will establish different forums of discussion, on important concepts in *xeriatría *incluido the field of the taken care palliative

### Assessment

	Description	Qualification	Training and Learning Results			
Troubleshooting and / Proof in which the student has to solve a series of problems and/or exercises	Proof in which the student has to solve a series of problems and/or exercises in a time/condition established/the by the professor. Of this way, the student has to apply the knowledges that purchased.	11	A1	B3	C42	D2
			A5	B14	C43	D3
					D4	D8

### Contents

Topic	
Rotatory of practical *preprofesionals that allow the application and the acquisition of competencies and of the theoretical and methodological knowledges of the Infirmary to the clinical practice, in centres of Primary and Skilled Attention	Realisation of the activities referred to the periods of clinical practices in the corresponding services *asistenciales, applying taken care of basic and specific infirmary, according to individual needs of each patient, as well as technical and procedures. Realisation of *portfolios in each period.

### Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	4	4	8

Teaching and/or informatives events	8	0	8
Case studies / analysis of situations	8	2	10
Clinical practice	280	140	420
Reports / memories of internships or practicum	0	2	2
Portfolio / dossier	0	2	2

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

### Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the matter.
Teaching and/or informatives events	Conferences, talks, exhibitions, round tables, debates... Realised by *ponentes of prestige, that allow *afondar or complement the contents of the matter. Clinical sessions
Case studies / analysis of situations	They will pose questions on the follow-up of a patient or clinical evolution of the same
Clinical practice	The student will develop his activity in a context related with the exercise of a profession in the area of Sciences of the Health, inside the field *sociosanitario of Skilled and Primary Attention.

### Personalized attention

Methodologies	Description
Introductory activities	Of previous form to the location in the service of destination, the responsible professor of the service, will expose to the student the characteristics of the same, typology of patients, as well as the valid rule and the system of evaluation.
Clinical practice	The manager of the service will realise follow-up of the evolution of the student in the development of his activity and will resolve the possible incidents that can arise.
Case studies / analysis of situations	They will pose questions on the follow-up of a patient or clinical evolution of the same
Tests	Description
Reports / memories of internships or practicum	The first week, will explain to the student the form of *cumplimentación, insisting in the importance of his personal assessment on the fill of aims, relation with the professional team and with the patient and family as well as his experiences and global assessment.
Portfolio / dossier	The first week will explain to the student forms of *cumplimentación, in him will reflect the register of the daily activities that the student realises or observes daily, as well as the degree of difficulty of the same.

### Assessment

	Description	Qualification	Training and Learning Results			
Clinical practice	Continuous evaluation by part of the tutor/to corresponding to identify particular needs of the student (25%) and of the professional / team of the service (70%), valuing the acquisition of the competencies assigned, following the *modelola established, that structures in: practical theoretical/knowledges, attitudes, skills and fulfillment of the norms.	95	A2	B1	C4	D2
			B2	C8	D3
