<b>IDENTIFYING DATA</b>				
<b>Government, management and ITC management</b>				
Subject	Government, management and ITC management			
Code	P52M182V01101			
Study programme	Master Universitario en Dirección TIC para la defensa			
Descriptors	ECTS Credits 3	Choose Mandatory	Year 1st	Quadmester 1st
Teaching language	Spanish			
Department				
Coordinator	Rodríguez Rodríguez, Francisco Javier			
Lecturers	Ares Tarrío, Miguel Ángel Merino Gil, Miguel Ángel Manuel Rodríguez Rodríguez, Francisco Javier			
E-mail	fjavierrodriguez@cud.uvigo.es			
Web	<a href="http://campus.defensa.gob.es">http://campus.defensa.gob.es</a>   <a href="https://moovi.uvigo.gal">https://moovi.uvigo.gal</a>			
General description	The course aims to provide an overview of the strategic direction of the company and the strategic alignment of ICT. Following the planning process, ICT governance and related standards will be discussed: ISO 38.500 and COBIT 5. In order to evaluate the performance of governance and management, balanced scorecards and ICT performance indicators will be explained. As an indispensable part of an organisation's performance, and at the base of the organisational structure, human resource management will be discussed.			
<b>Skills</b>				
Code				
A6	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.			
A7	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study.			
A8	CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.			
A9	CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way.			
A10	CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.			
B1	CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study.			
B3	CG3 - Direct, plan, coordinate, organize and/or supervise tasks, projects and/or human groups. Work cooperatively in multidisciplinary teams acting, where appropriate, as an integrator of knowledge and lines of work.			
B6	CG6 - Be able to make decisions in environments characterized by complexity and uncertainty, evaluating the different existing alternatives in order to select the one with the most favorable expected result, appropriately managing the risk associated with the decision.			
C1	CE1 - Acquire knowledge and skills to develop effective leadership for the digital transformation of an organization.			
C2	CE2 - Have capacities in relation to the ICT Government and the Management, Operation and Maintenance Services of Information and Communication Systems and Technologies and Information Security.			
C3	CE3 - Define, implement, direct and manage the organizational, operational and support processes in obtaining ICT resources and for the management and quality of the service; with a guarantee of safety for people and goods, the final quality of the products and their homologation.			
C4	CE4 - Strategically plan, direct, coordinate and technically and economically manage projects in the field of ICTs and information security, applying the current normative and regulatory framework in the technical-economic-legal fields.			
D1	CT1 - Ability to understand the meaning and application of the gender perspective in the different fields of knowledge and in professional practice with the aim of achieving a fairer and more egalitarian society.			
D3	CT3 - Incorporate criteria of sustainability and environmental commitment into professional practice. Acquire skills in the equitable, responsible and efficient use of resources.			
<b>Learning outcomes</b>				
Expected results from this subject			Training and Learning Results	

LO1: Know a complete vision of the strategic management of the company.	A10 B1 B3 B6 C1 D1 D3
LO2: Understand the concept of ICT strategic alignment.	A10 B1 B3 B6 C1 C2 C4 D1 D3
<b>Design and carry out research using suitable quantitative methods.</b>	
LO3: ICT governance and related standards: ISO 38.500, COBIT 5.	A6 A7 A10 B1 B3 B6 C4 D1 D3
LO4: Understand the functioning of the value chain and its generation and the use of technology to support processes.	A7 A10 B1 B3 B6 C1 C3 D1 D3
LO5: Understand the use of balanced scorecards and ICT performance indicators.	A7 A9 A10 B1 B3 B6 C1 C2 D1 D3
LO6: Understand how human resource management contributes to strategic objectives.	A7 A8 A10 B1 B3 B6 C1 D1 D3

## Contents

### Topic

Topic 1. Introduction to strategic business planning	1.1. Introduction. Basic management functions. 1.2. The strategic management process. 1.3. Strategic conceptualisation: vision, philosophy, mission. 1.4. Strategic analysis. 1.5. Organisational culture and goal-setting process. 1.6. Strategy selection.
--	---

Topic 2. ICT governance, management and management: ISO/IEC 38500 standard and COBIT 5	2.1. ICT Governance. 2.2. Implementation of ICT Governance. 2.3. Reference frameworks for governance and management of ICT. 2.4. ISO/IEC 38500. Introduction. 2.5. ISO/IEC 38500. Main objectives and basic principles. 2.6. ISO/IEC 38500. Implementation objectives. 2.7. COBIT, Control Objectives for Information and Related Technologies: Introduction. 2.8. COBIT. Reference Framework. 2.9. COBIT. Principles. 2.10. COBIT. Enabling Processes 2.11. COBIT. Product family. 2.12. COBIT 5 and other standards and frameworks. 2.13. Ministry of Defence STIC policy. 2.14. Supplementary information.
Topic 3. Vision and mission of the ICT manager	3.1. Introduction. 3.2. CIO competencies. 3.3. Key relationships of the CIO. 3.4. Director of CISTIC and CIO of the Ministry of Defence. 3.5. Further reading and activities
Topic 4. Value generation and performance management	4.1. Introduction. 4.2. The Value of an Exercise Machine. 4.3. Value of IT in the context of Business. 4.4. How to communicate value. 4.5. New ways to create value. The 4-source model of value creation from IT. 4.6. Value analysis in different IT scenarios, frameworks, methodologies and new IT trends. 4.7. References.
Topic 5. Balanced Scorecards and Performance Management	5.1. The Balanced Scorecard. Introduction and concepts. 5.2. Perspectives of the BSC and objectives. 5.3. Strategy maps. 5.4. Key performance indicators, KPIs. 5.5. Strategic initiatives 5.6. BSC applied to ICT 5.7. KPI indicators, application to ICT. 5.8. Complementary information. Links.
Topic 6. Human and material resources management	6.1. Theoretical-technical elements of management and strategic change: From human resources to talent-based people management (TPD). 6.2. Managing people and talent as a strategic factor. 6.3. Motivational and creative approach to human behaviour.

<b>Planning</b>		Class hours	Hours outside the classroom	Total hours
Autonomous problem solving		0	6	6

Lecturing		5	5	10
Problem solving		3	3	6
Practices through ICT		4	0	4
Seminars		2	0	2
Discussion Forum		0	3	3
Self-assessment		0	6	6
Presentation		3	0	3

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

<b>Methodologies</b>	Description
Autonomous problem solving	Activity in which students analyse and solve problems and/or exercises related to the subject independently.
Previous studies	Research, reading, documentation work and/or autonomous performance of any other activity that the student considers necessary to enable him/her to acquire knowledge and skills related to the subject. This is usually carried out prior to classes, laboratory practicals and/or assessment tests.
Lecturing	Presentation by a lecturer of the contents of the subject being studied, theoretical bases and/or guidelines for a project or exercise to be carried out by the student.

Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop appropriate and correct solutions by exercising routines, applying formulas or algorithms, applying procedures for transforming the available information and interpreting the results.
Practices through ICT	Activities involving the application of knowledge in a given context and the acquisition of basic and procedural skills in relation to the subject, through the use of ICT.
Seminars	Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject.
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated.

### Personalized assistance

Methodologies	Description
Lecturing	Given the blended nature of the course, we will distinguish between two cases: (1) Attention in the distance phase: this will be carried out using telematic means. Students who wish to do so may ask the lecturers questions in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will be carried out by videoconference. (2) Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, during this phase, face-to-face tutoring mechanisms (individual and/or group) will also be used.
Problem solving	Given the blended nature of the course, we will distinguish between two cases: (1) Attention in the distance phase: this will be carried out using telematic means. Students who wish to do so may ask the lecturers questions in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will be carried out by videoconference. (2) Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, during this phase, face-to-face tutoring mechanisms (individual and/or group) will also be used.
Practices through ICT	Given the blended nature of the course, we will distinguish between two cases: (1) Attention in the distance phase: this will be carried out using telematic means. Students who wish to do so may ask the lecturers questions in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will be carried out by videoconference. (2) Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, during this phase, face-to-face tutoring mechanisms (individual and/or group) will also be used.
Seminars	Given the blended nature of the course, we will distinguish between two cases: (1) Attention in the distance phase: this will be carried out using telematic means. Students who wish to do so may ask the lecturers questions in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will be carried out by videoconference. (2) Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, during this phase, face-to-face tutoring mechanisms (individual and/or group) will also be used.

### Assessment

	Description	Qualification	Training and Learning Results			
Practices through ICT	Activities involving the application of knowledge in a specific context and the acquisition of basic and procedural skills in relation to the subject, through the use of ICT. They allow the student's knowledge and skills to be assessed. They will be assessed by means of deliverables.	50	A7	B1	C1	D1
			A8	B3	C2	D3
			A9	B6	C3	
			A10	C4		
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated. It allows the evaluation of the student's skills, knowledge and, to a lesser extent, attitudes. Participation in the forums will be assessed.	10	A6	B1	C1	D1
			A10	B3	C2	D3
				B6		
Self-assessment	A mechanism in which, by means of a series of questions or activities, it is possible for the student to autonomously evaluate his/her degree of acquisition of knowledge and skills on the subject, allowing self-regulation of the personal learning process.	20	A6	B1	C1	D1
			A7	B3	C2	D3
			A8	B6	C3	
			A10	C4		
Presentation	Presentation by the students, individually or in groups, of a topic related to the contents of the subject or the results of a project, exercise, project, etc. Knowledge, skills and attitudes can be assessed through the presentation.	20	A7	B1	C1	D1
			A8	B3	C3	D3
			A9	B6		
			A10			

### Other comments on the Evaluation

It will be necessary to obtain at least 50% of the grade to pass the subject.

In the event that the student does not manage to pass the subject in the ordinary call, he/she will have the right to a second opportunity for assessment (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The evaluation in this extraordinary call will consist of a single written test, which will be carried out in the distance mode, which will account for 100% of the grade, being necessary to obtain at least 50% to pass the subject.

