

## (\*)E. U. de Enfermaría (Povisa)

### (\*)ORGANIZACIÓN ACADEMICA

(\*)  
En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales ENFERMEROS.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que constantemente aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión ENFERMERA abarca los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas.

Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias medicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus CUATRO FUNCIONES : ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes. Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

- El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.
- El fomento de la aplicación práctica de los conceptos teóricos.
- Evaluación continuada del alumno por medio de tutorías.

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten. Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

### ORGANIZACIÓN CURSOS ACADÉMICOS

El plan de estudios de Grado tiene 240 CRÉDITOS ECTS distribuidos según tabla:

#### TIPO CREDITOS A CURSAR POR EL ALUMNO/A:OFERTA DEL CENTRO

Formación básica (FB) 60

Obligatorios 78

Optativos 12/ 24

Prácticas externas 78

TFG (Trabajo fin de grado) 12

**TOTAL 240**

#### (\*)PERSONAL DOCENTE

#### (\*)PERSONAL ACADÉMICO GENERAL E.U.ENFERMERÍA POVISA:

Será requisito ineludible para ser profesor/a de la Escuela tener la titulación requerida por la legislación vigente y obtener la

"**VENIA DOCENDI**" de la Universidad de Vigo para la materia o disciplina que vaya a desarrollar.

La "**VENIA DOCENDI**" será solicitada por la Escuela con carácter previo a la formalización de cualquier contrato de profesorado; tendrá el carácter de permanente, salvo revisión realizada a propuesta del Delegado de la Universidad.

La "**VENIA DOCENDI**" será otorgada por el Rector a petición de los respectivos centros adscritos y después del informe del delegado de la Universidad.

La "**VENIA DOCENDI**" constituye un requisito explícito por parte de la Universidad de Vigo de que cada profesorado de un centro adscrito cumple con los requisitos exigidos para la docencia en el centro y facultan, al mismo tiempo, para firmar las actas oficiales de calificación de los estudiantes.

El profesorado que no posea "**VENIA DOCENDI**" no podrá formar parte del cuadro de personal docente ni ejercer la docencia en un centro adscrito a la Universidad de Vigo.

La selección del personal docente e investigador de los centros adscritos se llevará a cabo respetando los principios de igualdad, mérito y capacidad de acuerdo con lo establecido en la legislación vigente.

El nombramiento y contratación del personal docente e investigador de los antedichos centros le corresponden al titular de los mismos, una vez que los candidatos propuestos soliciten de la Universidad de Vigo la "**VENIA DOCENDI**" correspondiente.

La figura de coordinador/a de curso, asegura la adecuada coordinación docente en el proceso de programación de la evaluación continuada de las materias en cada curso académico a través de reuniones de seguimiento y coordinación.

Esas reuniones de curso, arrancarán con una inicial, previa al comienzo de curso, en la que el coordinador planteará un calendario de actividades cuyo fin último es que no se produzcan solapamientos entre las distintas actividades que se proponen en las distintas guías docentes. Adicionalmente, esas reuniones iniciales servirán también para corregir la tendencia a incluir un excesivo número de actividades.

Se busca, por tanto, que la evaluación continuada se materialice en una distribución equilibrada de tareas a lo largo de todo el curso académico, apoyada en una programación racional de las materias. Para lograrlo, se dispondrán con cierta periodicidad reuniones de seguimiento y el coordinador del curso emitirá informes de seguimiento, destinados a mantener informados al Profesorado y Dirección sobre incidencias y eventos relevantes. Al finalizar el curso se celebrará una última reunión destinada a hacer balance y destacar posibles problemáticas a resolver para el siguiente curso.

### **RELACIÓN DE COORDINADORES CURSO ACADÉMICO:**

Coordinador **1º** Curso:

Vicente Suárez González

Coordinador **2º** Curso:

Esperanza Mª Giraldez Miranda

Coordinador **3º** Curso:

Alicia Muiños Álvarez

Coordinador **4º** Curso:

Alfonso Eduardo Maldonado Arroyo

Además, existen las figuras del coordinador/a de prácticas externas (de ser el caso) y del trabajo de fin de grado, que se encargarán de coordinar los distintos/as tutores/as.

