| General description | A transformación dixital é unha realidade na que estamos inmersos. Trátase dun proceso global e continuo de carácter exponencial: toda aplicación de tecnoloxías dixitais que provoque unha transformación forma parte do mesmo. Iniciamos un camiño do que apenas podemos albiscar os próximos pasos. Transformación pola vía da innovación, práctica. Transformación de carácter dixital. A innovación que tratamos nesta transformación, con novos aplicativos que afectan a produtos, procesos e procedementos e que se realizan cunha clara intención de mellora e aplicación práctica, son parte intrínseca da mesma. O peso da información e o seu tratamento como recurso, son parte indispensable desta. Falamos de big data, intelixencia artificial, machine learning, condución autónoma, impresión 3D e outras novas tecnoloxías dixitais emerxentes que supoñen novos avances e novos retos. Transformación e tecnoloxías que requieren de profesionais capacitados para implementalas e xestionar á súa vez a transformación nas súas organizacións. | | | |
| | Transformación dixital que interactúa con organizacións e provoca cambios nas mesmas e na sociedade. Cambios nos hábitos do consumidor, cambios na forma na que as organizacións prestan servizos, cambios na forma de consumilos, na seguridade coa que se prestan, os ritmos de desenvolvemento, as implicacións legais, sociais e mesmo éticas. | | | |

Competencias

Code

| | |
|-----|---|
| A6 | CB6 - Posuír e comprender coñecementos que aporten unha base ou oportunidade de ser orixinais no desenvolvemento e/ou aplicación de ideas, a miúdo nun contexto de investigación. |
| A7 | CB7 - Que os estudiantes saibam aplicar os coñecementos adquiridos e a súa capacidade de resolución de problemas en contornas novas ou pouco coñecidas dentro de contextos más amplos (ou multidisciplinares) relacionados coa súa área de estudio. |
| A8 | CB8 - Que os estudiantes sexan capaces de integrar coñecementos e enfrentarse á complexidade de formular xuízos a partir dunha información que, sendo incompleta ou limitada, inclúa reflexións sobre as responsabilidades sociais e éticas vinculadas á aplicación dos seus coñecementos e xuízos. |
| A9 | CB9 - Que os estudiantes saibam comunicar as súas conclusións e os coñecementos e razóns últimas que as sustentan a públicos especializados e non especializados dun modo claro e sen ambigüidades. |
| A10 | CB10 - Que os estudiantes posúan as habilidades de aprendizaxe que lles permitan continuar estudiando dun modo que haberá de ser en gran medida autodirixido ou autónomo. |
| B2 | CG2 - Integrar e aplicar os coñecementos adquiridos, e posuír capacidade de resolución de problemas en contornas novas ou definidas de forma imprecisa, incluíndo contextos de carácter multidisciplinar relacionados co seu ámbito de estudio. |
| B3 | CG3 - Dirixir, planificar, coordinar, organizar e/ou supervisar tarefas, proxectos e/ou grupos humanos. Traballar cooperativamente en equipos multidisciplinares actuando, no seu caso, como integrador/a de coñecementos e liñas de traballo. |
| B5 | CG5 - Avaliar de maneira crítica a estrutura e validez dos razonamentos, analizando, interpretando e cuestionando os fundamentos de ideas, accións e xuízos propios ou alleos, antes de aceptalos como válidos. |
| B6 | CG6 - Ser capaz de tomar decisións en contornas caracterizadas pola complexidade e incerteza, avaliando as distintas alternativas existentes co obxectivo de seleccionar aquela cuxo resultado esperado sexa máis favorable, xestionando adequadamente o risco asociado á decisión. |
| C1 | CE1 - Adquirir coñecementos e aptitudes que permitan desenvolver un liderado eficaz para a transformación dixital dunha organización. |
| D5 | CT5 - Aprendizaxe e traballo autónomos. |
| D6 | CT6 - Manexar apropiadamente recursos de información. |

| Resultados de aprendizaxe | | Training and Learning Results |
|--|--|-------------------------------|
| Expected results from this subject | | |
| Identificar os marcos institucionais e estruturas político-administrativas multinivel | | |
| RA1. Coñecer cal é o proceso de innovación e as claves para o seu éxito. | A6 A7 A8 A10 C1 D6 | |
| RA2. Coñecer un marco sinxelo e de ámbito xeral para innovar e ser creativo en calquera área da organización. | A6 A7 A8 A10 B2 B6 C1 D5 D6 | |
| RA3. Ser capaz de exercer un liderado transformador, capaz de transmitir unha visión. | A6 A7 A8 A9 B2 B3 B5 B6 C1 D5 D6 | |
| RA4. Coñecer e entender a importancia das ferramentas de xestión de coñecemento, vixilancia tecnolóxica e intelixencia competitiva no proceso innovador. | A6 A7 A8 A10 B2 C1 D5 D6 | |