Fraud or attempted fraud on the part of the student in the evaluation process (copying or plagiarism or facilitating it to third parties) will be penalised by giving the student a failing grade (0.0) in the exam session in which it occurs.  
In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

General description	ICT processes' Management and Continuous Improvement offers a general vision of processes management in organizations, according to the philosophy of Total Quality and the most widespread Excellence models. The objective is to provide the student with the necessary knowledge in the field of process management, notably increasing their capacity in the design, analysis and diagnosis of processes, focused on their continuous improvement. An overview of the CMMI reference model is also offered, as a model that develops and integrates a set of good practices and that is currently a reference framework in the software industry and that generates value in the prioritization of actions in the improvement of processes of IT companies; also allowing to emphasize the alignment of processes in accordance with the objectives defined within the strategic plan of the organization.			

<b>Skills</b>

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.			

<b>Methodologies</b>		Description
Autonomous problem solving		Activity in which students analyze and solve problems and/or exercises related to the subject autonomously.
Previous studies		Presentation by a lecturer of the contents of the subject of study, theoretical bases and/or guidelines of a work or exercise that the student has to develop.
Lecturing		Exhibition by part of a lecturer of the contents of the matter object of study, theoretical bases and/or guidelines of a work or exercise that the student has to develop.
Problem solving		Activity in which problems and/or exercises related to the subject are formulated. The student must develop the appropriate and correct solutions through the exercise of routines, application of formulas or algorithms, application of transformation procedures of the available information and interpretation of the results.
Practices through ICT		Activities for the application of knowledge in a given context and the acquisition of basic and procedural skills in relation to the subject, through the use of ICT.
Seminars		Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject.
Discussion Forum		Activity carried out in a virtual environment in which diverse and current topics related to the academic and/or professional field are debated.

General description	A materia de Xestión de servizos e calidade de servizo pretende ofrecer aos alumnos unha aproximación suave ao mundo do Service Management. Utilizarase como marco de traballo a metodoloxía ITIL nas súas versións ITIL v3 2011 e ITIL v4. Non é o obxecto a preparación para unha certificación ITIL, pero facilitaranse preguntas de test de certificación para unha maior comprensión. O obxectivo é comprender os conceptos de xestión de servizos e poder alcanzar unha base teórica para a súa aplicación práctica e implantación utilizando material de referencia ou outros recursos necesarios. Reforzarase con análise de casos de uso de historia e modelos de xestión de diferentes compañías de servizos e organismos.			

## **Competencias**

### **Code**

A6	CB6 - Posuír e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
A7	CB7 - Que os estudiantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudo.
A8	CB8 - Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos.
A9	CB9 - Que os estudiantes saibam comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades.
A10	CB10 - Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B3	CG3 - Dirixir, planificar, coordinar, organizar e/ou supervisar tarefas, proxectos e/ou grupos humanos. Traballar cooperativamente en equipos multidisciplinares actuando, no seu caso, como integrador/a de coñecementos e liñas de traballo.
B4	CG4 - Ser un/unha profesional comprometido/a coa calidade, cos prazos e coa adecuación das solucións, non só no exercicio da profesión senón tamén no ámbito social, incluíndo un compromiso coa sustentabilidade económica, ética e ambiental.
C2	CE2 - Dispoñer de capacidades en relación co Goberno TIC e os Servizos de Xestión, Operación e Mantemento dos Sistemas e Tecnoloxías da Información e as Comunicacións e a Seguridade da Información.
C5	CE5 - Definir e implantar modelos normalizados, establecemento de estándares e metodoloxías de referencia e taxonomía de servizos TIC e de seguridade da información.
D4	CT4 - Capacidade de comunicación oral e escrita de coñecementos.

## **Resultados de aprendizaxe**

Expected results from this subject

Training and Learning Results

RA1: Entender a definición de servizo e a súa aplicabilidade no ámbito de traballo	A6 A7 A8 A9 A10 B3 B4 C2 C5 D4
RA2: Coñecer modelos de éxito de aplicación de xestión de servizo	A6 A7 A8 A9 A10 B3 B4 C2 C5 D4
<b>2. Deseñar unha investigación utilizando metodoloxía e técnicas cualitativas</b>	
RA3: Coñecer o marco de traballo ITIL a alto nivel	A6 A7 A8 A9 A10 B3 B4 C2 C5 D4
RA4: Identificar oportunidades de aplicación no traballo actual	A6 A7 A8 A9 A10 B3 B4 C2 C5 D4

## Contidos

### Topic

Tema 1: Introdución á xestión de servizos	- Definición de Servizo e Estratexia de Servicio - A xestión de servizos. Introdución a ITSM - Que é ITIL. ITIL v3 2011 / ITIL v4 - ITIL - Service Strategy.
Tema 2: Deseño e Transición de Servizo	- ITIL - Service Design - ITIL - Service Transition
Tema 3: Operación de Servizo	- ITIL - Service Operation
Tema 4: Mellora Continua do Servizo, ITIL v4.	- ITIL - Service Improvement
DevOps	- ITIL v4 - DevOps

## Planificación

	Class hours	Hours outside the classroom	Total hours
Estudo previo	0	58	58
Lección magistral	12	10	22
Estudo de casos	7	0	7
Foros de discusión	0	10	10
Exame de preguntas de desenvolvemento	1	0	1
Presentación	2	0	2

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Metodoloxía docente

	Description
Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Exposición por parte dun profesor/a dos contidos da materia obxecto de estudo, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver.
Estudo de casos	Análise dun feito, problema ou suceso real coa finalidade de coñecelo, interpretalo, resolvelo, xerar hipótese, contrastar datos, reflexionar, completar coñecementos, diagnosticalo e adestrarse en procedementos alternativos de solución.
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional.

## Atención personalizada

### Methodologies Description

Lección maxistral	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levarase a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Estudo de casos	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levarase a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.

## Avaluación

	Description	Qualification	Training and Learning Results
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. Permite avaliar as habilidades, os coñecementos e, en menor medida, as actitudes do alumno/a. Avaliarase a participación nos foros.	20 A6 A7 A8 A9 A10	B3 C2 D4 B4 C5
Exame de preguntas de desenvolvemento	Proba de avaliación que inclúe preguntas abertas e/ou exercicios, sobre un tema. Os alumnos/as deben desenvolver, relacionar, organizar e presentar os coñecementos que teñan sobre a materia nunha resposta argumentada. Pódese utilizar para avaliar coñecementos e habilidades.	60 A6 A7 A8 A9 A10	B3 C2 D4 B4 C5
Presentación	Exposición por parte do alumnado, de maneira individual ou en grupo, dun tema relacionado cos contidos da materia ou dos resultados dun traballo, exercicio, proxecto, etc. A través da presentación pódense avaliar coñecementos, habilidades e actitudes.	20 A6 A7 A8 A9 A10	B3 C2 D4 B4 C5

### Other comments on the Evaluation

Será necesario obter polo menos o 50% da calificación para superar a materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) nas datas establecidas para ese efecto pola Comisión Académica de Máster. A avaliación da convocatoria extraordinaria realizarase en modalidade a distancia e consistirá nunha única proba escrita que suporá o 100% da cualificación, sendo necesario obter polo menos o 50% para superar a materia.

A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitarilo a terceiros) será penalizado outorgándolle directamente unha cualificación de suspenso (0.0) na convocatoria na que se produza.

No caso de que exista alguma diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

### **Networks and telecommunication systems**

Subject	Networks and telecommunication systems			
Code	P52M182V01104			
Study programme	Master Universitario en Dirección TIC para la defensa			
Descriptors	ECTS Credits	Choose	Year	Quadmester
	3	Mandatory	1st	1st
Teaching language	Spanish			
Department				
Coordinator	Fernández Gavilanes, Milagros			
Lecturers	Fernández Gavilanes, Milagros Troncoso Pastoriza, Francisco Manuel			
E-mail	mfgavilanes@cud.uvigo.es			
Web	http://campus.defensa.gob.es   https://moovi.uvigo.gal			
General description	This subject provides fundamental concepts of communication networks and telematic services: the technological basis of data transmission, the architecture of communication networks and services, the main components of ICT infrastructures, network management and planning methods and the basic aspects of security in computer networks.			
	Classroom lectures will be used for the introduction of theoretical concepts, which will be complemented with various laboratory practices.			

## **Skills**

### **Code**

A6	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
A7	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study.
A8	CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
A9	CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way.
A10	CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B1	CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study.
B3	CG3 - Direct, plan, coordinate, organize and/or supervise tasks, projects and/or human groups. Work cooperatively in multidisciplinary teams acting, where appropriate, as an integrator of knowledge and lines of work.
B6	CG6 - Be able to make decisions in environments characterized by complexity and uncertainty, evaluating the different existing alternatives in order to select the one with the most favorable expected result, appropriately managing the risk associated with the decision.
C7	CE7 - Analyze and model the architecture of a communications system, including its different components and access, transport and transmission services, both in local and wide-area environments.
D4	CT4 - Oral and written communication skills.

## **Learning outcomes**

Expected results from this subject	Training and Learning Results
LO1: Know the technological basis on which telematics and data transmission are based.	A6
	A7
	A8
	A9
	A10
	B1
	B3
	B6
	C7
	D4

LO2: Understand the basic principles and architectures of communication networks and services.	A6 A7 A8 A9 A10 B1 B3 B6 C7
LO3: Know the main components of ICT infrastructures.	A6 A7 A8 A9 A10 B1 B3 B6 C7 D4
LO4: Know the methods of network management and planning.	A6 A7 A8 A9 A10 C7 D4
LO5: Know military communication systems.	A6 A7 A8 A9 A10 C7 D4

## Contents

### Topic

Block I: Introduction to computer networks	- Objectives and motivation - Use of computer networks, social and economic impact - Components of computer networks and types of networks - Connections and routing - Layers, services and protocols - Reference models (OSI/Internet) - History of the Internet
Block II: Computer network management	- Objectives and motivation - Network design and planning: sub-networks, demilitarised zones, VLANs and NAT. - Network monitoring and management: network access control, virtualisation and network management (fault, configuration, account, performance, security, and SNMP)
Block III: Computer network architecture	- Architecture and components of telecommunication systems: introduction, addressing, performance, security - Transmission media (spectrum, frequency bands): introduction, frequencies and spectrum, channel characterisation, transmission media - Military communication equipment and systems: introduction, rigerisation, military networks

## Planning

	Class hours	Hours outside the classroom	Total hours
Previous studies	0	38	38
Lecturing	8	8	16
Problem solving	0	2	2
Seminars	1	0	1
Practices through ICT	5	0	5
Autonomous problem solving	0	6	6
Discussion Forum	0	1	1
Self-assessment	0	3	3

Presentation	2	0	2
Objective questions exam	1	0	1

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

### Methodologies

Methodologies	Description
Previous studies	Research, reading, documentation work and/or autonomous performance of any other activity that the student considers necessary to enable him to acquire knowledge and skills related to the subject. This is usually carried out prior to classes, laboratory practices and/or assessment tests.
Lecturing	Presentation by the lecturer of the contents of the subject, theoretical bases and/or guidelines of a work or exercise that the student has to develop.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop appropriate and correct solutions by exercising routines, applying formulas or algorithms, applying procedures for transforming the available information and interpreting the results.
Seminars	Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject.
Practices through ICT	Activities involving the application of knowledge in a given context and the acquisition of basic and procedural skills in relation to the subject, through the use of ICT.
Autonomous problem solving	Activity in which students analyse and solve problems and/or exercises related to the subject independently.
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated.