La Escuela de Enfermería de POVISA establecerá reuniones periódicas con las escuelas ubicadas en Vigo que comparten centros de prácticas para facilitar la coordinación vertical entre cursos de las prácticas y el intercambio de experiencias.

Con ello se persigue analizar las distintas propuestas de mejora, establecer criterios básicos de evaluación y organizar actividades conjuntas que afecten a más de una materia, por citar algunos objetivos concretos.

En definitiva, el sistema de coordinación que se propone constituye un elemento fundamental en la introducción de los nuevos objetivos y metodologías y, sobre todo, servirá para profundizar en una mejor y mayor coordinación entre docentes y entre éstos y el Centro.

En un futuro, dado que la coordinación del conjunto de actividades resulta clave para el adecuado aprovechamiento del alumnado, se pretende continuar este diseño, adecuándolo a las nuevas exigencias y tratando de garantizar niveles satisfactorios de coordinación vertical y horizontal.

### **PERSONAL NO DOCENTE E.U.ENFERMERÍA POVISA:**

#### **PAS: PERSONAL DE ADMINISTRACIÓN Y SERVICIOS.**

- 1 Jefe de Servicios administrativos

- 1 oficial administrativo a tiempo completo.
- 1 auxiliar administrativo a tiempo completo

## (\*INFORMACIÓN ESTUDIANTES PRIMERO Y TRASLADOS

(\*)

### ESCUELA UNIVERSITARIA DE ENFERMERÍA POVISA

#### INFORMACIÓN GENERAL.

La Escuela Universitaria de Enfermería de POVISA, adscrita a la Universidad de Vigo, nació oficialmente en el año 1991 bajo el patronazgo del HOSPITAL POVISA con la idea de desarrollar una función docente que consideraba adecuada y beneficiosa para un HOSPITAL de sus características, formando profesionales de Enfermería que cuando terminaran sus estudios, pudieran pasar a formar parte de la División de Enfermería del hospital.

Nuestra Escuela se rige por la Legislación Universitaria vigente, y por tanto, el Plan de Estudios está homologado y compartido por las otras E.U.E. adscritas a la Universidad de Vigo, la cual emite el título de Grado en Enfermería, lo que nos permite una comunicación fluida y facilita los posibilidades de traslados de estudiantes entre las Escuelas que en su momento pudieran surgir.

Las clases teóricas se imparten en las instalaciones en la calle Romil 75-77 y las prácticas se realizan en los distintos Departamentos, Servicios y Laboratorios del Hospital Povisa, y en hospitales de la red pública, así como en Centros de Salud y Residencias de la Tercera edad.

#### EQUIPO DIRECTIVO:

- **Director:** Alfonso García Suárez
- **Subdirectora:** M<sup>a</sup> Concepción Agras Suárez
- **Secretario:** Ángel Marcial Pérez

Además cada uno de los cursos del Grado tiene un tutor que será referente de los alumnos con respecto a temas relacionados con la docencia.

#### TUTOR 1º CURSO:

- **VICENTE SUÁREZ GONZÁLEZ** profesor de la materia **PSICOLOGÍA** de 1º curso

#### TUTOR 2º CURSO:

- **MARÍA GIRALDEZ MIRANDA** profesora de la materia **INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA** de 2º curso.

#### TUTOR 3º CURSO:

- **ALICIA MUIÑOS ALVAREZ** profesora de la materia **ENFERMERIA CLINICA III** de 3º curso.

#### TUTOR 4º CURSO:

- **EDUARDO MALDONADO ARROYO** profesor de la materia de **TFG** de 4º curso.

#### PLAN DE ESTUDIOS

En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales **ENFERMEROS**.

**ENFERMERÍA** es hoy en día una disciplina compleja del área de salud, con un gran impacto social que, constantemente, aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión **ENFERMERA** abarca **los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e**

**incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas. Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.**

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias médicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus **CUATRO FUNCIONES: ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA** que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes.

Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

□*El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.*

□*El fomento de la aplicación práctica de los conceptos teóricos.*

□*Evaluación continuada del alumno por medio de tutorías.*

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten.

Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

## **ORGANIZACIÓN CURSOS ACADÉMICOS**

El plan de estudios de Grado tiene **240 CRÉDITOS ECTS** distribuidos según tabla:

### **TIPO CRÉDITOS A CURSAR POR EL ALUMNO/A OFERTA DEL CENTRO**

Formación básica (FB) 60, Obligatorios 78, Optativos 12, Prácticas externas 78, TFG (Trabajo fin de grado) 12 .**TOTAL 240.**

### **PRIMER CURSO**

- ANATOMÍA HUMANA 9 ECTS , 1º Semestre ,FORMACIÓN BÁSICA
- PSICOLOGÍA 9 ECTS , 1º Semestre, FORMACIÓN BÁSICA
- BIOQUÍMICA 6 ECTS, 1º Semestre ,FORMACIÓN BÁSICA
- ENFERMERÍA COMUNITARIA I 6 ECTS, 1º Semestre, OBLIGATORIO
- FISIOLOGÍA 9 ECTS , 2º Semestre, FORMACIÓN BÁSICA
- ESTADÍSTICA 6 ECTS, 2º Semestre, FORMACIÓN BÁSICA
- FUNDAMENTOS DE ENFERMERÍA 9 ECTS, 2º Semestre, OBLIGATORIO
- INGLÉS TÉCNICO 6 ECTS, 2º Semestre , FORMACIÓN BÁSICA

### **SEGUNDO CURSO**

- INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA 6 ECTS ,1º Semestre, FORMACIÓN BÁSICA
- ÉTICA Y LEGISLACIÓN 6 ECTS, 1º Semestre ,OBLIGATORIO

- FARMACOLOGÍA Y DIETETICA 9 ECTS, 1º Semestre, FORMACIÓN BÁSICA
- ENFERMERÍA CLÍNICA I 9 ECTS, 1º Semestre ,OBLIGATORIO
- ENFERMERÍA CLÍNICA II 6 ECTS, 2º Semestre, OBLIGATORIO
- ENFERMERÍA COMUNITARIA II 9 ECTS, 2º Semestre, OBLIGATORIO
- GESTIÓN DE ENFERMERÍA 6 ECTS, 2º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS I 9 ECTS, 2º Semestre, OBLIGATORIO

### **TERCER CURSO**

- ENFERMERÍA CLÍNICA III 6 ECTS , 1º Semestre, OBLIGATORIO
- ENFERMERÍA MATERNO INFANTIL 9 ECTS ,1º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS II 15 ECTS , 1º Semestre, OBLIGATORIO
- ENFERMERÍA GERIÁTRICA Y CUIDADOS PALIATIVOS 6 ECTS ,2º Semestre, OBLIGATORIO
- ENFERMERÍA EN SALUD MENTAL 6 ECTS, 2º Semestre, OBLIGATORIO
- PRACTICAS CLINICAS III 18 ECTS, 2º Semestre, OBLIGATORIO

### **CUARTO CURSO**

- OPTATIVA I 6 ECTS, 1º Semestre, OPTATIVO
- OPTATIVA II 6 ECTS, 1º Semestre, OPTATIVO
- PRACTICAS CLÍNICAS IV 18 ECTS, 1º Semestre, OBLIGATORIO
- PRACTICAS CLÍNICAS V 18 ECTS ,2º Semestre, OBLIGATORIO
- TRABAJO FIN DE GRADO 12 ECTS, 2º Semestre ,OBLIGATORIO

Las materias son cuatrimestrales finales.

El calendario de exámenes se rige según normativa de la Universidad de Vigo, (**se adjunta**).

Tenéis a vuestra disposición en la página de la EUU POVISA [www.cepovisa.com](http://www.cepovisa.com) un enlace con la Universidad de Vigo para la visualización de las guías docentes de las asignaturas de cada curso:

En ellas podéis ver:

- Competencias de la materia
- Programa materia
- Planificación docente
- Metodología docente
- Tipos evaluación
- Bibliografía

**NORMAS GENERALES:**

La asistencia a clases se rige por normativa de la Universidad de Vigo.