Metodoloxía docente

| | Description |
|--------------------|---|
| Estudo previo | Procura, lectura, traballo de documentación e/ou realización de forma autónoma de calquera outra actividade que o alumno/a considere necesaria para permitirle a adquisición de coñecementos e habilidades relacionadas coa materia. Adóitase levar a cabo con anterioridade ás clases, prácticas de laboratorio e/ou probas de avaliación. |
| Lección maxistral | Exposición por parte dun profesor/a de os contidos da materia obxecto de estudio, bases teóricas e/ou directrices dun traballo ou exercicio que o/a estudiante ten de desenvolver. |
| Estudo de casos | Análise dun feito, problema ou suceso real coa finalidade de coñecelo, interpretalo, resolvelo, xerar hipótese, contrastar datos, reflexionar, completar coñecementos, diagnosticalo e adestrarse en procedementos alternativos de solución. |
| Foros de discusión | Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. |

Atención personalizada

Methodologies Description

| | |
|-------------------|--|
| Lección maxistral | Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Os alumnos que o desexen poderán expor dúbihdas ao profesorado en foros ou mediante correo electrónico. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial. |
| Estudo de casos | Dado o carácter semipresencial do curso, distinguiremos dous casos: (1) Atención na fase a distancia: levará a cabo mediante o uso de medios telemáticos. Tamén poderán concertar titorías individuais co profesor, que se desenvolverán mediante videoconferencia. (2) Atención na fase presencial: aínda que segue sendo posible o uso de mecanismos telemáticos de atención ao alumno, durante esta fase empregaranse tamén mecanismos de titoría presencial. |

Avaluación

| | Description | Qualification | Training and Learning Results |
|--------------------|--|-----------------------------------|-------------------------------------|
| Foros de discusión | Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. Permite avaliar as habilidades, os coñecementos e, en menor medida, as actitudes do alumno/a. Avaliarase a participación nos foros. | 10 A6 A7 A8 A9 A10 | B2 C1 D6 B3 B5 B6 D6 |
| Autoavaliación | Mecanismo no que, por medio dunha serie de preguntas ou actividades, posibilitase que o alumno/a avalíe de maneira autónoma o seu grao de adquisición de coñecementos e habilidades sobre a materia, permitindo unha autorregulación do proceso de aprendizaxe persoal. | 10 A6 A7 A8 A9 A10 | B2 C1 D5 B5 D6 B6 B9 D6 |

| | | | | | | |
|---------------------------------------|--|----|-----------------------------|----------------|----------|----|
| Presentación | Exposición por parte do alumnado, de maneira individual ou en grupo, dun tema relacionado cos contidos da materia ou dos resultados dun traballo, exercicio, proxecto, etc. A través da presentación pódense avaliar coñecementos, habilidades e actitudes. | 40 | A6 A7 A8 A9 A10 | B2 B3 B5 | C1 D6 | D5 |
| Exame de preguntas de desenvolvemento | Proba de avaliación que inclúe preguntas abertas e/ou exercicios, sobre un tema. Os alumnos/as deben desenvolver, relacionar, organizar e presentar os coñecementos que teñan sobre a materia nunha resposta argumentada. Pódese utilizar para avaliar coñecementos e habilidades. | 40 | A7 A8 A9 A10 | B2 B5 B6 | C1 D6 | D5 |

Other comments on the Evaluation

Será necesario obter polo menos o 50% da cualificación para superar a materia.

Aqueles alumnos que non superen a materia deberán acudir á convocatoria extraordinaria, que se realizará na modalidade a distancia nas datas establecidas para ese efecto pola Comisión Académica de Máster. Para superar a materia en devandita convocatoria, deberán presentar un traballo e superar unha proba escrita, do mesmo xeito que sucede na convocatoria ordinaria. Só se lles eximirá dunha destas dúas partes (traballo ou proba escrita) gardando a nota até a convocatoria extraordinaria a aqueles que superasen unha das dúas partes con nota superior a notable, 7. Cada parte, traballo e proba, cualifican o 50% da avaliación final, e será necesario obter polo menos o 50% da cualificación para superar a materia. A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitalo a terceiros) será penalizado outorgándolle directamente unha cualificación de suspenso (0.0) na convocatoria na que se produza.