### Personalized assistance

Methodologies	Description
Problem solving	Attention in the distance learning phase: This will be carried out through the use of telematic means. Students who wish to do so will be able to ask the faculty questions in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will take place via videoconference.
Practices through ICT	Attention in the face-to-face phase: Although it is still possible to use telematic mechanisms for student attention, face-to-face tutoring mechanisms (individual and/or group) will also be used during this phase.

### Assessment

	Description	Qualification	Training and Learning Results
Practices through ICT	Activities involving the application of knowledge in a specific context and the acquisition of basic and procedural skills in relation to the subject, through the use of ICT. They allow the student's knowledge and skills to be assessed. They will be assessed by means of deliverables.	30 A6 A7 A8	B1 C7 B3 B6
Self-assessment	A mechanism in which, by means of a series of questions or activities, it is possible for the student to autonomously evaluate his/her degree of acquisition of knowledge and skills on the subject, allowing self-regulation of the personal learning process.	10 A6 A7 A8 A9	B1 C7 B3
Presentation	Presentation by the students, individually or in groups, of a topic related to the contents of the subject or of the results of a work, exercise, project, etc. Knowledge, skills and attitudes can be assessed through the presentation.	30 A6 A7 A8 A9 A10	B1 C7 D4 B3
Objective questions exam	A test that assesses knowledge and includes closed questions with different answer alternatives (true or false, multiple choice, item matching, etc.). Students select an answer from a limited number of possibilities.	30 A6 A7 A8 A9 A10	B1 C7 B3

### Other comments on the Evaluation

A minimum mark of 50% is required to pass the course.

In the event that the student does not manage to pass the subject in the ordinary call, he/she will have the right to a second opportunity for assessment (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The assessment of the extraordinary call will be carried out in distance mode. In order to pass the course it will be necessary to pass the different parts into which the subject is divided:

Self-assessment activities (test): 40% with the following associated competences CB6, CB7, CB8, CG1, CG3, CG6, CE7.

Assessment of deliverables (assignments): 60% with the following associated competences CB6, CB7, CB8, CB9, CB10, CG1, CG3, CE7, CT4.

#### **ETHICAL COMMITMENT:**

Students are expected to behave ethically in an appropriate manner. If unethical behaviour (copying, plagiarism, use of unauthorised electronic devices or others) is detected, the student will be penalised by being awarded a mark of 0 in the exam session in which it occurs.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

General description	The Information Systems subject aims to offer students an integrated vision of the different elements necessary to make the holistic concept of Information Systems possible from a technological perspective. To this end, the different technologies and paradigms that are used in the different layers involved in the design and development of Information Systems will be examined. The proposed approach, far from seeking to show low-level descriptions, seeks a high-level approach concerned with the advantages and disadvantages of the different possibilities.

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

<b>Methodologies</b>	
	Description
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated.
Autonomous problem solving	Activity in which students analyse and solve problems and/or exercises related to the subject independently.
Previous studies	Research, reading, documentation work and/or autonomous performance of any other activity that the student considers necessary to enable him/her to acquire knowledge and skills related to the subject. This is usually carried out prior to classes, laboratory practicals and/or assessment tests.
Lecturing	Presentation by a lecturer of the contents of the subject being studied, theoretical bases and/or guidelines for a project or exercise to be carried out by the student.
Presentation	Activity in which problems and/or exercises related to the subject are formulated. The student must develop appropriate and correct solutions by exercising routines, applying formulas or algorithms, applying procedures for transforming the available information and interpreting the results.
Problem solving	Assessment test which includes open questions and/or exercises on a topic. Students must develop, relate, organise and present their knowledge of the subject in a reasoned response. It can be used to assess knowledge and skills.

<b>Personalized assistance</b>	
<b>Methodologies Description</b>	
Lecturing	Given the blended nature of the course, we will distinguish between two cases: 1. Attention in the distance phase: this will be carried out through the use of telematic means. Students who wish to do so may ask the teacher questions in forums or by e-mail. They will also be able to arrange individual tutorials with the teacher, which will be carried out by videoconference. 2. Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, during this phase, face-to-face tutoring mechanisms (individual and/or group) will also be used.
Presentation	Attention in the face-to-face phase: although it is still possible to use telematic mechanisms for student attention, face-to-face tutoring mechanisms (individual and/or group) will also be used during this phase.

<b>Assessment</b>			
	Description	Qualification	Training and Learning Results
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated. It allows the evaluation of the student's skills, knowledge and, to a lesser extent, attitudes. Participation in the forums will be assessed.	5 A8 A10	C8 D5
Presentation	Presentation by the students, individually or in groups, of a topic related to the contents of the subject or the results of a work, exercise, project, etc. Knowledge, skills and attitudes can be assessed through the presentation.	35 A6 A7 A9	B1 C8 D4 B5
Self-assessment	A mechanism in which, by means of a series of questions or activities, it is possible for the student to autonomously evaluate his/her degree of acquisition of knowledge and skills on the subject, allowing self-regulation of the personal learning process.	15 A8 A10	B1 C8 D5

Essay questions exam	Assessment test which includes open questions and/or exercises on a topic. Students must develop, relate, organise and present their knowledge of the subject in a reasoned response. It can be used to assess knowledge and skills.	45	A6 A7	B1 C8 D4
----------------------	--	----	----------	----------

### Other comments on the Evaluation

A continuous assessment mechanism will be used, with the aim of monitoring the student's progress throughout the course, assessing their overall effort, and trying to detect as early as possible any difficulties that may arise in the learning process.

It will be necessary to achieve at least 50% of the grade in order to pass the course.

In the event that the student does not manage to pass the subject in the ordinary exam, he/she will have the right to a second evaluation opportunity (extraordinary exam). Those students who take the extraordinary exam will have to pass a written exam in which the whole syllabus may be evaluated and in which it will be necessary to achieve at least 50% of the grade in order to pass the subject.

Fraud or attempted fraud on the part of the student in the evaluation process (copying or plagiarism or facilitating it to third parties) will be penalised by giving the student a grade of 0 in the call in which it occurs.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

LO2 - Know the threats and vulnerabilities posed by new technologies, the most common types of computer attacks and ways to protect against them.	A6 A7 A8 A9 A10 B1 B3 B6 B7 C9 D5
LO3 - Know the fundamentals, applications and uses of modern cryptography.	A6 A7 A8 A9 A10 B1 B7 C9 D5
LO4 - Be able to design and evaluate appropriate measures for user identification and authentication, as well as the management of identities and associated authorizations.	A6 A7 A8 A9 A10 B1 B3 B6 B7 C9 D5

## Contents

### Topic

Definitions, concepts and basic principles	- Introduction - Properties of information security - Basic Concepts - Fundamental principles. - New cyber defense scenario
Threats and vulnerabilities	- Malware - Application threats - Network threats - Social engineering
Physical Security	- Environmental Threats - Technical threats - Man-made threats - Damage recovery and backup - Physical and logical security integration
Operational Security	- Human Resources - Systems operation
Cryptographic techniques	- Symmetric cryptography - Asymmetric cryptography - Cryptographic Hash
Identification and authentication	- Introduction: Authentication process, Authentication risk. - Authentication methods: Passwords, Tokens, Biometrics. - Remote authentication - Identity management
Authorization and access control	- Components of access control: Authentication, Authorization and Auditing. - AAA Protocols - Access control policies: DAC, MAC, RBAC, ABAC. - Identity Federation

## Planning

	Class hours	Hours outside the classroom	Total hours
Previous studies	0	25	25

Lecturing	8	8	16
Practices through ICT	6	0	6
Seminars	1	0	1
Discussion Forum	0	5	5
Objective questions exam	2	0	2
Essay	0	20	20

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

### Methodologies

	Description
Previous studies	Search, reading, documentation work and / or autonomously performing any other activity that the student considers necessary to enable the acquisition of knowledge and skills related to the subject. It is usually carried out prior to classes, laboratory practices and/or evaluation tests.
Lecturing	Presentation by a teacher of the contents of the subject under study, theoretical basis and / or guidelines for a work or exercise that the student has to develop.
Practices through ICT	Activities of knowledge application in a given context and acquisition of basic and procedural skills in relation to the subject, through the use of ICT.
Seminars	Activity focused on a specific topic, which allows to extend or complement the contents of the subject.
Discussion Forum	Activity developed in a virtual environment in which diverse and current topics related to the academic and/or professional field are discussed.

### Personalized assistance

Methodologies	Description
Lecturing	It will be carried out through the use of online means. Students who may ask questions to the lecturer in forums or by e-mail. They will also be able to arrange individual tutorials with him, which will be carried out by videoconference.
Practices through ICT	Although it is still possible to use telematic mechanisms for student attention, in this case, face-to-face tutoring mechanisms will also be used.
Seminars	Although it is still possible to use telematic mechanisms for student attention, in this case, face-to-face tutoring mechanisms will also be used.

### Assessment

	Description	Qualification	Training and Learning Results			
Objective questions exam	A test that assesses knowledge and includes closed questions with different answer alternatives (true or false, multiple choice, item matching, etc.). Students select an answer from a limited number of possibilities.	70	A6	B1	C9	D5
			A7	B6		
			A8	B7		
			A9			
			A10			
Essay	An essay or document prepared on a topic that must be written according to established rules of style and length. It allows the evaluation of the student's skills, knowledge and, to a lesser extent, attitudes.	30	A6	B1	C9	D5
			A7	B3		
			A8	B7		
			A9			
			A10			

### Other comments on the Evaluation

It will be necessary to obtain 50% of the grade in order to pass the course.