Durante la asistencia y permanencia en las instalaciones del Centro:

- No está permitido fumar ni utilizar telefonía móvil.
- No está permitido utilizar el ascensor destinados a estudiantes y profesores con problemas de movilidad física.
- Podrá utilizarse la biblioteca del Centro, así como las aulas destinadas a los trabajos de grupo que están en el semisótano.
- Es imprescindible cuidar el aspecto personal, aseo y las formas de convivencia básicas así como las instalaciones que debemos mantener para que puedan ser utilizadas adecuadamente por todos.

**Competencies**

## Code

- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A4 Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B4 To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B8 To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B10 To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- B12 To apply the ethical and deontological code of Spanish nursing, understanding the ethical implications of health in a world in transformation.
- B13 To apply the principles of health and socio-health financing and use properly the available resources
- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B16 To be able to use health information systems.
- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- B18 To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
- C4 Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
- C8 To apply the technologies and information systems and communication of health care
- C10 To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
- C11 To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
- C12 To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.

C13 To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
C17 To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
C18 To know and apply the principles underlying the comprehensive nursing care
C29 To identify care needs arising from health problems.
C31 To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
C33 To have cooperative attitude with the different members of the team.
C35 To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
C36 To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
C37 To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.
C42 To identify structural, functional, psychological and life forms changes, associated with the aging process
C44 To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
C49 To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
C50 To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
D1 Analysis and synthesis ability
D2 Organization and planning ability
D3 Information management ability.
D4 Problem solving and decision making.
D5 Multidisciplinary and multilingual teamwork
D6 Skills in interpersonal relationships
D7 Critical reasoning.
D8 Autonomous learning.
D10 Motivation for the quality.
D11 Sensitivity towards environmental issues.

Case studies / analysis of situations	12	24	36
Teaching and/or informatives events	0	6	6
Clinical practice	360	36	396
Reports / memories of practice	0	3	3
Portfolio / dossier	0	6	6

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the matter.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, *reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution. That student assigned/to to hospitalisation will have to carry out to preparation of four plans of cares.
Teaching and/or informatives events	The/the student will be able to assist of voluntary form to the educational events programmed linked to his service assigned during the period of practices, previous permission of the manager of the service and information to the tutor/the.
Clinical practice	The/the student will develop the activities in a context related with the exercise of a profession in the area of Sciences of the Health.

## Personalized attention

Methodologies	Description
Clinical practice	The student develops the activities in a context related with the exercise of a profession in the area of Sciences of the Health.
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the *asignatura.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, *reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.

## Tests

Tests	Description
-------	-------------

Reports / memories of practice	The first day will explain to the student the way to fill, insisting in the importance of his personal assessment on the fulfillment of aims, relation with the professional team, relation with the patient and family and in which it will reflect his experiences and global assessment.
Portfolio / dossier	The first day will explain to the student the way to fill, in him will reflect the register of the daily activities that the/the student realises or observes daily, as well as the degree of difficulty of the same.

## Assessment

Description		Qualification Training and Learning Results				
Clinical practice	Evaluation of the competitions that purchases and shows it/the student during it *desenrolo of the his practices in centres *asistenciais. It Will evaluate: theoretical Knowledges-practical, Attitudes, Skills, Fulfilment of the norms.	95	A2 A4	B1 B3 B6 B10 B11 B13 B15 B16 B17 B18	C4 C8 C11 C12 C13 C17 C18 C31 C33 C35 C36 C37	D1 D2 D3 D4 D5 D6 D7 D8
Reports / memories of practice	It Will evaluate the resolution of one marry clinical proposed pole *titor/it.	2.5	A3 A4	B11 B13 B16	C4 C8 C35 C36 C37	D1 D2 D3 D5 D6 D7 D8
Portfolio / dossier	IT/the student will present when finalizing the *periodo the corresponding folder.	2.5	A3 A4	B11 B13 B16	C4 C8 C35 C36 C37	D1 D2 D3 D5 D6 D7 D8

## Other comments on the Evaluation

The \*calificación definitive will calculate envelope a maximum of ten points, including all the \*apartados quoted in the evaluation. In the case that it/the student do not deliver, in time and form the folder and the memory of practices, \*además of the PAES correspondents, duly \*correjidos and reviewed pole professor-\*titor, \*repercuteirá negatively in the note, subtracting him in each of the cases a 10% of the \*calificación final.Taking into account that to the clinical practices IV are linked three \*periodos of practices, will be necessary to achieve a \*calificación minimum of four points on ten &nbsp;in #each of the evaluations for power do average with the \*calificación of the remaining \*periodos \*incluidos in these clinical practices.IT/the student explains his disposal with a rule of assistance to practices, of forced fulfilment, the one who will be able to access through the page web of the School.