No caso de que exista algúna diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

| General description | A materia Normativa e lexislación pretende ofrecer aos alumnos unha perspectiva xeral sobre o marco xurídico do sector das telecomunicacións e sobre sociedade da información, incidindo nas cuestións problemáticas, controvertidas que se poden expor desde un punto de vista xurídico ao persoal da AXE destinado no Ministerio de Defensa con responsabilidade no ámbito de dirección ou xestión das tecnoloxías da información e as comunicacións e a seguridade da información. Particularmente, e tendo en conta o novo escenario da transformación dixital da Administración Xeral do Estado e os seus organismos públicos, abordaranse os distintos aspectos relativos á utilización das novas tecnoloxías na comunicación cos ciudadáns, ben no ámbito dos procedementos administrativos ou á marxe dos mesmos, así como a incidencia que ditas cuestións poden expor nos dereitos fundamentais das persoas ou respecto da normativa e principios sobre política de seguridade da información do Ministerio de Defensa. | | | |

Avaliación

| | Description | Qualification | Training and Learning Results | | |
|-------------------------------|---|---------------|-------------------------------|----------------------|--------|
| Foros de discusión | Actividade desenvolvida nunha contorna virtual na que se debate sobre temas diversos e de actualidade relacionados co ámbito académico e/ou profesional. Permite avaliar as habilidades, os coñecementos e, en menor medida, as actitudes do alumno/a. Avaliarse a participación nos foros. | 10 | A7 A8 B5 B6 | B2 | C10 D1 |
| Presentación | Exposición por parte do alumnado, de maneira individual ou en grupo, dun tema relacionado cos contidos da materia ou dos resultados dun traballo, exercicio, proxecto, etc. A través da presentación pódense avaliar coñecementos, habilidades e actitudes. | 30 | A6 A7 A8 A9 A10 | B2 | C10 D1 |
| Exame de preguntas obxectivas | Proba que avalía o coñecemento e que inclúe preguntas pechadas con diferentes alternativas de resposta (verdadeiro ou falso, elección múltiple, emparellamento de elementos, etc.). Os alumnos/as seleccionan unha resposta de entre un número limitado de posibilidades. | 60 | A6 A7 A8 A10 | B2 B3 B5 B6 | C10 D1 |

Other comments on the Evaluation

Será necesario obter polo menos o 50% da calificación para superar a materia.

No caso de que o alumno non consiga aprobar a materia na convocatoria ordinaria, tendrá dereito a unha segunda oportunidade de avaliación (convocatoria extraordinaria) nas datas establecidas para ese efecto pola Comisión Académica de Máster. A avaliación se realizará en modalidade a distancia, e consistirá nunha única proba escrita que suporá o 100% da calificación, sendo necesario obter polo menos o 50% para superar a materia.

Non está permitido falar durante a realización da proba escrita, así como copiar ou utilizar ou facilitar a outro alumno calquera procedemento fraudulento para a realización dos exercicios encomendados. A fraude ou intento de fraude por parte do alumno no proceso de avaliación (copia ou plaxio ou facilitalo a terceiros) será penalizado outorgándolle directamente unha calificación de suspenso (0.0) na convocatoria na que se produza.

No caso de que exista alguma diferencia entre as guías en galego/español relacionada coa avaliación prevalecerá sempre o indicado na guía docente en español.

| General description | The course on Optical and Wireless Communications Systems aims to provide students with a comprehensive and generalist overview of the current state-of-the-art of microwave and fiber based communication systems. The course details the technologies involved, regulatory and safety aspects of this type of systems. | | | |

Skills

Code

| | |
|-----|--|
| A6 | CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context. |
| A7 | CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study. |
| A8 | CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments. |
| A9 | CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way. |
| A10 | CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous. |
| B1 | CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study. |
| B2 | CG2 - Integrate and apply the knowledge acquired, and possess the ability to solve problems in new or imprecisely defined environments, including multidisciplinary contexts related to their field of study. |
| B6 | CG6 - Be able to make decisions in environments characterized by complexity and uncertainty, evaluating the different existing alternatives in order to select the one with the most favorable expected result, appropriately managing the risk associated with the decision. |
| C12 | CISTT1 - Deepen the knowledge of telecommunications systems based on different technologies applicable to the tactical, operational and strategic fields; to fixed and mobile environments; with different types and volumes of data. |
| C13 | CISTT2 - Analyze and optimize the deployment of communication systems in military operating environments. |
| D5 | CT5 - Autonomous learning and work. |
| D6 | CT6 - Properly manage information resources. |

