Educational guide 2021 / 2022

# (\*)Información básica

(\*)

O grao en Xeografía e Historia proporciona ao alumnado unha serie de competencias que integran a aprendizaxe de coñecementos, a adqusiciónde habilidades e destrezas e a formación en actitudes e valores. Na liña doutras titulacións recoñecidas nas universidades europeas, ademáis de englobar contidos das disciplinas de Xeografía, Historia e Historia da arte, a oferta da nosa Facultade dota ao alumnado dunha serie ampla de competencias xerais e específicas.

Grao Xeografía e Historia (Plano 2014/15)

Destaca o **carácter humanístico** das disciplinas cunha longa e consolidada traxectoria académica e universitaria, e a súa capacidade para coñecer a orixe e a evolución de moitas das realidades culturais do noso tempo. En conxunto ofertamos unha formación básica en contidos interdisciplinares relativos ao coñecemento da estrutura diacrónica do pasado, das coordenadas espazo-temporais, interrelacionadas coas xeográficas e artísticas.

A formación inclúe ámbitos temáticos e territoriais específicos e contidos instrumentais, a través das **prácticas** que os nosos estudantes realizan en diversas institucións e empresas. O coñecemento do noso pasado permite achegarse as ferramentas analíticas e conceptuais que a súa vez incitan á reflexión, á crítica e ao respecto pola diversidade e a alteridade; en definitiva o coñecemento doutras realidades, moi variadas fomenta os valores humanos e achega principios éticos tan necesarios na sociedade actual.

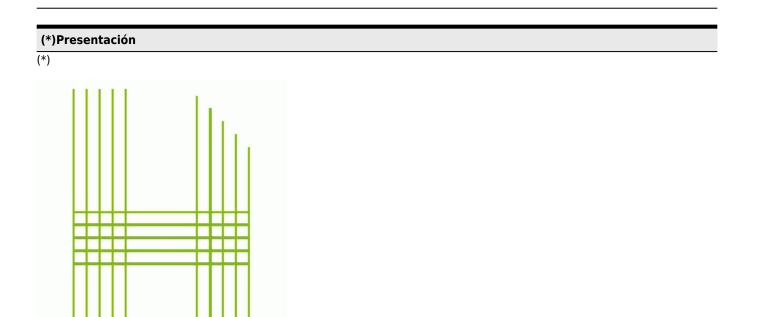

O carácter multidisciplinar e polivalente dos estudos (Historia, Arte e Xeografía) capacita para un **amplo abanico de saídas profesionais** aos seus egresados, que resultan tan competitivos como os especializados nunha soa das disciplinas humanísticas, tendo en conta da cada vez maior flexibilidade do actual mercado laboral entre titulacións e postos de traballo. Os servizos educativos, os servizos da administración, os medios de comunicación, os centros de educación superior e secundaria, e un longo espectro de institucións e empresas, proporcionan un marco para o desempeño de actividades relacionadas co perfil formativo do grao, preparando para unha gran variedade de actividades. Ademais, a riqueza histórica, artística, arqueolóxica e natural proporciona unha estreita relación entre os estudos universitarios e o mercado laboral, abrindo unha nova vía de profesionalización ante a crecente consideración do legado cultural herdado como recurso dotado de valor económico ou produtivo. A demanda e saídas profesionais no terreo da conservación, protección, xestión e difusión do patrimonio e o resto de actividades relacionadas co turismo cultural abren un amplo horizonte á saída profesional dos futuros graduados, que poden nesa liña especializarse no máster que ofertamos.

# ×

Co obxectivo de dar resposta á demanda social de diferentes profesionais, e aos futuros graduados/as posibilítase unha continuación académica coherente con dous Másteres: Valoración, Xestión e Protección do Patrimonio.

# ×

Unha situación similar presenta o **Máster de Arqueoloxía e Ciencias da Antigüedad** orientado á especialización en arqueoloxía.

A Facultade de Historia da Universidade de Vigo, sita no Campus Universitario de Ourense, oferta tres titulacións adaptadas ao Espazo Europeo de Educación Superior (EEES): un Grao e dous Posgraos.