General description	Matter allocated the acquisition of theoretical competitions-practical in relation with the cares and procedures of infirmary in the field of the skilled attention.			

**Competencies**

## Code

- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A4 Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B5 To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B8 To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B10 To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B16 To be able to use health information systems.
- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- C4 Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
- C8 To apply the technologies and information systems and communication of health care
- C10 To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
- C11 To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
- C12 To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.
- C13 To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
- C17 To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
- C18 To know and apply the principles underlying the comprehensive nursing care
- C29 To identify care needs arising from health problems.
- C31 To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.

C33	To have cooperative attitude with the different members of the team.
C50	To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork
D6	Skills in interpersonal relationships
D7	Critical reasoning.
D8	Autonomous learning.

### Learning outcomes

Expected results from this subject	Training and Learning Results			
Be able to participate in the cares that have like purpose guarantee the greater degree of independence of the people in his basic and specific needs, so much in skilled attention as in institutions partner-sanitary.	A4	B1	C4	D1
		B3	C8	D2
		B6	C10	D3

General description				

**Competencies**

## Code

- A1 Students have demonstrated knowledge and understanding in an area of study that comes from the basis of the general secondary education, and it is often found at a level that, if well supported on advanced text books, it also includes some aspects that involve knowledge from the forefront of their field of study.
- A2 Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
- A3 Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
- A4 Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
- A5 Students have developed those skills needed to undertake further studies with a high degree of autonomy.
- B1 To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
- B2 To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
- B3 To know how to apply the foundations and technical and methodological principles of nursing.
- B4 To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
- B5 To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
- B6 To apply the nursing interventions on scientific evidence and on the available resources.
- B7 To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
- B8 To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
- B9 To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
- B10 To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
- B11 To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
- B12 To apply the ethical and deontological code of Spanish nursing, understanding the ethical implications of health in a world in transformation.
- B13 To apply the principles of health and socio-health financing and use properly the available resources
- B14 To establish mechanics of evaluation, taking into account the scientific, technical and quality aspects
- B15 To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinar and interdisciplinar way and the rest staff of the welfare organizations.
- B16 To be able to use health information systems.

- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- B18 To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
- C1 To know and identify the structure and function of the human body. To understand the molecular and physiological basis of cells and tissues.
- C2 To know the use and indication of nursing care-related health products
- C3 To learn about the different groups of drugs, the principles of their authorisation, use and indication, and their mechanisms of action.
- C4 Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
- C5 To know and assess the nutritional needs of healthy people and problems of health throughout the vital cycle, to promote and reinforce healthy eating guidelines.
- C6 To identify the nutrients and the food in where they are.
- C7 To identify the nutritional problems of major predominance and to select the suitable dietetic recommendations
- C8 To apply the technologies and information systems and communication of health care
- C9 To know the physiopathologic processes, its declarations and the factors of risk that determine the states of health and illness in the different stages of the vital cycle.
- C10 To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
- C11 To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
- C12 To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.
- C13 To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
- C14 To know and to identify the psychological and physical problems derived from the violence of genre to qualify students in the prevention, the precocious detection, assistance, and rehabilitation of victims of this violence.
- C15 To identify, integrate and relate the concept of health and care, from a historical perspective, to understand the evolution of the nursing care.
- C16 To understand from an ontological and epistemological perspective, the evolution of the core concepts that make up the discipline of nursing as well as the most relevant theoretical models, applying scientific methodology in the process of care, developing appropriate care plans
- C17 To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
- C18 To know and apply the principles underlying the comprehensive nursing care
- C19 To lead, assess and provide comprehensive nursing care, to individual, family and community.
- C20 Ability to describe the basics of the primary level of health and activities to develop to provide comprehensive nursing care to individual, family and community.
- C21 To understand the function and activities and cooperative attitude that the professional has to develop in a primary health care team.
- C22 To promote the involvement of individual, groups and family in their health-disease process.
- C23 To identify factors related to health and environment issues, to assist people in situations of health and disease as members of a community.
- C24 To identify and analyze the influence of internal and external factors in the level of health of individual and groups.
- C25 To apply methods and procedures in its scope to identify the most important health problems in a community.
- C26 To analyze statistical data related to population studies, identifying possible causes of health problems.
- C27 To educate, inform, facilitate and support the health and well-being of community members, whose lives are affected by problems of health, risk, suffering, disease, disability or death.
- C28 To know adult health alterations, identifying manifestations appearing in different phases
- C29 To identify care needs arising from health problems.
- C30 To analyze collected data in the assessment, prioritize the problems of the adult patient, establish and execute care plan and its assessment.
- C31 To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
- C32 To select interventions to treat or prevent deviations from health-related problems.
- C33 To have cooperative attitude with the different members of the team.
- C34 To identify the characteristics of women at different stages of the reproductive cycle, the climacteric and the alterations that may appear, providing the necessary care at each stage.
- C35 To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
- C36 To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
- C37 To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.
- C38 To apply techniques that integrate nursing care, establishing a therapeutic relationship with children and their caregivers