Learning outcomes

| Expected results from this subject | Training and Learning Results |
|--|--|
| LO1. To know the management of the electromagnetic spectrum and the basic elements of a communications system. | A6 A7 A8 A9 A10 B1 B2 C12 D5 D6 |

| | |
|---|---|
| LO2. To know the operation and the characteristic parameters of a radio link. | A6 A7 A8 A9 A10 B1 B2 B6 C12 C13 D5 D6 |
| LO3. To understand the basic operation of wireless networks, as well as the different technologies, existing topologies and standards for the implementation of such networks. | A6 A7 A8 A9 A10 B1 B2 B6 C12 C13 D5 D6 |
| LO4. To understand the operation and main characteristics of mobile and optical networks. | A6 A7 A8 A9 A10 B1 B2 B6 C12 C13 D5 D6 |
| LO5. To understand the operation of software defined radio (SDR), as well as the concepts of interoperability, modes of operation, upgrading and cost associated with this type of technology.. | A6 A7 A8 A9 A10 B1 B2 B6 C12 C13 D5 D6 |
| LO6. To know the different radiocommunication systems existing in the military field, as well as their most outstanding characteristics.. | A6 A7 A8 A9 A10 B1 B2 B6 C12 C13 D5 D6 |

| Laboratory practice | 4 | 0 | 4 |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|----------------------|---|
| | Description |
| Lecturing | Presentation by a lecturer of the contents of the subject of study, theoretical bases and/or guidelines of a work or exercise that the student has to develop. |
| Problem solving | Activity in which problems and/or exercises related to the subject are formulated. The student must develop the appropriate and correct solutions through the exercise of routines, application of formulas or algorithms, application of transformation procedures of the available information and interpretation of the results. |
| Previous studies | Research, reading, documentation work and / or autonomous performance of any other activity that the student considers necessary to enable the acquisition of knowledge and skills related to the subject. It is usually done before lectures, laboratory practices and/or evaluation tests. |
| | It includes the reading and analysis of documents and the viewing of multimedia resources. |

| | |
|----------------------------|---|
| Practices through ICT | Activities for the application of knowledge in a given context and the acquisition of basic and procedural skills related to the subject, through the use of ICT. |
| Autonomous problem solving | Activity in which students analyze and solve problems and/or exercises related to the subject in an autonomous way. |
| Seminars | Activity focused on working on a specific topic, which allows to deepen or complement the contents of the subject. |

Personalized assistance

| Methodologies | Description |
|-----------------------|---|
| Lecturing | Personalized answers to doubts related to the teacher's exposition of the contents of the subject matter, theoretical bases and/or guidelines for a work or exercise that the student has to develop. |
| Problem solving | Personalized comments on the resolution of problems and/or exercises related to the subject matter. |
| Seminars | Personalized comments on the work on a specific topic, which allows to deepen or complement the contents of the subject. |
| Practices through ICT | Personalized attention will be given individually and in person to the activities of application of knowledge in a given context and acquisition of basic and procedural skills in relation to the subject, through the use of ICT. |

Tests

| Tests | Description |
|---------------------------------|--|
| Problem and/or exercise solving | Personalized comments and guidance on the work proposed in class, which allow to deepen or complement the contents of the subject. |
| Laboratory practice | Guidance in the realization of the different laboratory practices related to the syllabus of the course. |

Assessment

| | Description | Qualification Training and Learning Results | | | | |
|---------------------------------|---|---|-----------------------------|----------------|------------|----------|
| Self-assessment | There will be two intermediate tests, one hour long, to control the follow-up of the subject. Each control test has a weight of 20%. | 40 | A6 A7 A8 A9 | B1 B2 B6 | C12 C13 | D6 |
| Presentation | Presentation by the students, individually or in groups, of a topic related to the contents of the subject or of the results of a work, exercise, project, etc. | 20 | A6 A7 A8 A9 A10 | B1 B2 B6 | C12 C13 | D5 D6 |
| Problem and/or exercise solving | Resolution of different exercises proposed in class about applicable to each of the topics of the syllabus. | 20 | A6 A7 A8 A9 A10 | B1 B2 B6 | C12 C13 | D5 D6 |
| Laboratory practice | Evaluation of different laboratory practices related to the subject the syllabus of the course by means of deliverable reports. | 20 | A6 A7 A8 A9 A10 | B1 B2 B6 | C12 C13 | D5 D6 |

Other comments on the Evaluation

It is necessary to obtain at least 50% of the grade to pass the course.