Xunto á habitual **modalidade presencial**, poderase optar pola modalidade semipresencial, sempre que se xustifique a imposibilidade de asistir con regularidade ás aulas; os motivos deben estar en relación con obrigas de carácter laboral, familiar, atención a persoas dependentes, actividades deportivas de alto nivel, necesidades educativas especiais. O proceso para acollerse a esta modalidade terá lugar unha vez formalizada a matricula; estudante debe cubrir un impreso coa solicitude e entregar a documentación xustificativa.

Os docentes poñerán a disposición destes estudantes o material preciso a través da plataforma de teledocencia e os medios para superar as materias do grado, en igualdade de condicións que os presenciais.

A oferta de Posgrao contempla dúas titulacións:

××

- Mestrado semipresencial en Valoración, Xestión e Protección do Patrimonio, en colaboración coa Escola Superior de Enxeñería de Minas do campus de Vigo.
- Mestrado Interuniversitario de Arqueoloxía e Ciencias da Antigüidade (USC y U Vigo) coa participación do Instituto de Ciencias do Patrimonio (Incipit) do CSIC. O seu programa ten unha doble orientación: profesionalizante e investigadora. Na súa primeira vertente, aspira a formar arqueólogos que poidan desenvolver a sua labr profesional neste campo nos próximos anos; na segunda, da paso ao programa de doutoramento da USC

# Delegación de alumnado

Funcións:

É o órgano de representación estudiantil institucional que se ten artellado na Facultade de Historia.

Todos os alumnos/as poden acudir á sede da Delegación para obter información e facer uso dos seus recursos. Para cubrir as súas necesidades a Delegación ten un orzamento proporcional ao número de alumnos/as que representa. Segundo o Regulamento de Estudantes no artigo 27, entre os fins da Delegación de alumnos está:

- Actuar como órganos de diálogo coas autoridades académicas no establecemento dunha información adecuada sobre a vida universitaria.
- Xestiona-los seus recursos.
- Promover e coordinar actividades de extensión universitaria.
- Elixi-los seus representantes perante calquera autoridade, institución ou organización, naqueles casos para os que non exista regulamento de elección.

	The result of learning evaluated is: Know the concept of cultural heritage, his evolution and his distinct categories					

#### Other comments on the Evaluation

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again.

#### Recommendations

#### Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

#### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

\* Teaching methodologies maintained

- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%]

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ... \* Tests that are modified [Previous test] => [New test]

# \* New tests

Systematic observation	Communication and active participation in the activities of the matter to naughty of the telematic *means. Evaluation of the result of the learning "Know the tools **metodolóxicas for the realisation of a process of estimate of the value of a very cultural any one, from criteria *standardised".	20	B1

# Other comments on the Evaluation

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again

#### Recommendations

#### Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

- \* Teaching methodologies maintained
- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning

#### \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

\* New tests

*The information in the planning table is fo	r guidance only and does no	ot take into account the het	erogeneity of the students.

Methodologies	
	Description
Seminars	Exhibition of the main theoretical contents of the matter with help of audiovisual means and of remote connection.
Case studies	Analysis of a problem or real case, with the purpose to know it, interpret it, resolve it, generate hypothesis, diagnose it and *adentrarse in alternative procedures of solution, to see the application of the theoretical concepts in the reality. They will employ as I complement of the theoretical classes for the *autoaprendizaje.
Autonomous problem solving	Activities in which they formulate problems and/or exercises related with the matter.
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the *asignatura. They will present *ficha of the matter, aims, calendar, criteria of evaluation, as well as forums of debate and news and other surroundings in which it will manage the learning

Personalized assistance		
Methodologies	Description	
Case studies	Resolution of doubts and personalised attention through the platform of *teledocencia *Moodle (forum of doubts and queries) and videoconference and-*meeting.	
Autonomous problem solving	Resolution of doubts and personalised attention of the practical exercises realised by the *alumnado (glossary, specific forums). Resources used: platform of *teledocencia *Moodle and videoconference and-*meeting.	
Tests	Description	
Essay	Information and personalised consultancy for the realisation of the draft of project of intervention by the students through the TIC. Resources used: platform of teledocencia Moodle and videoconference and-meeting.	