A continuous evaluation mechanism will be used, with the purpose of monitoring the evolution of the student throughout the course, evaluating his overall effort.

There will be two written tests: one at the beginning of the face-to-face phase, in which the contents taught in the distance learning phase will be evaluated, which will account for 20% of the grade; and one at the end of the face-to-face phase, in which all the contents of the course will be evaluated (including the contents of the distance learning phase and the classroom phase), which will account for 50% of the grade.

In the event that the student fails to pass the course in the ordinary call, he/she will be entitled to a second evaluation opportunity (extraordinary call) to be held in the distance mode on the dates established for this purpose by the Master's Academic Committee. In this case, the evaluation will consist of a single written test that will account for 100% of the grade, being necessary to obtain at least 50% to pass the course.

Fraud or attempted fraud on the part of the student in the evaluation process (copying or plagiarism or its facilitation to third

parties) will be penalized by giving the student a grade of 0 in its corresponding exam session.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

General description	A materia de Xestión da Seguridade e Análise de Riscos pretende ofrecer aos alumnos unha visión xeral dos Sistemas de Xestión da Seguridade da Información (SXSI), coa descripción dos fundamentos dos estándares existentes para a certificación dun SXSI, e prestando especial atención ás metodoloxías de análises e xestión de riscos, así como aos plans de resposta a incidentes de seguridade.			

## **Competencias**

### **Code**

A6	CB6 - Posuér e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
A7	CB7 - Que os estudiantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudo.
A8	CB8 - Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos.
A9	CB9 - Que os estudiantes saibam comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades.
A10	CB10 - Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B1	CG1 - Posuér coñecementos avanzados e altamente especializados e demostrar unha comprensión detallada e fundamentada dos aspectos teóricos e prácticos tratados nas diferentes áreas de estudo.
B2	CG2 - Integrar e aplicar os coñecementos adquiridos, e posuér capacidade de resolución de problemas en contornas novas ou definidas de forma imprecisa, incluíndo contextos de carácter multidisciplinar relacionados co seu ámbito de estudo.
B3	CG3 - Dirixir, planificar, coordinar, organizar e/ou supervisar tarefas, proxectos e/ou grupos humanos. Traballar cooperativamente en equipos multidisciplinares actuando, no seu caso, como integrador/a de coñecementos e liñas de traballo.
B6	CG6 - Ser capaz de tomar decisións en contornas caracterizadas pola complexidade e incerteza, avaliando as distintas alternativas existentes co obxectivo de seleccionar aquela cuxo resultado esperado sexa máis favorable, xestionando adequadamente o risco asociado á decisión.
B7	CG7 - Valorar a importancia dos aspectos de seguridade na xestión de sistemas e información, identificando necesidades de seguridade, analizando posibles ameazas e riscos e contribuíndo á definición e evaluación de criterios e políticas de seguridade.
C9	CE9 - Xestionar a seguridade da información nos aspectos normativo, técnico e metodolóxico.
D6	CT6 - Manexar apropiadamente recursos de información.

## **Resultados de aprendizaxe**

Expected results from this subject

Training and Learning Results

RA1. Entender o concepto de Xestión de Riscos e valorar a súa importancia nos Sistemas TIC.	A6 A7 A8 A9 A10 B1 B2 B6 B7 C9 D6
RA2. Comprender as características o proceso de certificación dun SXSI.	A9 A10 B1 B7 C9 D6
RA3. Estudar as metodoloxías e ferramentas disponíveis para analizar e xestionar os riscos.	A7 A10 B1 B3 B6 B7 C9 D6
RA4. Coñecer a política e xestión da seguridade da información no MINISDEF e as recomendacións emitidas polo CCN.	A10 B7 C9 D6
RA5. Valorar o alcance e a metodoloxía que deben seguir as auditorías de seguridade de sistemas TIC.	A7 A8 A9 A10 B2 B6 B7 C9 D6
RA6. Entender como se pode levar a cabo unha correcta xestión de incidentes de seguridade.	A7 A8 A10 B2 B6 B7 C9 D6

## Contidos

### Topic

Tema 1: Introducción á Xestión da Seguridade da Información	- A importancia estratégica da información e os activos dixitais - O proceso de xestión da seguridade da información. - Definición de Políticas, Plans e Procedementos de Seguridade. - Os profesionais da Seguridade da Información: Competencias, formación e certificacións.
Tema 2: Análise e Xestión de Riscos	- O proceso de identificación, análise e avaliación de riscos. - Revisión das principais vulnerabilidades e tipos de ataques a sistemas informáticos. - Tratamento dos riscos. - Metodoloxía MAGERIT. - O modelo proposto pola ISO 31000.
Tema 3: Sistema de Xestión de Seguridade da Información	- Características dun SXSI. - Certificacións e estándares de seguridade: ISO 27001 e ENS. - Política e xestión da seguridade da información no MINISDEF. - Normativa STIC do CCN.
Tema 4: Auditorías de seguridade e resposta a incidentes	- O proceso de auditoría da seguridade da información. - Xestión de incidentes de seguridade.

Tema 5: A importancia do factor humano na seguridade da información	<ul style="list-style-type: none"> <li>- Aspectos a considerar relacionados co factor humano e a seguridade.</li> <li>- Técnicas de Enxeñaña Social.</li> <li>- Ataques de Phishing.</li> <li>- Definición de políticas de uso seguro e aceptable dos recursos informáticos.</li> </ul>

## Planificación

	Class hours	Hours outside the classroom	Total hours
Resolución de problemas de forma autónoma	0	5	5
Estudo previo	0	55	55
Lección maxistral	16	8	24
Resolución de problemas	2	2	4
Foros de discusión	0	5	5
Autoavaliación	0	3	3
Presentación	3	0	3
Exame de preguntas de desenvolvemento	1	0	1

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Metodoloxía docente

	Description
Resolución de problemas de forma autónoma	Actividade na que o alumnado analiza e resolve problemas e/ou exercicios relacionados coa materia de forma autónoma.
Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Exposición por parte dun profesor/a de os contidos da materia obxecto de estudo, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver.
Resolución de problemas	Actividade na que se formulan problemas e/ou exercicios relacionados coa materia. O alumno/a debe desenvolver as solucións adecuadas e correctas mediante a exercitación de rutinas, aplicación de fórmulas ou algoritmos, a aplicación de procedementos de transformación da información disponible e a interpretación dos resultados.
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional.

## Atención personalizada

Methodologies	Description
Lección maxistral	Exponse dous métodos de atención personalizada: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbihdas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Resolución de problemas	Exponse dous métodos de atención personalizada: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbihdas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.

## Avaliación

	Description	Qualification	Training and Learning Results
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. Permite avaliar as habilidades, os coñecementos e, en menor medida, as actitudes do alumno/a. Avaliarase a participación nos foros.	10 A6 A7 A10	C9 D6
Autoavaliación	Mecanismo no que, por medio dunha serie de preguntas ou actividades, posibilitase que o alumno/a avalie de maneira autónoma o seu grao de adquisición de coñecementos e habilidades sobre a materia, permitindo unha autorregulación do proceso de aprendizaxe persoal.	20	B1 C9 D6

Presentación	Exposición por parte do alumnado, de maneira individual ou en grupo, dun tema relacionado cos contidos da materia ou dos resultados dun traballo, exercicio, proxecto, etc. A través da presentación pódense avaliar coñecementos, habilidades e actitudes.	35	A7	B1	C9	D6
			A8	B2		
			A9	B3		
			A10	B6		
			B7			
Exame de preguntas de desenvolvemento	Proba de avaliación que inclúe preguntas abertas e/ou exercicios, sobre un tema. Os alumnos/as deben desenvolver, relacionar, organizar e presentar os coñecementos que teñan sobre a materia nunha resposta argumentada. Pódese utilizar para avaliar coñecementos e habilidades.	35	A10	B1	C9	D6

### Other comments on the Evaluation

Para superar a materia será necesario alcanzar unha cualificación do 50% ou superior no conxunto das avaliacións da materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) que se realizará en modalidade a distancia nas datas establecidas para ese efecto pola Comisión Académica de Máster. O proceso de avaliación en convocatoria extraordinaria será o mesmo que en convocatoria ordinaria. A presentación e a proba escrita realizaranse utilizando medios telemáticos. O alumno terá a opción de gardar as cualificacións obtidas na convocatoria ordinaria durante o mesmo curso académico.

A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitalo a terceiros) será penalizado outorgándolle directamente unha cualificación de suspenso (0.0) na convocatoria. (Sen prexuízo das posibles medidas que poida tomar a universidade fronte a estes casos).

No caso de que exista algunha diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

## **IDENTIFYING DATA**

### **Systems engineering and ICT project management**

Subject	Systems engineering and ICT project management			
Code	P52M182V01201			
Study programme	Master Universitario en Dirección TIC para la defensa			
Descriptors	ECTS Credits 4	Choose Mandatory	Year 1st	Quadmester 2nd
Teaching language	Spanish			
Department	Fernández Gavilanes, Milagros			
Coordinator	Carreño Morales, Rafael María Fernández Gavilanes, Milagros			
E-mail	mfgavilanes@cud.uvigo.es			
Web	<a href="http://campus.defensa.gob.es">http://campus.defensa.gob.es</a>   <a href="https://moovi.uvigo.gal">https://moovi.uvigo.gal</a>			
General description	The subject of Systems Engineering and ICT Project Management has two aspects. The first focuses on systems engineering and the other on project management, which are interrelated since the development or modification of a new or existing system is a project in itself. In both parts, a theoretical introduction and the analysis of practical cases will be developed.			

## **Skills**

### **Code**

A6	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
A7	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study.
A8	CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
A9	CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way.
A10	CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B2	CG2 - Integrate and apply the knowledge acquired, and possess the ability to solve problems in new or imprecisely defined environments, including multidisciplinary contexts related to their field of study.
B4	CG4 - Being a professional committed to quality, deadlines and the adequacy of solutions, not only in the exercise of the profession but also in the social field, including a commitment to economic, ethical and environmental sustainability.
B5	CG5 - Critically evaluate the structure and validity of reasoning, analyzing, interpreting, and questioning the foundations of ideas, actions, and judgments of oneself or others, before accepting them as valid.
C4	CE4 - Strategically plan, direct, coordinate and technically and economically manage projects in the field of ICTs and information security, applying the current normative and regulatory framework in the technical-economic-legal fields.
D3	CT3 - Incorporate criteria of sustainability and environmental commitment into professional practice. Acquire skills in the equitable, responsible and efficient use of resources.
D4	CT4 - Oral and written communication skills.
D5	CT5 - Autonomous learning and work.