In case the student fails to pass the course in the ordinary call, he/she will have the right to a second evaluation opportunity (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The evaluation of the second call will be carried out in distance mode, through the evaluation of a deliverable (work) that will account for 60% of the grade and the completion of a written test (with development questions and / or test type) using telematic means, which will account for the remaining 40%. It will be necessary to obtain at least 50% of the grade to pass the course..

| Assessment systems | | |
|--------------------|-------------------|-------------|
| Denomination | Qualification (%) | Competences |

| | | |
|-----------------------------------|----|---|
| Evaluation of deliverables (work) | 60 | CB6, CB7, CB8, CB9, CB10 CG1, CG2, CG6 CT5, CT6 CE12, CE13 |
| Written test | 40 | CB6, CB7, CB8, CB9, CB10 CG1, CG2, CG6 CT5, CT6 CE12, CE13 |

Fraud or attempted fraud by the student in the evaluation process (copying or plagiarism or its facilitation to third parties) will be penalized by giving the student a failing grade (0.0) in the exam session in which it occurs.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

| General description | The subject "Broadband Networks" seeks to provide students with an understanding of the nature of multimedia information and the requirements it imposes on the networks that must support its transmission. It intends to show students the general principles of the architecture of broadband networks (local area, access in residential and business environments and WAN) that are used to transmit information with strict requirements (e.g. in terms of bandwidth and latency) such as multimedia traffic. Students are also expected to know the main protocols for sending voice and video, the mechanisms to ensure quality of service (QoS) even when there are interruptions in communication and, in addition, to know examples of current implementations. | | | |

Skills

Code

| | |
|-----|--|
| A6 | CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context. |
| A7 | CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study. |
| A8 | CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments. |
| A9 | CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way. |
| A10 | CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous. |
| B1 | CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study. |
| B2 | CG2 - Integrate and apply the knowledge acquired, and possess the ability to solve problems in new or imprecisely defined environments, including multidisciplinary contexts related to their field of study. |
| B3 | CG3 - Direct, plan, coordinate, organize and/or supervise tasks, projects and/or human groups. Work cooperatively in multidisciplinary teams acting, where appropriate, as an integrator of knowledge and lines of work. |
| C12 | CISTT1 - Deepen the knowledge of telecommunications systems based on different technologies applicable to the tactical, operational and strategic fields; to fixed and mobile environments; with different types and volumes of data. |
| C13 | CISTT2 - Analyze and optimize the deployment of communication systems in military operating environments. |
| D5 | CT5 - Autonomous learning and work. |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

| Methodologies | |
|-----------------------|---|
| | Description |
| Discussion Forum | Activity developed in the virtual forum environment with debates on: - News related to the subject - Technological novelties - Academic articles |
| Previous studies | Search, reading, documentation work and / or autonomously performing any other activity that the student considers necessary to enable the acquisition of knowledge and skills related to the subject. It is usually carried out prior to classes, laboratory practices, evaluation tests and during the completion of work to be presented later. |
| Lecturing | Presentation by a lecturer of the contents of the subject of study, theoretical bases and/or guidelines of a work or exercise that the student has to develop. |
| Presentation | Presentation by the students of the results of a class work related to the subject. |
| Seminars | Activity focused on working on a specific topic, which allows deepening or complementing the contents of the subject. |
| Practices through ICT | Activities for the application of knowledge in a given context and the acquisition of basic and procedural skills related to the subject, through the use of ICT. Practical exercises on simulators on broadband networks, multimedia technologies, delay tolerant networks, etc. will be completed. |

| Personalized assistance | |
|--------------------------------|--|
| Methodologies | Description |
| Lecturing | Students will be able to solve their doubts during the session or later during office hours (using a video call tool). |
| Discussion Forum | Participation in the forums will be monitored by the faculty, who will act as moderators and facilitators. |
| Practices through ICT | The faculty will resolve any doubts that may arise during the practices or during the office hours. |
| Presentation | Students will be able to resolve doubts, using telematic means, during the preliminary study phase of the topic they will present. |
| Seminars | Students will receive personalized attention during the seminars. |

| | Description | Qualification | Training and Learning Results |
|------------------|--|---------------|---|
| Discussion Forum | An activity carried out in a virtual environment in which diverse and current topics related to the academic and/or professional field are debated. It allows the evaluation of the student's skills, knowledge and, to a lesser extent, attitudes. Participation in the forums will be evaluated. | 5 | A6 B1 C12 D5 A7 B2 C13 A8 B3 A9 A10 |

| | | | | |
|--------------------------|--|----|-----------------------------|---------------------------|
| Presentation | Presentation by the students, individually or in groups, of a topic related to the contents of the subject or of the results of a work, exercise, project, etc. Through the presentation, knowledge, skills and attitudes can be evaluated. | 40 | A6 A7 A8 A9 A10 | B1 C12 D5 B2 C13 B3 |
| Practices through ICT | Report on simulator exercises on broadband networks, multimedia technologies, delay tolerant networks, etc. | 5 | A6 A7 A8 A9 A10 | B1 C12 D5 B2 C13 B3 |
| Self-assessment | Mechanism in which, by means of a series of questions or activities, it is possible for the student to evaluate autonomously his/her degree of acquisition of knowledge and skills on the subject, allowing a self-regulation of the personal learning process. | 20 | A6 A7 A8 A9 A10 | B1 C12 D5 B2 C13 |
| Objective questions exam | (*)Proba que avalía o coñecemento e que inclúe preguntas pechadas con diferentes alternativas de resposta (verdadeiro ou falso, elección múltiple, emparellamento de elementos, etc.). Os alumnos/as seleccionan unha resposta de entre un número limitado de posibilidades. | 30 | A6 A7 A8 A9 A10 | B1 C12 D5 B2 C13 |

Other comments on the Evaluation

It will be necessary to reach at least 50% of the grade to pass the course.