Assessment					
	Description	Qualification	Trair	ning a	and
			Learnii	ng Re	esults
Essay	Work of remote delivery. Preparation of a draft of project of intervention oriented to the qualification of the students in the use of the projects like tool of management.	50 A	\3 B1	C2 C3	D5 D9
Problem and/or exercise solving	Proofs for the evaluation of the competitions purchased, that include enclosed questions with distinct alternatives of answer. They try to provide to the students the theoretical and methodological knowledges necessary to design and direct projects.	30 4	N3 B1		D5 D9
Systematic observation	Communication and active participation in the matter through the telematic means: access and use of the platform of *teledocencia (download of documents, participation in general forums), participation in the face-to-face sessions (in direct or asynchronous visualisation of the recordings), use of other systems of communication.	20 4	.3 B1	<u> </u>	D5 D9

#### Other comments on the Evaluation

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again.

#### Recommendations

#### Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

#### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

- \* Teaching methodologies maintained
- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

\* New tests

*The information in the planning table is for	guidance only and do	pes not take into account th	ne heterogeneity of the stude	ents.

Methodologies	
	Description
Introductory activities	Session oriented to take contact and gather information on the students and his motivations. Presentation of the matter and of the surroundings in which it will develop the module, employing virtual tools and telecommunication.
Seminars	Educational interaction/students with the purpose of orientation, advice and resolution of doubts in the process of the learning, with the support of the virtual platform.
Case studies	Analysis of a fact, phenomenon, real event in the field of the management of the cultural heritage entering to the one proposal of project of interpretation, keeping the lines of an initial protocol of work that accredit the theoretical progress-practical of the students in the matter. Process based on the virtual platform.

Personalized assistance		
Methodologies Description		
Introductory activities	The personalised attention will consist in the orientation of the level of learning required, the introduction of the materials, the resolution of doubts and the explanation of the dynamics of the development of the matter in the virtual platform.	
Case studies	Resolution of doubts and personalised attention of the works realised by the students. Resources used: virtual platform (FaiTic/Moodle) and e-meeting.	

	Description	Qualification	Training and
		-	Learning Results
Systematic observation	Control and continuous follow-up of the progress of the students in the matter, based in criteria of efficient use of the Tics and of intervention in the virtual surroundings. Communication and active participation in the activities of the matter through telematic means.	50	A1 B1 C8 D3 D7
Essay	Result of learning evaluated: know the diverse models of heritage management. The students makes and presents a project of interpretation of the cultural heritage in the context of his management (analysis and comment, individual or groups) using tools of remote delivery in the date indicated. Result of learning evaluated: Application of the knowledge of the diverse models of heritage management in the design of similar diagrams in the intervention on new patrimonial assets.	50	A1 B1 C8 D3 D7

Methodologies	
	Description
Lecturing	Exhibition of the main theoretical contents of the subject with the help of audiovisual media. Students will have the possibility of attending this session in the form of a videoconference.
Case studies	Analysis of a problem or real case, in order to know it, interpret it, solve it, generate hypotheses, diagnose it and go into alternative solution procedures, to see the application of theoretical concepts in reality. They will be used as a complement to the theoretical classes for self-learning.
Problem solving	Activities in which problems and / or exercises related to the subject are formulated.
Autonomous problem solving	The student must develop autonomously the analysis and resolution of problems and / or exercises.
Seminars	Realization of group and personalized tutorials, organization of forums, chats, debates, wikis, etc.
Introductory activities	Activities aimed at making contact and gathering information about the students, as well as presenting the subject. The file of the subject, objectives, calendar, evaluation criteria will be presented, as well as discussion forums and news and other environments in which the learning will unfold.

# Other comments on the Evaluation

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again.