## **Learning outcomes**

Expected results from this subject	Training and Learning Results
LO1: Understand the basic concepts of systems engineering and its structure. Ability to apply them to practical examples and cases.	A6 A7 B2 C4 D5
LO2: Basic knowledge of the main processes, activities and documents of project/programme management.	A6 C4
LO3: Knowledge of the main standards and methodologies for project management, in particular PMBOK and PRINCE2. Introductory knowledge of AGILE methods and practices.	A6 C4

LO4: Basic and introductory knowledge of the most commonly used IT tools in project management.	A6 C4 D5
LO5: Theoretical and practical knowledge of the fundamentals of project planning, execution and control.	A6 A10 B4 C4 D5
LO6: Ability to undertake the planning, programming, monitoring and control of a project in the field of CIS, ICT and SEGINFO.	A7 A8 B2 B4 C4 D3 D4
LO7: Knowledge of the fundamentals of risk management and risk analysis in the framework of a project.	A6 A8 B2 C4 D5
LO8: Ability to develop actions and make decisions that allow a satisfactory response to project risks.	A7 A8 A9 B2 B5 C4 D4

## Contents

### Topic

Topic 1: Systems Engineering	- Introduction - Life Cycle / Models - Validation versus Verification - Structure / Processes: specification, design, development, testing, operation - Integral Life Cycle. Case Study
Topic 2: Project Management / Programme	- Introduction - Life Cycle Project / Product - Concepts, elements and actors of project management - Key processes and activities - Projects versus Programmes - Basic financial concepts
Topic 3: Methodologies and Standards related to Project Management	- PMBOK versus PRINCE2 - AGILE practices and methodologies. Scrum
Topic 4: Project planning, monitoring and control	- Key processes of project management - Case studies and exercises
Topic 5: Project Management Tools	- Classic techniques and tools - Computer tools. Introduction to Microsoft Project - Case studies
Topic 6: Risk Management	- Introduction - Plan Risk Management - Identify Risks - Risk Analysis - Plan Risk Responses - Implement Risk Responses - Monitor Risks - Exercises and case studies

### Methodologies

	Description
Autonomous problem solving	Activity in which students analyse and solve problems and/or exercises related to the subject in an autonomous way.
Previous studies	Research, reading, documentation work and/or autonomously carrying out any other activity that the student considers necessary to enable him/her to acquire knowledge and skills related to the subject. This is usually carried out prior to the classes, laboratory practices and/or assessment tests.
Lecturing	Lecturer's presentation of the contents of the subject being studied, theoretical bases and/or guidelines for a project or exercise to be carried out by the student.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop the appropriate and correct solutions through the exercise of routines, application of formulas or algorithms, application of transformation procedures of the available information and interpretation of the results.
Practices through ICT	Activities for applying knowledge in a given context and acquiring basic and procedural skills in relation to the subject, through the use of ICT.
Presentation	Presentation by the students, individually or in groups, of a topic related to the contents of the subject or of the results of a work, exercise, project, etc.
Seminars	Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject.
Discussion Forum	An activity carried out in a virtual environment in which a variety of current topics related to the academic and/or professional sphere are debated.

### Personalized assistance

Methodologies	Description
Discussion Forum	It will be carried out through the use of telematics systems. Students who wish to do so will be able to ask questions to the teacher in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will take place via videoconference.
Autonomous problem solving	It will be carried out through the use of telematics systems. Students who wish to do so will be able to ask questions to the lecturer in forums or by e-mail. They will also be able to arrange individual tutorials with the teacher, which will take place via videoconference.
Lecturing	It will be carried out through the use of telematics systems. Students who wish to do so will be able to ask questions to the teacher in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer, which will take place via videoconference. While the use of telematics student support is still possible, face-to-face tutoring mechanisms will also be used during this phase.

General description	A arquitectura é a estrutura fundamental sobre a que se asintan os sistemas software. A arquitectura dun sistema software está formada polos seus elementos fundamentais, as propiedades visibles dos mesmos e as relacóns que existen entre eles. Dentro das arquitecturas software empresariais destacan, entre outros, conceptos como as arquitecturas orientadas a servizos (SOA), os servizos web ou a xestión de procesos de negocio BPM (Business Process Management), como solución aos problemas de integración en sistemas cada vez más heteroxéneos e de carácter distribuído.			
	Nesta materia estudaranse devanditos conceptos e a súa aplicación en contornas empresariais sendo o alumno capaz de tomar decisións estratéxicas que integren os mesmos.

### **Code**

A6	CB6 - Posuér e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
A7	CB7 - Que os estudiantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudo.
A8	CB8 - Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos.
A9	CB9 - Que os estudiantes saibam comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades.
A10	CB10 - Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudiando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B1	CG1 - Posuér coñecementos avanzados e altamente especializados e demostrar unha comprensión detallada e fundamentada dos aspectos teóricos e prácticos tratados nas diferentes áreas de estudo.
B2	CG2 - Integrar e aplicar os coñecementos adquiridos, e posuér capacidade de resolución de problemas en contornas novas ou definidas de forma imprecisa, incluíndo contextos de carácter multidisciplinar relacionados co seu ámbito de estudo.
B5	CG5 - Avaliar de maneira crítica a estrutura e validez dos razonamentos, analizando, interpretando e cuestionando os fundamentos de ideas, accións e xuízos propios ou alleos, antes de aceptalos como válidos.
B6	CG6 - Ser capaz de tomar decisións en contornas caracterizadas pola complexidade e incerteza, avaliando as distintas alternativas existentes co obxectivo de seleccionar aquela cuxo resultado esperado sexa máis favorable, xestionando adecuadamente o risco asociado á decisión.
C5	CE5 - Definir e implantar modelos normalizados, establecemento de estándares e metodoloxías de referencia e taxonomía de servizos TIC e de seguridade da información.
C6	CE6 - Planificar e xestionar infraestruturas TIC.
D5	CT5 - Aprendizaxe e traballo autónomos.
D6	CT6 - Manexar apropiadamente recursos de información.

## **Resultados de aprendizaxe**

Expected results from this subject

Training and Learning Results

Identificar os principios económicos da avaliación de políticas e servizos públicos.

RA1. Coñecer as arquitecturas software, a súa tipoloxía, paradigmas, a súa estrutura e características básicas.	A6 A7 A8 A9 A10 B1 B2 B5 B6 C5 C6 D5 D6
RA2. Entender en profundidade o deseño arquitectónico de aplicacións baseadas en servizos e desenvolvemento de solucións tecnolóxicas orientadas á integración de servizos.	A6 A7 A8 A9 A10 B1 B2 B5 B6 C6 D5
RA3. Concibir, despregar, organizar e xestionar servizos en contextos empresariais ou institucionais para mellorar os seus procesos de negocio.	A6 A7 A8 A9 A10 B2 B5 B6 C6 D5
RA4. Valorar a importancia para a organización dunha adecuada arquitectura tecnolóxica baseada en servizos.	A6 A7 A8 A9 A10 B2 B5 C6 D5
RA5. Manexar os estándares de Servizos Web e as tecnoloxías asociadas.	A6 A7 A8 A9 A10 C5 D5 D6

<b>Metodoloxía docente</b>	
	Description
Foros de discusión	Control do avance da aprendizaxe, realizando achegas fundamentadas nos espazos da materia. Recomendacións para lograr os obxectivos da materia a nivel individual. Apoio e axuda na resolución das tarefas propostas.
Resolución de problemas de forma autónoma	Realización de actividades puntuais de carácter non presencial na aula virtual. Periodicamente durante o curso exponerse tarefas, resolución de exercicios, preguntas e tests autoavaliables na aula virtual que deben ser realizadas polos estudiantes de forma individual, autónomo e non presencial, sempre cunha data límite.
Resolución de problemas	Actividade na que se formulan problemas e/ou exercicios relacionados coa materia. O alumnado debe desenvolver as solucións adecuadas mediante a aplicación dos contidos tratados. Utilízase como complemento da lección maxistral e dos traballos de aula.
Prácticas de laboratorio	Actividades de aplicación dos coñecementos a situacións concretas e de adquisición de habilidades básicas e procedimentais relacionadas coa materia obxecto de estudio.
Seminario	Apoio, atención e resolución de dúbidas e/ou cuestións do alumnado.
Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Presencial: presentación, mediante medios audiovisuais, dos contidos teóricos de cada tema. Este método combinarase con exemplos ilustrativos e coa realización de preguntas para motivar e incrementar o interese do alumno. Non presencial: revisión, comprensión e afianzamento dos contidos.

<b>Atención personalizada</b>	
<b>Methodologies</b>	<b>Description</b>
Lección maxistral	1. Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar tutorías individuais co profesor, que se desenvolverán mediante videoconferencia. 2. Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaránse tamén mecanismos de tutoría presencial (individual e/ou grupal).
Foros de discusión	1. Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar tutorías individuais co profesor, que se desenvolverán mediante videoconferencia. 2. Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaránse tamén mecanismos de tutoría presencial (individual e/ou grupal).

Resolución de problemas	1. Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. ## Avaliación

	Description	Qualification	Training and Learning Results			
Foros de discusión	Participación con achegas orixinais e fundamentadas nos foros da materia.	10	A6 A7 A8 A9 A10	B2 B5 B6	C6 D6	D5
Autoavaliación	Tarefas, resolución de exercicios, preguntas e tests *autoevaluables na aula virtual que deben ser realizadas polos estudiantes de forma individual, autónomo e non presencial, sempre cunha data límite.	20	A6 A7 A8 A9	B1 B2 B5	C6 D6	D5
Presentación	Inclúe a preparación dun tema e a súa exposición oral.	30	A6 A7 A8 A9 A10	B1 B2 B5	C6 D6	D5
Exame de preguntas obxectivas	Preguntas directas que o alumnado debe responder de maneira breve en base aos coñecementos que ten sobre a materia.	40	A6 A7 A8 A9 A10	B1 B2 B5	C5 C6	D5 D6

## Other comments on the Evaluation

Utilizarase un mecanismo de avaliação continua, co que se pretende realizar un seguimento da evolución do alumno ao longo do curso, valorando o seu esforzo de maneira global, non puntual, e tentando detectar canto antes dificultades que poidan xurdir no proceso de aprendizaxe.