In case of detection of plagiarism or unethical behavior in any of the works/tests, the grade for the course will be "fail (0)" and the faculty will communicate the matter to the academic authorities so that they can take the appropriate measures.

Extraordinary call: In case the student fails to pass the course in the ordinary call, he/she will have the right to a second opportunity for evaluation (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The evaluation of the extraordinary call will be carried out remotely. To pass the course it will be necessary to pass the different parts in which the subject is divided: tutored work, practices (to be carried out by the student on his or her computer and a report of results will be delivered) and questionnaires and written test on the contents presented in the lectures.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

| | | | A10 | | | |

Other comments on the Evaluation

It will be necessary to reach 50% of the qualification in order to pass the course. A continuous evaluation mechanism will be used, with which it is intended to monitor the evolution of the student throughout the course, assessing their effort globally. There will be two written tests: one at the beginning of the face-to-face phase, in which the contents taught in the distance phase will be evaluated, which will represent 30% of the grade; and one at the end of the face-to-face phase, in which all the contents of the course will be evaluated (including the contents of the distance phase and the presentational practices), which will represent 40% of the grade. In the event that the student does not manage to pass the course in the ordinary evaluation, he/she will have the right to a second evaluation opportunity (extraordinary evaluation) which will be performed in the distance mode on the dates established for this purpose by the Master's Academic Committee. In this case, the evaluation will consist of a single written test that will account for 100% of the grade, being necessary to obtain at least 50% to pass the course. Fraud or attempted fraud on the part of the student in the evaluation process (copying or plagiarism or its facilitation to third parties) will be penalized by giving the student a grade of 0 in the exam session in which it occurs. Página 4 de 4 In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

Recommendations

Other comments

It is advisable for students taking this course to have a basic knowledge of the operation of computer systems.

IDENTIFYING DATA**Storage and information management**

| Web | http://https://moovi.uvigo.gal | | | |
| General description | The Storage and Information Management course aims to offer students a comprehensive and general overview of the current state of the models, techniques and tools for data storage, analysis, presentation and management. | | | |

Skills**Code**

| | |
|-----|--|
| A6 | CB6 - Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context. |
| A7 | CB7 - That students know how to apply the acquired knowledge and their ability to solve problems in new or poorly understood environments within broader (or multidisciplinary) contexts related to their area of study. |
| A8 | CB8 - That students are able to integrate knowledge and face the complexity of formulating judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments. |
| A9 | CB9 - That students know how to communicate their conclusions and the knowledge and ultimate reasons that support them to a specialized and unspecialized public in a clear and unambiguous way. |
| A10 | CB10 - That students possess the learning skills that allow them to continue studying in a way that will be largely self-directed or autonomous. |
| B1 | CG1 - Possess advanced and highly specialized knowledge and demonstrate a detailed and well-founded understanding of the theoretical and practical aspects dealt with in the different areas of study. |
| B5 | CG5 - Critically evaluate the structure and validity of reasoning, analyzing, interpreting, and questioning the foundations of ideas, actions, and judgments of oneself or others, before accepting them as valid. |
| C16 | CISTI2 - Manage information as a strategic asset in the storage, volumetric and intelligence aspects of the data. |
| D4 | CT4 - Oral and written communication skills. |
| D5 | CT5 - Autonomous learning and work. |
| D6 | CT6 - Properly manage information resources. |

Learning outcomes

| Expected results from this subject | Training and Learning Results |
|---|--|
| LO1: Know the persistent data storage systems and infrastructures, their typology, structure and basic operation. | A6 A10 B1 B5 C16 D4 D5 D6 |
| LO2: Distinguish structured and unstructured data and know the techniques and tools that allow the storage and management of each type, such as relational databases and information retrieval systems. | A6 A10 B1 B5 C16 D4 D5 D6 |

| | |
|--|--|
| LO3: Know the techniques and tools that allow the efficient storage and processing of large volumes of data. | A6 A10 B1 B5 C16 D4 D5 D6 |
| LO4: Understand the data mining process, its main stages and the techniques used in it to extract knowledge from the information provided by data. | A6 A7 A10 B1 B5 C16 D4 D5 D6 |
| LO5: Know the basic principles on which data visualization techniques are based and their use when designing user interfaces that allow information to be presented effectively. | A6 A9 A10 B1 B5 C16 D4 D5 D6 |
| LO6: Assess the importance for the organization of adequate data management and the elements that are involved in it. | A7 A8 A9 B1 B5 C16 D4 D5 D6 |