S	Sources of information	
_		

#### Recommendations

#### **Other comments**

TThe teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

\* Teaching methodologies maintained

- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%]

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

\* New tests

\* Additional Information

Methodologies	
	Description
Introductory activities	Activities directed to take contact and gather information on the students, as well as to present the module. They will present the module outline form of the matter, aims, calendar, criteria of evaluation, as well as forums of debate and news and other surroundings in which it will manage the learning.
Seminars	Activities focused to the work on each one of the technologies that present in the matter, so that the students can understand the theoretical principles of each technician to the time that take contact with the tools software that will allow them put in technical said practice during a process of documentation. These seminars will realise by means of videoconference and totorial videosl, on the studies of case of employment of each technician.
Case studies	Analysis of a problem or real case, with the purpose to know it, interpret it, resolve it, generate hypothesis, diagnose it and get introduced to alternative procedures of solution, to see the application of the theoretical concepts in the reality. They will employ as I complement of the theoretical classes for the autolearning.
Problem solving	Activities in which they formulate problems and/or exercises related with the matter.

Personalized assistance				
Methodologies	Description			
Case studies	Resolution of doubts and personalised attention of the work performed by the students. Resources used: platform for virtual teaching Moodle, and videoconference and e-meeting			
Problem solving	Resolution of doubts and personalised attention through the videoconference and e-meeting.			

#### Assessment

Description

Qualification Training and Learning Results

Essay	The student presents the result obtained in the preparation of a document on the thematic of the matter in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. The results of the learning are the qualification of the student for the geomatic documentation of the heritage. It pretends that the student was able to document the physical characteristics, formal and the state of conservation of the immovable cultural heritage and his immediate surroundings.	80	A1 B2 C5 D4 C6 D5
Systematic observation	The performance of the student is being observed, as well as of the practices and seminars through the telematic tools. The results of the learning are the qualification of the student for the geomatic documentation of the heritage.	20	B2 C5 D4 C6 D5

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again

GIS Technologies for Inventory of Cultural Assets/O02M143V03108

#### Subjects that it is recommended to have taken before

(\*)Introducción á topografía e produción cartográfica/O02M143V03111 CAD Techniques to Present Heritage/O02M143V03107

#### **Other comments**

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same. In general, for the practices will employ free software or free versions (demo) of commercial software for operating system Windows 7.

#### Contingency plan

#### Description

#### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES === \* Teaching methodologies maintained

\* Teaching methodologies modified

\* Non-attendance mechanisms for student attention (tutoring)

- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

\* New tests

# Skills

Code

A2 That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.

B2 Acquire the necessary knowledge to handle the different tools of graphic, dimensional and geospatial documentation to be applied in the documentation and valuation of Cultural Heritage.

C7 Know the basics of the most used non-destructive techniques for the sub-surface prospecting of the cultural heritage and develop the ability to determine its applicability to specific cases.

D4 To be able to integrate the diverse information and data contributed by diverse technicians and tools in the writing of conclusions of action.

D5 Be able to predict and control the evolution of complex situations through the development of new and innovative work methodologies adapted to the specific scientific / research, technological or professional field, in general multidisciplinary, in which their activity is developed.

Methodologies	
	Description
Introductory activities	Activities directed to take contact and gather information on the students, as well as to present the subjet
Previous studies	Research, reading and work of documentation, proposals of resolution of problems and/or exercises that will realise of autonomous form by part of the students.
Case studies	Analysis of a problem or real case, with the purpose to know it, interpret it, resolve it, generate hypothesis, diagnose it and pose in alternative procedures of solution, to see the application of the theoretical concepts in the reality. They will employ as I complement to the studies and previous activities.
Project based learning	Education based in projects of learning: Method in which the students carry out to realisation of a project in a determinate time to resolve a problem or tackle a task by means of the planning, design and realisation of a series of activities
Seminars	You interview that the student is supported by the teacher of the subject for advice/develop of activities of the subjet and of the process of learning.