A táboa a continuación especifica as distintas actividades que levarán a cabo para avaliar o traballo do alumno na materia, así como a ponderación que ditas actividades van ter á hora de calcular a nota final do curso e as competencias relacionadas con cada proba ou actividade. Será necesario obter polo menos o 50% da cualificación para superar a materia.

## Segunda oportunidade

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliação (convocatoria extraordinaria) nas datas establecidas para ese efecto pola Comisión Académica de Máster. A avaliação da convocatoria extraordinaria realizarase en modalidade a distancia, tal e como indica a seguinte táboa:

Sistemas de evaluación		
Denominación	Calificación (%)	Competencias
Actividades de autoavaliación (test)	40%	CB6, CB7, CB8, CB9, CG1, CG2 CG5, CE6, CT5, CT6

Proba escrita	60%	CB6, CB7, CB8, CB9, CG1, CG2 CG5, CE6, CT5, CT6
---------------	-----	--

#### **COMPROMISO ÉTICO:**

**Espérase que os alumnos teñan un comportamento ético adecuado. Si detéctase un comportamento pouco ético (copia, plaxio, uso de dispositivos electrónicos non autorizados ou outros) penalizarase ao alumno outorgándolle directamente unha cualificación de 0 na convocatoria na que se produza.**

**No caso de que exista algunha diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.**

### **Planificación e xestión de infraestructuras TIC**

Subject	Planificación e xestión de infraestructuras TIC			
Code	P52M182V01203			
Study programme	Master Universitario en Dirección TIC para a defensa			
Descriptors	ECTS Credits 4	Choose Mandatory	Year 1	Quadmester 2c
Teaching language	Castelán			
Department				
Coordinator	Fernández Gavilanes, Milagros			
Lecturers	Fernández Gavilanes, Milagros Suarez Lorenzo, Fernando			
E-mail	mfgavilanes@cud.uvigo.es			
Web	<a href="http://campus.defensa.gob.es">http://campus.defensa.gob.es</a>   <a href="https://moovi.uvigo.gal">https://moovi.uvigo.gal</a>			
General description	Esta materia permite aos estudantes aprender os coñecementos e a aplicación dos procesos necesarios para a xestión dunha infraestrutura do TIC aliñada cos requisitos do negocio. Definir os procesos, os puntos de unión e as dependencias asociados co ciclo de vida da xestión das infraestruturas do TIC, entre os que se inclúe os plans estratéxicos, o deseño, a implantación, as operacións, e o soporte e o mantemento.			
	Adquiriranse coñecementos de organización e xestión de proxectos que complementen aos coñecementos de integración de sistemas e redes, sistemas de almacenamento, arquitecturas paralelas e ambientes básicos de instalacións informáticas.			
	Nesta materia estudaranse devanditos conceptos e a súa aplicación en contornas empresariais sendo o alumno capaz de tomar decisións estratéxicas que integren os mesmos.			

## **Competencias**

### **Code**

A6	CB6 - Posuír e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
A7	CB7 - Que os estudantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudo.
A8	CB8 - Que os estudantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos.
A9	CB9 - Que os estudantes saibam comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades.
A10	CB10 - Que os estudantes posúan as habilidades de aprendizaxe que lles permitan continuar estudiando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B1	CG1 - Posuír coñecementos avanzados e altamente especializados e demostrar unha comprensión detallada e fundamentada dos aspectos teóricos e prácticos tratados nas diferentes áreas de estudo.
B2	CG2 - Integrar e aplicar os coñecementos adquiridos, e posuír capacidade de resolución de problemas en contornas novas ou definidas de forma imprecisa, incluíndo contextos de carácter multidisciplinar relacionados co seu ámbito de estudo.
B3	CG3 - Dirixir, planificar, coordinar, organizar e/ou supervisar tarefas, proxectos e/ou grupos humanos. Traballar cooperativamente en equipos multidisciplinares actuando, no seu caso, como integrador/a de coñecementos e liñas de traballo.
B6	CG6 - Ser capaz de tomar decisións en contornas caracterizadas pola complexidade e incerteza, avaliando as distintas alternativas existentes co obxectivo de seleccionar aquela cuxo resultado esperado sexa máis favorable, xestionando adequadamente o risco asociado á decisión.
C6	CE6 - Planificar e xestionar infraestruturas TIC.
D3	CT3 - Incorporar no exercicio profesional criterios de sustentabilidade e compromiso ambiental. Adquirir habilidades no uso equitativo, responsable e eficiente dos recursos.
D4	CT4 - Capacidade de comunicación oral e escrita de coñecementos.

## Metodoloxía docente

	Description
Resolución de problemas de forma autónoma	Actividade na que o alumnado analiza e resolve problemas e/ou exercicios relacionados coa materia de forma autónoma.
Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Exposición por parte dun profesor/a de os contidos da materia obxecto de estudo, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver.
Resolución de problemas	Actividade na que se formulan problemas e/ou exercicios relacionados coa materia. O alumno/a debe desenvolver as solucións adecuadas e correctas mediante a exercitación de rutinas, aplicación de fórmulas ou algoritmos, a aplicación de procedementos de transformación da información dispoñible e a interpretación dos resultados.
Saídas de estudio	Actividades de aplicación dos coñecementos nun contexto determinado nun espazo externo (centro de investigación, laboratorio, museo, institución, empresa, etc.) de interese académico-profesional para o alumnado.
Seminario	Actividade enfocada ao traballo sobre un tema específico, que permite profundar ou complementar nos contidos da materia.
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional.

## Atención personalizada

Methodologies	Description
---------------	-------------

Lección maxistral	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbihdas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Resolución de problemas	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. ## Avaluación

	Description	Qualification	Training and Learning Results			
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. Permite avaliar as habilidades, os coñecementos e, en menor medida, as actitudes do alumno/a. Avaliarase a participación nos foros.	20	A6 A7 A8 A10	B1 B2 B6	C6	D4
Autoavaliación	Mecanismo no que, por medio dunha serie de preguntas ou actividades, posibilitase que o alumno/a avalíe de maneira autónoma o seu grao de adquisición de coñecementos e habilidades sobre a materia, permitindo unha autorregulación do proceso de aprendizaxe persoal.	20	A7	B1 C6	D3	
Presentación	Exposición por parte do alumnado, de maneira individual ou en grupo, dun tema relacionado cos contidos da materia ou dos resultados dun traballo, exercicio, proxecto, etc. A través da presentación pódense avaliar coñecementos, habilidades e actitudes.	30	A6 A7 A8 A9	B1 B2 B3 B6	C6	D4
Exame de preguntas de desenvolvemento	Proba de avaliação que inclúe preguntas abertas e/ou exercicios, sobre un tema. Os alumnos/as deben desenvolver, relacionar, organizar e presentar os coñecementos que teñan sobre a materia nunha resposta argumentada. Pódese utilizar para avaliar coñecementos e habilidades.	30	A6 A7 A8 A9	B1 B2 B3 B6	C6	D3

## Other comments on the Evaluation

Será necesario alcanzar o 50% da cualificación para poder superar a materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) que se realizará en modalidade a distancia nas datas establecidas para ese efecto pola Comisión Académica de Máster. No caso da avaliación na convocatoria extraordinaria, o peso repartirase ao 50 % entre a proba escrita e a presentación do traballo final da materia. Será necesario alcanzar polo menos o 50% da cualificación para poder superar a materia.

A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitalo a terceiros) será penalizado outorgándolle directamente unha cualificación de suspenso (0.0) na convocatoria na que se produza.

No caso de que exista alguma diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

General description	The course of Satellite Communications Systems, Positioning, Remote Sensing and Radionavigation aims to provide students with an overview of the main satellite communications systems. Radionavigation Systems aims to provide students with an overview of the main remote positioning and communication systems. communication and remote positioning systems. The course details the technologies involved, regulatory and safety aspects of this type of systems. regulatory and safety aspects of this type of systems.			

**Skills**

## Code

A6	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
A7	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study.
A8	CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
A9	CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way.
A10	CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B1	CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study.
B2	CG2 - Integrate and apply the knowledge acquired, and possess the ability to solve problems in new or imprecisely defined environments, including multidisciplinary contexts related to their field of study.
B5	CG5 - Critically evaluate the structure and validity of reasoning, analyzing, interpreting, and questioning the foundations of ideas, actions, and judgments of oneself or others, before accepting them as valid.
C12	CISTT1 - Deepen the knowledge of telecommunications systems based on different technologies applicable to the tactical, operational and strategic fields; to fixed and mobile environments; with different types and volumes of data.
C13	CISTT2 - Analyze and optimize the deployment of communication systems in military operating environments.
D4	CT4 - Oral and written communication skills.
D5	CT5 - Autonomous learning and work.