Contents

| Topic | |
|--|---|
| Persistent data storage | - Types of persistent storage systems - Data storage infrastructures |
| Databases and information retrieval systems | - Structured and unstructured data - Relational data model - Query languages - Information retrieval techniques - Tools |
| Management of large volumes of data (Big data) | - Definition and motivation - Paradigms of distributed data processing - Tools |
| Data mining | - Stages of the data mining process - Data analysis techniques - Tools |
| Data visualization | - Basic principles of data visualization - User interfaces |

Planning

| | Class hours | Hours outside the classroom | Total hours |
|--------------------------|-------------|-----------------------------|-------------|
| Previous studies | 0 | 42 | 42 |
| Lecturing | 12 | 8 | 20 |
| Discussion Forum | 0 | 4 | 4 |
| Presentation | 4 | 0 | 4 |
| Objective questions exam | 1 | 0 | 1 |
| Self-assessment | 0 | 4 | 4 |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

| Description | |
|------------------|---|
| Previous studies | Search, reading, documentation work and / or autonomous development of any other activity that the student considers necessary to allow him / her to acquire knowledge and skills related to the subject. It is usually carried out before classes, laboratory practices and / or evaluation tests. |
| Lecturing | Presentation by a lecturer of the contents of the subject under study, theoretical bases and / or guidelines of a work or exercise that the student has to develop. |
| Discussion Forum | Activity carried out in a virtual environment where a variety of current issues related to the academic and / or professional field are debated. |

Personalized assistance

Methodologies Description

| | |
|-----------|--|
| Lecturing | Given the blended nature of the course, we will distinguish two cases: (1) Attention in the distance phase: it will be carried out through the use of telematic means. Students who wish to do so may raise questions to the faculty in forums or by email. They will also be able to arrange individual tutorships with the lecturer, which will take place via videoconference. (2) Attention in the face-to-face phase: although the use of telematic mechanisms is still possible, during this phase face-to-face tutoring mechanisms will also be used. |
|-----------|--|

Assessment

| | Description | Qualification | Training and Learning Results | | | |
|--------------------------|---|---------------|-------------------------------|----------|-----|----------------|
| Discussion Forum | Activity carried out in a virtual environment where a variety of current issues related to the academic and / or professional field are debated. It allows evaluating the skills, knowledge and, to a lesser extent, the attitudes of the student. Participation in the forums will be evaluated. | 10 | A9 B5 | B1 D5 | C16 | D4 |
| Presentation | Presentation by the students, individually or in groups, of a topic related to the contents of the course or the results of a work, exercise, project, etc. Through the presentation, knowledge, skills and attitudes can be evaluated. | 40 | A6 A7 A8 A9 A10 | B1 B5 | C16 | D4 D5 D6 |
| Objective questions exam | Test that assesses knowledge and includes closed questions with different answer alternatives (true or false, multiple choice, pairing of elements, etc.). Students select an answer from a limited number of possibilities. | 30 | A6 A10 | B1 B5 | C16 | D5 |
| Self-assessment | Mechanism in which, through a series of questions or activities (in this case, through a series of objective tests) it is possible for the student to independently evaluate their degree of acquisition of knowledge and skills on the subject, allowing a self-regulation of the personal learning process. | 20 | A6 A10 | B1 B5 | C16 | D5 |

Other comments on the Evaluation

It will be necessary to obtain at least 50% of the grade to pass the subject in ordinary call. In the event that the student fails to pass the subject in the ordinary call, they will have the right to a second evaluation opportunity (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The evaluation of the extraordinary call will be carried out remotely, through the evaluation of a deliverable that will account for 60% of the grade and the completion of a written test (with written questions and / or multiple choice) using the e-learning platform, which will mean the remaining 40%. It will be necessary to obtain at least 50% of the grade to pass the course. Fraud or attempted fraud by the student in the evaluation process (copying or plagiarism or its facilitation to third parties) will be penalized by directly granting a failure grade (0.0) in the call in which it occurs. In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

| General description | Preparation and defence of an individual, original work of sufficient level and complexity, in which the student applies the knowledge acquired during the course of the master's degree. The subject of the work may be proposed by the student or defined by his/her academic tutor and, in any case, it must be related to the contents of the master's degree, either with the common module or with the specialised module selected by the student. | | | |
| Its definition and contents are explained more extensively in the regulations for the Master's Final Dissertation (TFM) approved by the Master's Academic Committee (CAM) and ratified by the Centre Board, the content of which can be consulted on the website of the Defense University Center, in the section dedicated to the DIRETIC Master's Degree. | | | | |