- C39 To select interventions aimed to healthy and ill children, as well as those derived from diagnosis and treatment methods.
- C40 To be able to provide training and information for health to parents or primary caregivers.
- C41 To understand changes associated with the aging process and its impact on health.
- C42 To identify structural, functional, psychological and life forms changes, associated with the aging process
- C43 To know the most common health problems in elderly.
- C44 To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
- C45 To know Spanish sanitary system
- C46 To identify characteristics of the directive function of nursing services and care management.
- C47 To know and be able to apply techniques of team management
- C48 To know applicable legislation and the Spanish code of ethics and deontology of nursing, inspired in the European code of ethics and deontology of nursing.
- C49 To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
- C50 To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
- C51 To know the most relevant mental health problems at different stages of vital cycle, providing comprehensive and effective care in the field of nursing.
- C52 To know palliative care and pain control to provide care that soothe the situation of patients in advanced or terminal illness situation.
- D1 Analysis and synthesis ability
- D2 Organization and planning ability
- D3 Information management ability.
- D4 Problem solving and decision making.
- D5 Multidisciplinary and multilingual teamwork
- D6 Skills in interpersonal relationships
- D7 Critical reasoning.
- D8 Autonomous learning.
- D9 Adaptation to new situations. Initiative and entrepreneurial spirit. Creativity
- D10 Motivation for the quality.
- D11 Sensitivity towards environmental issues.

General description	(*)Según la OMS, urgencia es la aparición fortuita (imprevista o inesperada), en cualquier lugar o actividad, de un problema de salud de causa diversa y gravedad variable, que genera la conciencia de una necesidad inminente de atención por parte de sujeto que la sufre o de su familia, así las UUH se define como una organización de profesionales sanitarios que ofrece asistencia multidisciplinar, ubicada en un área específica del hospital, que cumple unos requisitos funcionales, estructurales y organizativos, que garantizan condiciones de seguridad, calidad y eficiencia para atender a la urgencias y la emergencia. Una organización de profesionales sanitarios que ofrece asistencia multidisciplinar en un espacio específico del hospital, que cumple unos requisitos funcionales, estructurales y organizativos, de forma que garantiza las condiciones de seguridad, calidad y eficiencia adecuadas para atender pacientes que, siendo susceptibles de recuperación, requieren soporte respiratorio o que precisan soporte respiratorio básico junto con soporte de, al menos, dos órganos o sistemas; así como todos los pacientes complejos que requieran soporte por fallo multiorgánico.			

## **Competencies**

### Code

B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B11	To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
C4	Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
C13	To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
C29	To identify care needs arising from health problems.
C32	To select interventions to treat or prevent deviations from health-related problems.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork

General description				

## **Competencies**

### **Code**

A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B17	To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
C8	To apply the technologies and information systems and communication of health care
C9	To know the physiopathologic processes, its declarations and the factors of risk that determine the states of health and illness in the different stages of the vital cycle.
C18	To know and apply the principles underlying the comprehensive nursing care
C49	To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
D2	Organization and planning ability
D4	Problem solving and decision making.
D5	Multidisciplinar and multilingual teamwork