Methodologies	Description
Introductory activities	Time devoted to attend the needs and queries of the students related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of form semi-face-to-face (through emeeting) or of form no face-to-face (through the email or of Faitc)
Case studies	Time devoted to attend the needs and queries of the students related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of form semi-face-to-face (through emeeting) or of form no face-to-face (through the email or of Faitc)
Project based learning	Time devoted to attend the needs and queries of the students related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of form semi-face-to-face (through emeeting) or of form no face-to-face (through the email or of Faitc)
Previous studies	Time devoted to attend the needs and queries of the students related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of form semi-face-to-face (through emeeting) or of form no face-to-face (through the email or of Faitc)
Seminars	Time devoted to attend the needs and queries of the students related with the study and/or subjects linked with the matter, providing him orientation, support and motivation in the process of learning. This activity can develop of form semi-face-to-face (through emeeting) or of form no face-to-face (through the email or of Faitc)

Assessment

	Description	Qualificatior			ning a ng Re	and esults
Laboratory practice	Proofs for the evaluation that include activities, problems or practical exercises to resolve. The students have to give answer to the activity posed, applying the theoretical and practical knowledges of the subjet. The results of the learning are: Design and schedule a campaign of prospecting, as well as interpret the results expected.	5 40		B2	C7	D4
Essay	The student presents the result obtained in the preparation of a document on the thematic of the matter, in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. The results of the learning are: Design and schedule a campaign of prospecting, as well as interpret the results expected.	60	A2	B2	C7	D4 D5

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again.

In the extraordinary announcement of July the criteria of evaluation will be the same.

#### Recommendations

#### **Other comments**

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

\* Teaching methodologies maintained

\* Teaching methodologies modified

- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

\* New tests

	dotalo das ferramentas precisas para a súa po	sta en valor e uso públi	co	

#### Skills

Code A1 Possess and understand knowledge that provides a basis or opportunity to be original in the development and / or application of ideas, often in a research context.

B1 Acquire the ability to differentiate and assess the various expressions of Cultural Heritage, know the tools for their quantification and protection, as well as the different perspectives that address their management.

C8 Understand the multifactorial values of Cultural Heritage, and assess it appropriately according to criteria of social use.
 C11 Acquire the ability to handle documentary tools and historiographic techniques for the characterization of heritage assets.

C13 Develop the capacity for making decisions about the function assigned to the Heritage, its value and public use, and for the elaboration of strategies aimed at its recovery.

D6 Know how to transmit in a clear and unambiguous way to a specialized audience or not, results from scientific and technological research or the most advanced field of innovation, as well as the most relevant foundations on which they are based

D8 Acquire advanced knowledge and demonstrate, in a context of scientific and technological research or highly specialized, a detailed and substantiated understanding of the theoretical and practical aspects and the methodology of work in one or more fields of study.

Methodologies	
	Description
Introductory activities	Approach to basic concepts. Introduction to the debate around history, identities, memory and
	heritage.
Lecturing	Schematic exhibition by part of the profesorado of the contents of the matter, theoretical bases and
	guidelines on the works and exercises to develop by the students.
Case studies	Analysis of a real problem or case, with the purpose of knowing how to interpret it, solve it,
	generate hypotheses, diagnose it and introduce itself in alternative procedures of solution, to see
	the application of theoretical concepts to reality. It will be used as a complement to the theoretical
	classes for self-learning.
Problem solving	The students must read and analyze the work documents indicated and carry out the proposed
	activities / exercises.
Discussion Forum	Activities developed in some virtual surroundings in which they debate subjects related with the
	contents of the matter.
Mentored work	Preparation of documents on the thematic of the matter of individual way or in group or preparation
	of investigations, memories, essays, etc.
Seminars	Commentary and analysis of the main theoretical contents of the material with the aid of
	audiovisual means. The students will have the possibility to attend in the form of videoconference.

# Personalized assistance Methodologies Description Seminars The personalised attention will consist in the orientation and guide to the students through the platform of teledocencia Moodle and of the classroom and-meeting to facilitate him the taking of decisions on the function that assigns him to the heritage, his put in value and public use.

#### Assessment

Description

Qualification Training and Learning Results

Case studies	Evaluation of the results of the Case Study. Learning outcomes assessed: Provide students with tools to manage specific sources. To train students to make decisions about the role assigned to heritage, its value and public use.	20	A1	B1		D6
Problem solving	Evaluation of the activities carried out.	20		B1		D6
	Learning outcomes assessed:					
	To train students to make decisions about the role assigned to heritage,					
	its value and public use.					
Discussion Forur	nEvaluation of the active participation of the students and of his	10			C8	
	contributions to the forum of discussion of the matter					
Mentored work	Evaluation of the results of the work tutelado.	50			C11	D8
	Results of the learning evaluated: Endow to the students of tools for the				C13	
	handle of the specific sources.					

