### Avaliación

	Description	Qualification	Training and Learning Results
Resolución de problemas	EXAME PRÁCTICA: resolución de supostos prácticos sobre a materia; a chave é a motivación e argumentación do alumnado ao enfrontarse a un caso hipoteticamente real ao que ten que dar unha solución ARGUMENTADA	30	
Exame de preguntas obxectivas	Proba obxectiva poderá consistir nun test, no desenvolvemento de unha ou varias preguntas ou nun 'falso práctico' (resposta teórica sobre un caso práctico). O alumnos empregará os coñecementos adquiridos polo estudo, participación nas clases e avaliación continua.	30	
Resolución de problemas e/ou exercicios	AVALIACIÓN CONTINUA: resolución de casos prácticos insertos en diversos temas da materia. Resolución de tests insertos en diversos temas da materia	40	

### Other comments on the Evaluation

A nota acadada na avaliación continuaterá un peso do 40% na cualificación global.A cualificación obtida no exame final terá un peso específico do60% na nota global. Para poder presentarse ao exame final e respectar a nota deavaliación continua

será imprescindible que: (1) o estudante teña realizado todas as probas de avaliación continua; e (2) acadar a superación das probas nas que consta a avaliación continua. Se non se cumpren ambos os requisitos, o alumno deberá realizar a proba final na modalidade que se indica ao final deste apartado. Para que a nota da avaliación continua se sume á do exame final, será necesario que o alumno acade a superación deste último. O alumnado que non supere a avaliación continua poderá presentarse ao exame final pero deberá superar unha parte específica na que se avaliarán as competencias traballadas na avaliación continua que non superaron.

## Other comments on the Evaluation

An essay and several practical activities will be assigned throughout the course. Moreover, an additional final activity and exam with objective questions will take place on official dates.

There are two ways to pass this subject:

1. Continuous assessments include practical activities (90% of the final grade) and the final test exam (10% of the final

grade).

2. A final exercise includes the final test exam (50% of the final grade) and several practical activities (50% of the final grade).

Students are expected to follow the first option ("continuous assessments").

Exceptionally, and always by previous request, students may do the final examination during tutoring hours.

**Second call:** The second call will be a single exercise, including a test exam (50% of the final grade) and several practical activities (50% of the final grade).

**Warning:** No grades will be saved for future calls.

### Other comments on the Evaluation

Para superar a materia é necesario ter algunha proba de avaliación continua, do contrario aínda que se superara o exame de preguntas obxectivas, non se podería superar globalmente a materia.

Na segunda oportunidade (convocatoria extraordinaria) gardarase a nota das actividades de avaliación continua e a proba de preguntas obxectivas será similar á realizada na convocatoria ordinaria (tipo test sobre todo o temario penalizando as respostas incorrectas).

<b>Methodologies</b>	
	Description
Lecturing	Exhibition by the lecturer of the contents of the subject, theoretical bases and/or guidelines for doing a work, exercise or project to develop by the students. Teaching pills and videoconference class sessions are part of this methodology.
Programmed instruction	Teaching material provided to students that involves reading specialized scientific-technical documentation and that cannot be traced back to the master class methodology.
Problem solving	Activity in which problems and/or exercises related to the subject are formulated. It is usually used as a complement to the master class
Case studies	Method through which students learn to apply the appropriate legal rules to solve certain practical problems. Students must choose the correct rules and interpret them properly, for each particular situation. This contributes to show the practical importance of the subject, and helps students to develop the understanding of legal texts
Autonomous problem solving	Students are at the centre of learning, being able to solve certain problems or challenges autonomously. Professors support students on the path to the solution, as a guide or supervisor
Discussion Forum	Spaces for academic discussions that contribute to the development of the strategic critical thinking form dialogue. The professor facilitates, advises and guides to the students so that they know how to work with the appropriate sources of information.

### Other comments on the Evaluation

The program included in this guide ("Contents") is a short version of the complete program which will be object of the assessment and deliver to the students when the course will start.

- First call:**
- 1.- At the beginning of the course, the students must communicate if they are going to follow the continuous assessment process. To that aim, it would be necessary to send a binding signed document.
  - 2.- The students that follow the continuous assessment process shall be evaluated according to the previous criteria: final exam (60%), objective examination of questions (20%) and case studies (20%). In the final exam, the theoretical exam will carry a weight of 80% and the practical exam will carry a weight of 20%. It is necessary to achieve 4 out of 10 points in the exam in order to take into account the qualifications obtained under the continuous assessment process. If the students do not reach the minimum score, their final qualification will be the exam result.
  - 3.- The students that do not follow the continuous assessment process shall be graded in the following way: theoretical exam (70%) and practical exam (30%). This final exam will be different than the exam carried out by the students that follow the continuous assessment process.
  - 4.- The final exam will be held on the date and time indicated in the exam calendar for the 2022/2023 academic year, approved by the Faculty Board. The exam will be done using both Moovi platform and Campus Remoto of the University of Vigo.