Topic

| | |
|-----------------------------|--|
| Master's Final Dissertation | <p>Preparation and defence of a project in which the student integrates and applies the knowledge acquired during the course of the master's degree. The subject of the work must be related to the contents previously covered in one or more subjects of the programme, either from the common module or from the intensification that the student has taken. Thus, the work may correspond to one of the following thematic profiles:</p> <p>1) Management and direction: Technical, organisational and/or economic studies relating to equipment, systems, services, etc., dealing with any of the aspects of design, planning, management and/or operation of ICT systems, including aspects of security management.</p> <p>2) Technical: theoretical/practical, computational or experimental work, related to any of the technological aspects dealt with in the master's degree programme, whether in the field of telecommunications systems, information systems or security.</p> <p>The contents of each project will be defined in individual proposals formulated by students or offered by lecturer-directors, as stated in article 10 of the regulations for the Master's Thesis. Each project will have a different content.</p> |

| Presentation | 1 | 0 | 1 |
| Mentored work | 9 | 140 | 149 |

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

| Description | |
|---------------|--|
| Presentation | Presentation by the students in front of an examining board of the content of the tutored work. |
| Mentored work | Work tutored by one or more directors, in which the student integrates and applies the knowledge acquired during the course of the master's degree. The subject of the work must be related to the contents previously covered in one or more subjects of the programme, either from the common module or from the intensification that the student has taken. |

Personalized assistance

Methodologies Description

| | |
|---------------|---|
| Mentored work | The supervised work of the TFM involves tutoring meetings both in the distance and face-to-face phases, if possible, on a regular basis. These meetings will allow the correct orientation and monitoring of the work carried out by the student. |
| Presentation | In order to prepare for the defence of the supervised dissertation in front of an examining board, meetings will be held to prepare for the defence of the dissertation. |

Assessment

| Description | | Qualification Training and Learning Results | | | | |
|---------------|---|---|-----------------------------|----------------------|-----------------------|----|
| Presentation | Presentation of the TFM by the students, individually. Knowledge, skills and attitudes can be assessed through the presentation. | 30 | A6 A7 A8 A9 A10 | B1 B2 B4 B6 | C11 D4 D5 D6 | D1 |
| Mentored work | Text or document prepared on the assigned topic of the dissertation that must be written following established rules of style and length. It allows the evaluation of the student's skills, knowledge and, to a lesser extent, attitudes. | 70 | A6 A7 A8 A9 A10 | B1 B2 B4 B6 | C11 D4 D5 D6 | D1 |

Other comments on the Evaluation

It will be necessary to obtain at least 50% of the grade to pass the subject.

In the event that the student does not manage to pass the subject in the ordinary call, he/she will have the right to a second opportunity for assessment (extraordinary call) on the dates established for this purpose by the Master's Academic Committee. The evaluation of the extraordinary call will be carried out in distance mode, and in it the student will have the opportunity to re-submit the report of his work and make (via videoconference) the presentation of this, being the weight of each activity in the final grade, and the minimum required to pass the subject as indicated above for the ordinary call.

In the event of awarding a failing final grade, the assessment panel will attach a report with the appropriate recommendations to the student and the directors for the improvement of the work in a subsequent assessment.

ETHICAL COMMITMENT:

As indicated in the current regulations, the TFM must be an individual and original work. For this reason, work carried out by third parties, or whose content reproduces directly, in a significant percentage, work carried out by third parties or by the student him/herself in any other subject of any degree or university, may not be presented as such. If this type of behaviour is detected, the student will be penalised with a grade of 0.0.

In the case of any difference between the Galician/Spanish/English guides related to the evaluation, the Spanish guide will always prevail.

Recommendations

Other comments

Students must have successfully passed the other subjects on the programme (including those in their chosen speciality) before proceeding to the defence of the dissertation.

The preparation and defence of the TFM may be carried out in Spanish or Galician, at the student's choice. In addition to these, the preparation and defence of the TFM in English will be allowed to those students who wish to do so and who can prove that they have a level equivalent to B2 of the Common European Framework of Reference for Languages.

The evaluation of the TFM (both the report and the presentation and defence) will be carried out by a panel appointed by the Master's Academic Committee and made up of lecturers from the programme and/or professionals from outside the programme who work in the thematic area of the Master's degree.

It is recommended to consult the Master's Thesis Regulations, which specify other aspects of interest regarding enrolment, the nature of the proposal, mechanisms for submission and assessment of the work, etc.