**Learning outcomes**

## Expected results from this subject

## Training and Learning Results

LO1: Understand the mechanisms of satellite propagation and communications.	A6 A7 B1 B2 C12 C13 D4 D5
---	--

LO2: To know the basic operation of the different radionavigation systems existing today.	A8 B1 B2 B5 C12 D4 D5
LO3: To know the basic operation of the different positioning systems currently existing.	A9 B1 B2 C12 D4 D5
LO4: To know the basic operation of the different remote sensing systems.	A10 B1 B2 C12 D4 D5
LO5: To know the different existing systems in the military field, as well as their most remarkable characteristics their most outstanding characteristics.	A9 A10 B1 B2 B5 C12 C13 D4 D5

## Contents

### Topic

Subject 1: Satellite communications	- Historical evolution and generalities - Structure of a satellite communication system - Coverage - Access methods - Link budget - SECOMSAT - Other systems: IRIDIUM, THURAYA, INMARSAT, GLOBALSTAR
Subject 2: Positioning systems	- Global positioning systems (GNSS) - Augmentation systems - Location services based on GSM networks - Indoor positioning systems (IPS) - NAVWAR
Subject 2: Radionavigation systems	- Radiogoniometry - Directional and no directional radiobeacons - ILS/MLS system - Augmented GNSS systems: WAAS, EGNOS and MSAS - Other systems
Subject 4: Teledetection systems	- Components - Classification - Sensors types - Main characteristics - Satellite teledetection systems: radar, SAR and optoelectronics

Problem and/or exercise solving	0	7	7
Laboratory practice	4	0	4

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

<b>Methodologies</b>	
	Description
Lecturing	Presentation by a lecturer of the contents of the subject of study, theoretical bases and/or guidelines for a work or exercise that the student has to develop.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop the appropriate and correct solutions through the exercise of routines, application of formulas or algorithms, application of transformation procedures of the available information and interpretation of the results.
Previous studies	Search, reading, documentation work and/or autonomous performance of any other activity that the student considers necessary to enable the acquisition of knowledge and skills related to the subject. It is usually carried out prior to classes, laboratory practices and/or evaluation tests. This includes the reading and analysis of documents, and the viewing of multimedia resources.
Practices through ICT	Activities for the application of knowledge in a given context and the acquisition of basic and procedural skills related to the subject matter, through the use of ICTs.
Autonomous problem solving	Activity in which students analyze and solve problems and/or exercises related to the subject in an autonomous way.
Seminars	Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject.

<b>Personalized assistance</b>	
<b>Methodologies</b>	<b>Description</b>
Lecturing	Personalized answers to the doubts related to the exposition by the lecturer of the contents of the subject matter, theoretical bases and/or guidelines of a work or exercise that the student has to develop. exercise that the student has to develop
Problem solving	Attention in the distance phase: It will be carried out through the use of telematic resources. Students who wish to do so may ask questions to the lecturer in forums or by e-mail. They will also be able to arrange individual tutorials with the lecturer , which will be developed by videoconference. Personalized comments to the resolution of problems and/or exercises related to the subject.
Seminars	Personalized comments on the work on a specific topic, which allows to deepen or complement the contents of the subject.
Practices through ICT	Personalized attention will be given individually and in person to the activities of application of knowledge in a given context and acquisition of basic and procedural skills in relation to the subject, through the use of ICT.

  

<b>Tests</b>	<b>Description</b>
Laboratory practice	Guidance in the realization of the different laboratory practices related to the syllabus of the course.
Problem and/or exercise solving	Personalized comments and guidance on the work proposed in class, which allow to deepen or complement the contents of the subject.

<b>Assessment</b>		Description	Qualification	Training and Learning Results
Self-assessment	Mechanism in which, by means of a series of questions or activities, the learner is activities, it is possible for the student to evaluate autonomously his or her autonomously their degree of acquisition of knowledge and skills about the the subject, allowing a self-regulation of the personal learning process. personal learning process. There will be two intermediate tests, one hour long, to control the monitoring of the duration, to control the follow-up of the subject. Each test of control has a weight of 20%.	40	A6 A7 A8 A9	B1 C12 D4 B2 C13 B5 A9
Presentation	Presentation by the students, individually or in groups, of a topic related to the contents of the subject or the results of a work, exercise, project, etc.	20	A6 A7 A8 A9 A10	B1 C12 D4 B2 C13 D5 B5
Problem and/or exercise solving	Resolution of different exercises proposed in class on assumptions applicable to each of the topics of the syllabus.	20	A6 A7 A8 A9 A10	B1 C12 D4 B2 C13 D5 B5

Laboratory practice	Evaluation of different laboratory practices related to the course syllabus by means of deliverable reports.	20	A6 A7 A8 A9 A10	B1 B2 C13 D5 B5	C12 D4
---------------------	--	----	-----------------------------	-----------------------------	-----------

#### **Other comments on the Evaluation**

In case of not passing the course in the ordinary call, there would be a second opportunity to pass it in the extraordinary call, which would be carried out in distance mode on the dates established for this purpose by the Academic Committee of the Master. The evaluation of the second call will be carried out in distance mode, through the evaluation of a deliverable (work) which will account for 60% of the grade and the completion of a written test (with development questions and / or test type) using telematic means, which will account for the remaining 40%. It will be necessary to obtain at least 50% of the grade to pass the course. The evaluation process in this second call would be carried out as indicated in the following table

Assessment systems		
Denomination	Qualification(%)	Competences
Evaluation of deliverables (work)	60%	CB6, CB7, CB8, CB9, CB10 CG1,CG2, CG5 CE12,CE13 CT4, CT5
Written test	40%	CB6, CB7, CB8, CB9, CB10 CG1,CG2, CG5 CE12,CE13 CT4, CT5

#### **ETHICAL COMMITMENT :**

Students are expected to engage in appropriate ethical behavior. If unethical behavior (copying, plagiarism, use of unauthorized electronic devices, or other) is detected, the student will be penalized with a 0.0 grade for the current term.

In the event that there is any difference between the Galician/Spanish/English guides related to evaluation the Spanish guide will always prevail.

General description	Esta materia proporciona unha descripción xeral da seguridade nas redes de telecomunicación modernas. Abordaranse contidos como a protección e interceptación das comunicacións, así como a aplicación de distintas tecnoloxías que permitan dispor de comunicacións seguras nos distintos medios de transmisión.			

## **Competencias**

### **Code**

A6	CB6 - Posuér e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación.
A7	CB7 - Que os estudiantes saibán aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudo.
A8	CB8 - Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos.
A9	CB9 - Que os estudiantes saibán comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades.
A10	CB10 - Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudando dun modo que haberá de ser en gran medida autodirixido ou autónomo.
B1	CG1 - Posuér coñecementos avanzados e altamente especializados e demostrar unha comprensión detallada e fundamentada dos aspectos teóricos e prácticos tratados nas diferentes áreas de estudo.
B3	CG3 - Dirixir, planificar, coordinar, organizar e/ou supervisar tarefas, proxectos e/ou grupos humanos. Traballar cooperativamente en equipos multidisciplinares actuando, no seu caso, como integrador/a de coñecementos e liñas de traballo.
B6	CG6 - Ser capaz de tomar decisións en contornas caracterizadas pola complexidade e incerteza, avaliando as distintas alternativas existentes co obxectivo de seleccionar aquela cuxo resultado esperado sexa máis favorable, xestionando adequadamente o risco asociado á decisión.
B7	CG7 - Valorar a importancia dos aspectos de seguridade na xestión de sistemas e información, identificando necesidades de seguridade, analizando posibles ameazas e riscos e contribuíndo á definición e avaliación de criterios e políticas de seguridade.
C14	CISTT3 - Definir, analizar e implantar as medidas de seguridade en sistemas de telecomunicacións en función do dominio da información manexada.
D5	CT5 - Aprendizaxe e traballo autónomos.
D6	CT6 - Manexar apropiadamente recursos de información.

## **Resultados de aprendizaxe**

## Metodoloxía docente

Description

Resolución de problemas de forma autónoma	Actividade na que o alumnado analiza e resolve problemas e/ou exercicios relacionados coa materia de forma autónoma.
Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Exposición por parte dun profesor/a de os contidos da materia obxecto de estudo, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver.
Resolución de problemas	Actividade na que se formulan problemas e/ou exercicios relacionados coa materia. O alumno/a debe desenvolver as solucións adecuadas e correctas mediante a exercitación de rutinas, aplicación de fórmulas ou algoritmos, a aplicación de procedementos de transformación da información dispoñible e a interpretación dos resultados.
Prácticas con apoio das TIC	Actividades de aplicación dos coñecementos nun contexto determinado e de adquisición de habilidades básicas e procedementais en relación coa materia, a través do uso das TIC.
Seminario	Actividade enfocada ao traballo sobre un tema específico, que permite profundar ou complementar nos contidos da materia.
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional.

### Atención personalizada

Methodologies	Description
Lección maxistral	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Resolución de problemas	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Prácticas con apoio das TIC	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial.
Seminario	Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. ### Avaliación

	Description	Qualification	Training and Learning Results			
Prácticas con apoio das TIC	Actividades de aplicación dos coñecementos nun contexto determinado e de adquisición de habilidades básicas e procedementais en relación coa materia, a través do uso do TIC. Permiten avaliar os coñecementos e habilidades do alumno/a. Avaliaranse mediante entregables.	50	A6	B1	C14	D5
			A7	B3		D6
			A8	B6		
			A9	B7		
			A10			
Exame de preguntas de desenvolvimento	Proba de avaliación que inclúe preguntas abertas e/ou exercicios, sobre un tema. Os alumnos/as deben desenvolver, relacionar, organizar e presentar os coñecementos que teñan sobre a materia nunha resposta argumentada. Pódese utilizar para avaliar coñecementos e habilidades.	50	A6	B1	C14	D5
			A7	B3		D6
			A8	B6		
			A9	B7		
			A10			

### Other comments on the Evaluation

Será necesario obter polo menos o 50% da cualificación para superar a materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) que se realizará en modalidade a distancia nas datas establecidas para ese efecto pola Comisión Académica de Máster. O sistema de avaliación na convocatoria extraordinaria será o mesmo que na convocatoria ordinaria, realizándose a entrega de prácticas e a proba escrita mediante medios telemáticos. Será necesario obter polo menos o 50% da cualificación para superar a materia.

A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitalo a terceiros) será penalizado outorgándolle directamente unha cualificación de suspenso (0.0) na convocatoria na que se produza

No caso de que exista algúna diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

## Metodoloxía docente

	Description
Resolución de problemas de forma autónoma	Actividade na que o alumnado analiza e resolve problemas e/ou exercicios relacionados coa materia de forma autónoma.

Estudo previo	Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera otra actividade que o alumno/a considere necesaria para permitirlle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación.
Lección maxistral	Exposición por parte dun profesor/a de os contidos da materia obxecto de estudo, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver.
Resolución de problemas	Actividade na que se formulais problemas e/ou exercicios relacionados coa materia. O alumno/a debe desenvolver as soluciones adecuadas e correctas mediante a exercitación de rutinas, aplicación de fórmulas ou algoritmos, a aplicación de procedementos de transformación da información dispoñible e a interpretación dos resultados.
Foros de discusión	Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional.

### Atención personalizada

Methodologies	Description
Resolución de problemas	Atención na fase a distancia: Levarase a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbidas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia.
Tests	Description
Práctica de laboratorio	Atención na fase presencial: Aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaránse tamén mecanismos de titoría presencial (individual e/ou grupal).