#### Second call:

- 1.- Students must pass a final written exam.
- 2.- Grades obtained by the students that followed the continuous assessment process will be taken into account. The final exam will represent the 60% of the final score, corresponding the remaining 40% with the qualification obtained through the "continuous evaluation" system. It is necessary to achieve 4 out of 10 points in the theoretical exam in order to take into account the qualifications obtained under the continuous assessment process. If the students do not obtain the minimum score, their final qualification will be the exam result.
- 3.- The students that do not follow the continuous assessment process shall be graded in the following way: theoretical exam (80%) and practical exam (20%). This final exam will be different than the exam carried out by the students that follow the continuous assessment process.
- 4.- Students who had followed the system of "continuous evaluation", and did not pass the subject at the first opportunity nor at the second one, are entitled to keep the qualification obtained through that system for the following academic year (2023-2024).
- 5.- The final exam will be held on the date and time indicated in the exam calendar for the 2022/2023 academic year, approved by the Faculty Board. The exam will be done using both Moovi platform and Campus Remoto of the University of Vigo.

#### FINAL CALL:

Students shall pass a one-off exam that consists of two parts: exam (70%) and written practical exam (30%).

### Other comments on the Evaluation

#### EVALUATION MODALITY CHOICE

Students may choose to be evaluated through the continuous evaluation system, or alternatively opt for Global Evaluation. The default evaluation is continuous evaluation. The students will be able to choose the global evaluation according to the procedure and the term established by the center. Choosing a global evaluation implies waiving the right to continue evaluating through the remaining continuous assessment activities and the qualification obtained up to that moment in any of the tests that have already taken place.

## **CONTINUOUS EVALUATION**

It is the evaluation system that is applied to students if they do not expressly waive continuous evaluation. The following exams will be carried out throughout the course:

- Exam of objective questions (35%). Two multiple choice tests will be carried out on the Moovi platform according to the deadlines established in the subject schedule.
- Development questions exam 1 (30%). There will be a mid-term theoretical-practical exam on the Moovi platform. It will be done during class time. The date will be communicated through Moovi.
- Self-assessment (5%): There are different self-assessment activities scheduled on the Moovi platform for each of the topics of the subject.
- Development questions exam 2 (30%): A theoretical-practical exam will be carried out on the same day as the official global evaluation date of the first opportunity. It will be done on the Moovi platform.

### **2nd chance**

The form of evaluation in the second call is the same as in the first, and it is not possible to change the type of evaluation. In this case, the students will have the opportunity to recover those exams that they had not passed in the first call (grade less than 5) as well as those that they had not taken. For the rest of the exams, the grade obtained in the first call will be kept. The deadlines will be indicated through the Moovi platform.

### **Calculation of the final grade**

The final grade will be calculated taking into account the following:

- In the sum of the qualifications of the exams of development questions 1 and 2 is less than 4 out of 10, the final qualification will be the result of the sum of these two exams.
- In the sum of the qualifications of the development questions exams 1 and 2 is equal to or greater than 4 out of 10, the final qualification will be the result of the sum of the qualifications obtained in the development questions exams 1 and 2, self-assessment and examination of objective questions.

## **GLOBAL EVALUATION**

In case of express resignation to the continuous evaluation, the students will be evaluated by two exams (objective questions exam and development questions exam) that will be 100% of the qualification of the subject. This written test will be carried out on the Moovi platform. Given the length of the exam, the students who take the global evaluation must have 3 hours to carry them out from the official start time of the subject exam according to the official calendar. The dates and times of the global assessment exam (first and second chance) are those specified in the assessment test calendar approved by the Faculty Board for the 2023/24 academic year. In case of conflict or disparity between exam dates, those published on the Faculty website <http://webfdxp.webs.uvigo.es/gl/docencia/exames/> will prevail.

## **NOT PRESENTED**

Students who do not participate in the continuous evaluation or the global evaluation will appear in the minutes as not presented.

## **NEXT COURSES**

If the subject is not passed in the 2023-24 academic year, the student must take it again, adapting to the teaching guide that is in force for the academic year in question and, therefore, will not retain any of the grades obtained in the present course.

## **RECOMMENDATIONS**

The information on the evaluation exams, their format, length, evaluation rubric and delivery channels will be detailed through the Moovi platform. It is the responsibility of the student or student to be attentive to the information uploaded and collect the specific and complementary information that is necessary to pass the subject.

Students are recommended to take into account Title VII (On the use of illegal means), of the Regulations on the Evaluation, qualification and quality of teaching and the student learning process:

Os sistemas de avaliación estarán divididos en dous grandes grupos ou modalidades: metodoloxías de avaliación continua e metodoloxías de avaliación global.

O estudantado terá dereito a elixir o tipo de sistema co que será avaliado dentro de cada materia, por defecto entenderase que se acolle ao sistema de avaliación continua, sen prexuízo da obriga de poñer probas de avaliación global, como alternativa e sempre dentro da mesma oportunidade de avaliación, a disposición do estudantado que renuncie á avaliación continua.