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again.

#### Recommendations

#### Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

#### Contingency plan

#### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES === \* Teaching methodologies maintained All teaching methodologies are maintained

\* Teaching methodologies modified No teaching methodology is changed.

\* Non-attendance mechanisms for student attention (tutoring) The mechanisms for attending to students are maintained.

\* Modifications (if applicable) of the contents The contents will not be modified.

\* Other modifications No other modifications will be made

=== ADAPTATION OF THE TESTS === The tests and evaluation percentages of the subject are kept.

Contents Topic

1. INTRODUCTION: MUSEOLOGÍA And MUSEOGRAFÍA	Basic criteria of planning in the museum
2. COMMISSARIATE OF EXHIBITIONS AS A RESEARCH AND CREATION TOOL.	Curation of exhibitions as a research and creation tool
3. EXHIBITIONS MODELS.	The museums are permanent institutions that purchase, conserve, investigate communicate and exhibit collections of objects of diverse nature with the purposes of study, education and contemplation. The museum has changed until doing unrecognizable. The connection between art and life claimed by the historical avant-garde has occurred, but in shape of cultural industry and estetización commercial for the consumption.
4. THE CONTEMPORARY MUSEUM: ARCHITECTUR And SHOW.	EOf the changes experienced by the contemporary museum from the inauguration of the Centre Geroges Pompidou, in the year 1977, will arise a hybrid space that does not lose of sight the show. This no only is present in the programming or in the complementary activities of infinity of institutions, but in his own architecture, which constitutes in a lot of cases his main catchword.

Methodologies	
	Description
Introductory activities	Introductory sessions directed to take contact and gather information on the student, as well as to present the contents of the matter, available resources and proofs of evaluation. They will keep through videoconference or of the virtual room of the platform And-*meeting
Lecturing	Sessions for the exposition of the main theoretical contents of the subject by their teachers, with the help of audiovisual media, and in which the students will have the possibility of attending in the form of videoconference.
Case studies	Analysis of real cases between the proposed in the matter that the student will realise of autonomous form. It will keep the communication between teacher and student through videoconference or of the virtual room of the platform And-*meeting.
Previous studies	Autonomous work of the student through the preparation of readings related to the subject.
Seminars	Sessions that the students/will be supported by the teacher of the matter for advice/develop of the activities to develop and of the process of learning. They will keep through videoconference or of the virtual room of the platform And-*meeting.

Personalized assistance Methodologies Description			
Seminars	The personalised attention will consist in the resolution of doubts on the contents of the matter, the methodology used for the realisation of the exercises and review of the proofs of evaluation. The follow-up will realise through the classroom and-*meeting (link *FaiTic)		
Case studies	Personalised follow-up of the student through the *tutorías on-line, by means of the forums of the platform *Moodle, the virtual room of the platform And-*meeting and the email		

Assessment				
	Description	Qualification	Training a Learnin Result	ig
Case studies	The students manages and presents in the dates programmed the results of an individual work on different goods patrimoniales to choose between two modalities (To and B). The results of learning are: Qualify to the student for the application of the procedures and mechanisms for the assessment and protection of the Architectural Heritage in his territorial context and of the integration of the contemporary architecture in the historical centres.	50	A4 B1 C8 C11 C15	D6 D9
Problem and/or Execution of two test type Test (Questionnaire 1 and 2) with differentexercisealternative of answer, in which the students will select one from among thesolvingnumber limited of possibilities. The results of learning are: Qualify to thestudent to know the evolution of the applicable legislation to the differentexpressions of the Cultural Heritage.		20	B1 C8 C15	D9

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again

### Recommendations

### **Other comments**

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

### Contingency plan

### Description

### === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

\* Teaching methodologies maintained

- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Tests that are modified [Previous test] => [New test]

### Recommendations

### **Other comments**

Throughout the course detailed documentation on the development of the subject will be delivered. This information will be offered through the Moodle courses of the TEM @ platform, so all the students must be registered in the platform and have their profile data covered.