### Avaliación

	Description	Qualification	Training and Learning Results		
Autoavaliación	Mecanismo no que, por medio dunha serie de preguntas ou actividades, posibilitase que o alumno/a avalie de maneira autónoma o seu grado de adquisición de coñecementos e habilidades sobre a materia, permitindo unha autorregulación do proceso de aprendizaxe persoal.	30	A7	B1	C17 B2
Práctica de laboratorio	Actividades de aplicación dos coñecementos nun contexto determinado e de adquisición de habilidades básicas e procedimentais en relación coa materia, a través do uso das TIC. Avaliaranse mediante entregables.	20	A6	B2	C17 A10
Exame de preguntas obxectivas	Proba que avalía o coñecemento e que inclúe preguntas cerradas con diferentes alternativas de resposta (verdadeiro ou falso, elección múltiple, emparexamento de elementos, etc.). Os alumnos/as seleccionan unha resposta de entre un número limitado de posibilidades.	50	A8	B1	C17 A9

### Other comments on the Evaluation

Sendo necesario obter unha calificación mínima dun 50% para superar a materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, terá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) nas datas establecidas a tal efecto pola Comisión Académica de Máster. O proceso de avaliación desta segunda convocatoria realizarase na modalidade a distancia, seguindo o indicado a continuación:

Actividades de autoavaliación (test teoría) - 60%

Actividades de autoavaliación (test prácticas) - 40%

### COMPROMISO ÉTICO :

Espérase que os alumnos teñan un comportamento ético axeitado. Si se detecta un comportamento pouco ético (copia, plaxio, uso de dispositivos electrónicos non autorizados ou outros) penalizarase ao alumno cunha calificación en acta de 0.0 para a convocatoria en curso.

No caso de que exista alguma diferencia entre as guías en galego/español/inglés relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

General description	The subject of Security in information systems will show the techniques, protocols and architectures related to security that exist at the different levels of implementation of a modern information system, with a particular emphasis on the communications part. The subject will focus on the clear exposition of these problems, and their practical resolution through practical study cases.			

## **Skills**

### **Code**

A6	CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.
A7	CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study.
A8	CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.
A9	CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way.
A10	CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous.
B1	CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study.
B2	CG2 - Integrate and apply the knowledge acquired, and possess the ability to solve problems in new or imprecisely defined environments, including multidisciplinary contexts related to their field of study.
B7	CG7 - Assess the importance of security aspects in the management of systems and information, identifying security needs, analyzing possible threats and risks and contributing to the definition and evaluation of security criteria and policies.
C18	CISTI4 - Define, analyze and implement security mechanisms throughout the life cycle of information systems.
D4	CT4 - Oral and written communication skills.
D6	CT6 - Properly manage information resources.

## **Learning outcomes**

Expected results from this subject	Training and Learning Results
LO1: Understand the threats and vulnerabilities inherent in software development by showing how software can be made more secure.	A6
	A7
	A8
	A9
	A10
	B1
	B2
	B7
	C18

LO2: Describe the problems, threats and solutions used at different levels of a communications system/service.	A6 A7 A8 A9 A10 B1 B2 B7 C18
LO3: Describe the modern technical foundations of cryptography on which symmetric key and public key systems are based.	A6 A7 A8 A9 A10 B1 B2 B7 C18
LO4: Study public key infrastructure systems, including in detail how the creation, maintenance, distribution, use, storage and revocation of digital certificates will be addressed.	A6 A7 A8 A9 A10 B1 B2 B7 C18
LO5: Describe new applications and trends in the field of information systems security.	A6 A7 A8 A9 A10 B1 B2 B7 C18 D4 D6

## Contents

### Topic

Topic 1. Introduction to security in information systems.	- Introduction to Data Centres. - Typical structure - Administration of Data Processing Centres
Topic 2. Security in software development.	- sSDLC - Vulnerabilities - Countermeasures
Topic 3. Symmetric key encryption.	- Mathematical principles - Block coders (DES, Triple-DES, AES) - Stream coders (RC4)
Topic 4. Public key cryptography.	- Motivation - Mathematical principles - Diffie-Hellman - RSA - Elliptic Curve Cryptography (ECC)
Topic 5. Digital signatures.	- MAC and Hash systems - MD5 - SHA - HMAC
Topic 6. Key distribution systems and authentication.	- Introduction - Kerberos - X509 - Public key infrastructure (PKI)
Topic 7. Transport and web security.	- Motivation - SSL - TLS - SSH

Topic 8. Security in networks.	<ul style="list-style-type: none"> <li>- IPSec</li> <li>- Firewalls</li> <li>- VPNs</li> <li>- Cloud systems</li> </ul>
Topic 9. Trends in the use of security systems.	<ul style="list-style-type: none"> <li>- Blockchain</li> <li>- Deep web</li> <li>- Anonymization</li> <li>- Cryptocurrencies</li> <li>- Zero Knowledge Proof Cryptography</li> <li>- Deniable Encryption</li> <li>- White box cryptography</li> <li>- Sharing of secrets</li> <li>- Steganography</li> <li>- Quantum cryptography</li> <li>- Electronic voting</li> </ul>

Planning	Class hours	Hours outside the classroom	Total hours
Autonomous problem solving	0	8	8
Previous studies	0	52	52
Lecturing	8	8	16
Problem solving	2	2	4
Practices through ICT	4	0	4
Seminars	3	0	3
Discussion Forum	0	4	4
Self-assessment	0	4	4
Presentation	4	0	4
Essay questions exam	1	0	1

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies	Description
Autonomous problem solving	Activity in which students analyze and solve problems and/or exercises related to the subject autonomously.
Previous studies	Search, reading, documentation work and/or autonomous performance of any other activity that the student considers necessary to enable him or her to acquire knowledge and skills related to the subject. It is usually carried out before classes, laboratory practices and/or evaluation tests.
Lecturing	Exposition by a lecturer of the contents of the subject under study, theoretical bases and/or guidelines of a work or exercise that the student has to develop.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. The student must develop the appropriate and correct solutions by exercising routines, applying formulas or algorithms, applying procedures for transforming the available information and interpreting the results.
Practices through ICT	Activities of application of knowledge in a specific context and acquisition of basic and procedural skills in relation to the subject, through the use of ICTs.
Seminars	Activity focused on work on a specific topic, which allows delving into or complementing the contents of the subject.
Discussion Forum	Activity developed in a virtual environment in which various and current issues related to the academic and/or professional field are debated.

Personalized assistance	
Methodologies	Description
Lecturing	Given the blended nature of the course, we will distinguish two cases: (1) Attention in the distance phase: it will be carried out through the use of telematic means. Students who wish to do so may pose questions to the teaching staff in forums or by email. They may also arrange individual tutorials with the teacher, which will take place via videoconference. (2) Attention in the face-to-face phase: although the use of telematic mechanisms for student attention is still possible, face-to-face tutoring mechanisms will also be used during this phase.
Problem solving	Given the blended nature of the course, we will distinguish two cases: (1) Attention in the distance phase: it will be carried out through the use of telematic means. Students who wish to do so may pose questions to the teaching staff in forums or by email. They may also arrange individual tutorials with the teacher, which will take place via videoconference. (2) Attention in the face-to-face phase: although the use of telematic mechanisms for student attention is still possible, face-to-face tutoring mechanisms will also be used during this phase.

Practices through ICT	Given the blended nature of the course, we will distinguish two cases: (1) Attention in the distance phase: it will be carried out through the use of telematic means. Students who wish to do so may pose questions to the teaching staff in forums or by email. They may also arrange individual tutorials with the teacher, which will take place via videoconference. (2) Attention in the face-to-face phase: although the use of telematic mechanisms for student attention is still possible, face-to-face tutoring mechanisms will also be used during this phase.

Students who wish to do so may pose questions to the teaching staff in forums or by email. They may also arrange individual tutorials with the teacher, which will take place via videoconference. (2) Attention in the face-to-face phase: although the use of telematic mechanisms for student attention is still possible, face-to-face tutoring mechanisms will also be used during this phase.

## Assessment

	Description	Qualification	Training and Learning Results			
Practices through ICT	Activities of application of knowledge in a specific context and acquisition of basic and procedural skills in relation to the subject, through the use of ICT. They allow evaluating the knowledge and skills of the student. They will be evaluated through deliverables.	30	A6 A7 A8 A9 A10	B1 B2 B7	C18	D4
Discussion Forum	Activity developed in a virtual environment in which various and current issues related to the academic and/or professional field are debated. It allows assessing the skills, knowledge and, to a lesser extent, the attitudes of the student. Participation in the forums will be evaluated.	10	A6 A7 A8 A9 A10	B1 B2 B7	C18	
Self-assessment	Mechanism in which, through a series of questions or activities, it is possible for the student to autonomously assess their degree of acquisition of knowledge and skills on the subject, allowing self-regulation of the personal learning process.	10	A6 A7 A8 A9 A10	B1 B2 B7	C18	D4 D6
Presentation	Exhibition by the students, individually or in groups, of a topic related to the contents of the subject or the results of a job, exercise, project, etc. Through the presentation you can assess knowledge, skills and attitudes.	30	A6 A7 A8 A9 A10	B1 B2 B7	C18	D4 D6
Essay questions exam	Assessment test that includes open questions and/or exercises on a topic. Students must develop, relate, organize and present the knowledge they have on the subject in an argued response. It can be used to assess knowledge and skills.	20	A6 A7 A8 A9 A10	B1 B2 B7	C18	D4 D6

## Other comments on the Evaluation

A grade of no less than 50% will be required to pass the subject.

In the case of evaluation in an extraordinary call, the student will have the option of redoing (totally or partially) the following evaluation activities:

- Self-assessment activities (test)
- Deliverables (practices)
- Presentations and/or expositions
- Exam

While participation in forums will be integrated into self-assessment activities.

Those activities that the student decides to repeat will be reassessed, losing the note of the previous call. The written test will be done online.

Fraud or attempted fraud by the student in the evaluation process (copying or plagiarism or its facilitation to third parties) will be penalized by directly awarding a fail grade (0.0) in the call in which it occurs.

In the event that there is any difference between the guides in Galician/Spanish/English related to the evaluation, what is indicated in the teaching guide in Spanish will always prevail.