A nota final do curso (para primeira e segunda oportunidade) será a suma da nota obtida nas probas de avaliación realizadas ao longo do cuadrimestre (cunha ponderación do 60% sobre o total), e da nota obtida nunha última proba que coincidirá coa data da AG en primeira oportunidade (cunha ponderación do 40% do total).

Os exames realizaránse nas datas oficiais de exame para cada oportunidade de avaliación establecida no calendario académico.

En ambos casos o alumnado, tanto en continua como en avaliación global, o alumnado ten dereito a acadar o 100 da puntuación

O exame configúrase como unha actividade final da avaliación continua.

Como se pode ver na metodoloxía da lección maxistral, valorase a asistencia a clase e a participación activa desde o espírito crítico e o debate sousegado e cortés cos compañeiros/as.

Tamén, como experiencia de innovación docente, no apartado de resolución de problemas ou estudos de casos, poderá

desenvolverse unha actividade de innovación docente seguindo a metodoloxía de "cliente misterioso" que no caso da Administración pública podemos traducir en "persoa usuaria misteriosa".

Será requisito necesario para o desenvolvemento da materia que o profesorado da mesma poida dispoñer dunha FOTOGRAFÍA actualizada do alumnado que deberán subir á plataforma a comezos de curso, e sempre antes do día 30 de setembro\*.

### Metodoloxía docente

	Description
Lección maxistral	Exposición por parte do docente dos contidos da materia obxecto de estudo, as súas bases teóricas e directrices principais, contidos que deberán ser estudados polo alumnado e que serán obxecto de avaliación.
Estudo de casos	Formulación e resolución de casos prácticos ao fin de levar á práctica os contidos teóricos da materia. A tal efecto, o docente propondrá ao alumnado a resolución de feitos, supostos, casos, sentenzas, etc, coa finalidade de coñecelos, interpretalos, resolvelos, así como reflexionar sobre os mesmos, contrastar datos, completar os seus coñecementos e adestrarse en procedementos alternativos de solución.
Foros de discusión	Entrevistas/Conversacións/resolución de dúbidas nas sesións presenciais que o docente mantén co seu alumnado para asesoramento e desenvolvemento das distintas actividades na que se estrutura a materia e do proceso de aprendizaxe
Instrucción programada	Material docente facilitado ao alumnado que implique lectura de documentación científico-técnica especializada e que non se poida reconducir á metodoloxía lección maxistral.
Resolución de problemas de forma autónoma	O alumnado sitúase no centro da aprendizaxe, sendo capaz de resolver de forma autónoma certos problemas ou retos. O profesorado apoia ao alumnado no camiño á solución, a modo de guía ou supervisor.

### Atención personalizada

#### Methodologies Description

Estudo de casos	Os estudantes, tanto da modalidade presencial como semipresencial poderán resolver dúbidas sobre algún aspecto da materia (contido, traballo ou práctica), así como a atención ás súas necesidades e consultas relacionadas co estudo e / ou cuestións relacionadas coa disciplina, que proporciona orientación, apoio e motivación no proceso de aprendizaxe

### Other comments on the Evaluation

a) Avaliación continua. Para poder optar por este sistema, deberá acreditar asistencia ao 80 % das clases teóricas e prácticas. En caso contrario, sempre poderá acollerse ao sistema de avaliación final.

b) Avaliación final. O alumnado que non se acolla ao sistema de avaliación continua, será avaliado nun exame final. Trátase dunha proba escrita, de carácter teórico e práctico, sobre todos os contidos da materia e representará o 100% da nota final, na que a parte teórica terá un valor do 70 por 100 e a práctica dun 30 por 100.

CONVOCATORIA COMÚN DO MES DE XULLO:

A nota obtida na avaliación continua desenvolvida durante o curso conservarase para a convocatoria do mes de xullo. Con todo, se non superase a materia nas dúas citadas convocatorias do curso académico, o/a alumno/a tería que someterse a un novo proceso de avaliación continua, agás que opte pola avaliación final teórica e práctica.

CONVOCATORIA FIN DE CARREIRA:

Na convocatoria fin de carreira o/a alumno/a será avaliado/a nun único exame escrito, de carácter teórico e práctico e que representará o 100% da nota final (70 por 100 a teoría e 30 por 100 a práctica) .

As datas de exames son aprobadas pola Xunta da Facultade e publicadas na web da Facultade.

### Other comments on the Evaluation

1. Students enrolled in the \*blended modality undertake, with the teaching team, to follow a continuous assessment regimen \*blended", which implies face-to-face or virtual participation in the activities that the teaching staff indicates for the dictated modality.

2. The blended modality supposes the continuous evaluation of the students' learning. In general, the compulsory final test will take place in person on the date and time established in the examination calendar approved by the Faculty Board, accounting for 60% of the overall grade. This final exam will consist of a theoretical test and a written practical test. The remaining 40% will correspond to the continuous evaluation, which can be done either through virtual means or by attending the practical sessions.

3. Students who do not participate in more than 80% of the "continuous blended assessment" activities proposed by the teaching staff will be assessed 100% based on two results obtained in the final theoretical-practical test.