The bibliography necessary for the preparation and execution of the tasks and work of each of the external practices, will be prepared and delivered by the people who tutor them together with the specific training project of the internship.

### Contingency plan

### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. Methodologies	
	Description
Seminars	You interview that the student is supported by the profesorado of the subject for advice/develop of activities of the subject and of the process of learning
Case studies	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.
Mentored work	The/The student, of individual way or in group, elaborates a document on the thematic of the matter or prepares seminars, investigations, memories, essays, summaries of readings, conferences, etc.
Problem solving	Activity in which they formulate problems and/or exercises related with the subject. The student/to has to develop the analysis and resolution of the problems and/or exercises of autonomous form.
Introductory activities	Activities directed to take contact and gather information on the students, as well as to present the subject.

Personalized assistance			
Description			
Along the course the profesorado will keep direct relation with the students with the object of tutorizar and resolve doubts.			
The personalised attention will make fundamentally through the forum of the matter. To be necessary will use also tutorías on-line, the virtual room of the platform and-meeting and the email.			
The personalised attention will consist in the orientation on methodology, editorial and formal presentation of the works on the very cultural elected by the student. The attention will do by means of turorías on-line, the forums of the platform Moodle, the virtual room of the platform and-meeting and the email.			
Throughout the course, the teaching staff will maintain a direct relationship with the students in order to tutoring and solving doubts, maintaining interaction in real time through the online tutorials, the forums of the Moodle platform, the virtual room of the e-meeting platform and the email.			

Assessment					
	Description	Qualification		aining an ning Resu	
Problem and/or exercise solving	Proofs for evaluation of the competitions purchased that include enclosed questions with different alternative of answer (true/false), multiple election, pairing of elements). The students selects an answer between a number limited of possibilities.	20	В	1 C8

Systematic observation	It will value wool active participation in distinct wools activities by telematic means of to *capacitar *al students for *tareas of education *patrimonial.	30	-	C	02

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again. If student approves in the first announcement, there will be no possible to improve note in the second.

# Subjects that continue the syllabus

Dissemination and Socialisation of Cultural Heritage/O02M143V03210

# Subjects that are recommended to be taken simultaneously

Dissemination and Socialisation of Cultural Heritage/O02M143V03210

### **Other comments**

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same.

# Contingency plan

# Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES === \* Teaching methodologies maintained

- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

A3 That students are able to integrate knowledge and face the complexity of making judgments based on information that, being incomplete or limited, includes reflections on social and ethical responsibilities linked to the application of their knowledge and judgments.

B1 Acquire the ability to differentiate and assess the various expressions of Cultural Heritage, know the tools for their quantification and protection, as well as the different perspectives that address their management.

C8 Understand the multifactorial values of Cultural Heritage, and assess it appropriately according to criteria of social use.

C13 Develop the capacity for making decisions about the function assigned to the Heritage, its value and public use, and for the elaboration of strategies aimed at its recovery.

D7 Conceive the protection of cultural heritage within a framework of sustainable development.

D9 Know and manage the legislation applicable to the sector, know the social and business environment and know how to relate to the competent administration by integrating this knowledge into the development of engineering projects and the development of any aspect of their professional work.

Methodologies	
	Description
Introductory activities	Activities directed to take contact and gather information on the students, as well as to present the module. They will present the module outline form of the matter, aims, calendar, criteria of evaluation, as well as forums of debate and news and other surroundings in which it will manage the learning.
Seminars	Activities focused to the work on each one of the technologies that present in the matter, so that the students can understand the theoretical principles of each technician to the time that take contact with the tools software that will allow them put in technical said practice during a process of documentation. These seminars will realise by means of videoconference and totorial videosl, on the studies of case of employment of each technician.
Case studies	Analysis of a problem or real case, with the purpose to know it, interpret it, resolve it, generate hypothesis, diagnose it and get introduced to alternative procedures of solution, to see the application of the theoretical concepts in the reality. They will employ as I complement of the theoretical classes for the autolearning.
Problem solving	Activities in which they formulate problems and/or exercises related with the matter.

# Personalized assistance

### **Methodologies Description**

Case studies Resolution of doubts and personalised attention of the work performed by the students. Resources used: platform for virtual teaching Moodle, and videoconference and e-meeting

Problem solving Resolution of doubts and personalised attention through the videoconference and e-meeting.

Assessment					
	Description	Qualification	n Trair Learnir		
Essay	The student presents the result obtained in the elaboration of a document on the subject matter in the preparation of seminars, investigations, memories, essays, summaries of readings, conferences, etc. The learning outcomes are the student's training for the diagnosis of the structural condition of heritage assets, through the appropriate use of different identification tools and characterization of structural damage and pathologies, as well as using the applicable regulations.	40	A2 B2 B3	-	D5 D8
Systematic observation	The performance of the student is being observed, as well as the practices and seminars through the telematic tools. The results of the learning are the qualification of the student for the structural diagnosis of the heritage.	20	A2 B2 B3		D5 D8
Oral exam	The student will conduct a critical discussion on case study about characterization and diagnosis of a heritage construction. The student will argue their decisions regarding the most appropriate tools for identification and characterization of structural damage and pathologies, as well as the results obtained in said diagnosis.	40	A2 B2 B3	-	D5 D8

# Other comments on the Evaluation

The student, according to current regulations, has two calls for evaluation.

The first takes place during the teaching term. In the event that the teaching weeks of the subject are not sufficient for the delivery of all the planned works, the teaching platform will be enabled an additional week, at the end of each semester, to facilitate said delivery, establishing in this case a alternate homework delivery schedule.

The second evaluation is carried out in the month of July, for which access to the teaching platform will be enabled again

(\*)Técnicas non destructivas para a avaliación do patrimonio cultural inmoble/O02M143V03218

# Subjects that it is recommended to have taken before

2D and 3D Cartographic Documentation Techniques for Cultural Heritage/O02M143V03109 CAD Techniques to Present Heritage/O02M143V03107

### Other comments

The teaching of the subject will be always of face-to-face telematic way, well was synchronous or asynchronous, using the eMoodle (MooVi) educational platform and participating in the educational activities through multiple videoconference (e-meeting, Remote Campus).

To be able to receive the teaching of effective way it si recommended , previously to the start of the subject, to consult the manual of access to the platform and to follow the technical specifications in order to assist to the remote sessions. It is indispensable that each student access to the educational platform of the subject previously to the beginning of the same. In general, for the practices will employ free software or free versions (demo) of commercial software for operating system Windows 7.

# **Contingency plan**

# Description

# === EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

- \* Teaching methodologies maintained
- \* Teaching methodologies modified
- \* Non-attendance mechanisms for student attention (tutoring)
- \* Modifications (if applicable) of the contents
- \* Additional bibliography to facilitate self-learning
- \* Other modifications

=== ADAPTATION OF THE TESTS === \* Tests already carried out Test XX: [Previous Weight 00%] [Proposed Weight 00%] ...

\* Pending tests that are maintained Test XX: [Previous Weight 00%] [Proposed Weight 00%]

\* Tests that are modified [Previous test] => [New test]

\* New tests

A2 That students know how to apply the knowledge acquired and their ability to solve problems in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.

B2 Acquire the necessary knowledge to handle the different tools of graphic, dimensional and geospatial documentation to be applied in the documentation and valuation of Cultural Heritage.

B3 Acquire the ability to bring to the practical application of the protection of cultural property the theoretical knowledge and the protocols of documentation, diagnosis and evaluation.

C2 Acquire the ability to design intervention protocols, establishing types, priorities and intensities of action before a cultural property at risk of alteration.

C7 Know the basics of the most used non-destructive techniques for the sub-surface prospecting of the cultural heritage and develop the ability to determine its applicability to specific cases.

D4 To be able to integrate the diverse information and data contributed by diverse technicians and tools in the writing of conclusions of action.

D5 Be able to predict and control the evolution of complex situations through the development of new and innovative work methodologies adapted to the specific scientific / research, technological or professional field, in general multidisciplinary, in which their activity is developed.
