### (\*)Presentación

The School of Telecommunication Engineering (EET) is a higher education school of the University of Vigo that offers Bachelor's degrees, Master's degrees and Doctoral programs in the fields of Telecommunications Engineering.

#### **Bachelor's Degree in Telecommunication Technologies Engineering (EUR-ACE®).**

The main goal of the Bachelor's Degree in Telecommunication Technologies Engineering is to form professionals at the forefront of technological knowledge and professional competences in telecommunication engineering. This Bachelor has been recognized with the best quality seals, like the EUR-ACE's. **It has a bilingual option: up to 80% of the degree credits can be taken in English.**

[http://teleco.uvigo.es/images/stories/documentos/gett/degree\\_telecom.pdf](http://teleco.uvigo.es/images/stories/documentos/gett/degree_telecom.pdf)

www: <http://teleco.uvigo.es/index.php/es/estudios/gett>

#### **Master in Telecommunication Engineering**

The Master in Telecommunication Engineering is a Master's degree that qualifies to exercise the profession of Telecommunication Engineer, in virtue of the established in the Order CIN/355/2009 of 9 of February.

[http://teleco.uvigo.es/images/stories/documentos/met/master\\_telecom\\_rev.pdf](http://teleco.uvigo.es/images/stories/documentos/met/master_telecom_rev.pdf)

www: <http://teleco.uvigo.es/index.php/es/estudios/mit>

#### **Interuniversity Masters**

The current academic offer includes interuniversity master's degrees that are closely related to the business sector:

Master in Cybersecurity: www: <https://www.munics.es/>

Master in Industrial Mathematics: www: <http://m2i.es>

International Master in Computer Vision: www: <https://www.imcv.eu/>

### (\*)Equipo directivo

#### MANAGEMENT TEAM

Director: Íñigo Cuññas Gómez ([teleco.direccion@uvigo.es](mailto:teleco.direccion@uvigo.es))

Subdirección de Relaciones Internacionales: Enrique Costa Montenegro ([teleco.subdir.internacional@uvigo.es](mailto:teleco.subdir.internacional@uvigo.es))

Subdirección de Extensión: Francisco Javier Díaz Otero ([teleco.subdir.extension@uvigo.es](mailto:teleco.subdir.extension@uvigo.es))

Subdirección de Organización Académica: Manuel Fernández Veiga (teleco.subdir.academica@uvigo.es )

Subdirección de Calidad: Loreto Rodríguez Pardo (teleco.subdir.calidade@uvigo.es )

Secretaría y Subdirección de Infraestructuras: Miguel Ángel Domínguez Gómez (teleco.subdir.infraestructuras@uvigo.es )

#### BACHELOR'S DEGREE IN TELECOMMUNICATION TECHNOLOGIES ENGINEERING

General coordinator: Rebeca Díaz Redondo (teleco.grao@uvigo.es)

[http://teleco.uvigo.es/images/stories/documentos/comisions/membros\\_comisions\\_grao.pdf](http://teleco.uvigo.es/images/stories/documentos/comisions/membros_comisions_grao.pdf)

#### MASTER IN TELECOMMUNICATION ENGINEERING

General coordinator: Manuel Fernández Iglésias (teleco.master@uvigo.es)

[http://teleco.uvigo.es/images/stories/documentos/comisions/membros\\_comisions\\_master.pdf](http://teleco.uvigo.es/images/stories/documentos/comisions/membros_comisions_master.pdf)

#### MASTER IN CYBERSECURITY

General coordinator: Ana Fernández Vilas (camc@uvigo.es)

[http://teleco.uvigo.es/images/stories/documentos/comisions/membros\\_comisions\\_master\\_ciberseguridade.pdf](http://teleco.uvigo.es/images/stories/documentos/comisions/membros_comisions_master_ciberseguridade.pdf)

#### MASTER IN INDUSTRIAL MATHEMATICS

General coordinator: Elena Vázquez Cendón (USC)

UVigo coordinator: José Durany Castrillo (durany@dma.uvigo.es)

<http://www.m2i.es/?seccion=coordinacion>

#### INTERNATIONAL MASTER IN COMPUTER VISION

General coordinator: Xose Manuel Pardo López (USC)

UVigo coordinator: José Luis Alba Castro (jalba@gts.uvigo.es)

<https://www.imcv.eu/legal-notice/>

Web	<a href="http://www.munics.es/">http://www.munics.es/</a>			
General description	(*)La misión del máster es formar profesionales de alta cualificación en todos los procesos técnicos, organizativos, operativos y forenses relativos a la seguridad digital. El profesorado pertenece a las áreas de Ingeniería Telemática, Teoría de la Señal y Comunicaciones, Ciencias de la Computación e Inteligencia Artificial, Ingeniería de Sistemas y Derecho Penal de las dos universidades, y se complementa con la contribución de destacados profesionales de empresas del sector en Galicia y el compromiso de éstas en apoyar las prácticas de los estudiantes.			

<b>Competencies</b>	
Code	
A1	To possess and understand the knowledge that provides the foundations and the opportunity to be original in the development and application of ideas, frequently in a research context.
A2	Students will be able to apply their knowledge and their problem-solving ability in new or less familiar situations, within a broader context (or in multi-discipline contexts) related to their field of specialization.
A3	Students will be able to integrate diverse knowledge areas, and address the complexity of making statements on the basis of information which, notwithstanding incomplete or limited, may include thoughts about the ethical and social responsibilities entailed to the application of their professional capabilities and judgements.
A4	Students will learn to communicate their conclusions ---and the hypotheses and ultimate reasoning in their support--- to expert and non-expert audiences in a clear and unambiguous way.
A5	Students will apprehend the learning skills enabling them to study in a style that will be self-driven and autonomous to a large extent.
B1	To have skills for analysis and synthesis. To have ability to project, model, calculate and design solutions in the area of information, network or system security in every application area.
B2	Ability for problem-solving. Ability to solve, using the acquired knowledge, specific problems in the technical field of information, network or system security.
B3	Capacity for critical thinking and critical evaluation of any system designed for protecting information, any information security system, any system for network security or system for secure communications.
B4	Ethical commitment. Ability to design and deploy engineering systems and management systems with ethical and responsible criteria, based on deontological behaviour, in the field of information, network or communications security
B5	Students will have ability to apply theoretical knowledge to practical situations, within the scope of infrastructures, equipment or specific application domains, and designed for precise operating requirements
B6	Ability to do research. Ability to innovate and contribute to the advance of the principles, the techniques and the processes within their professional domain, designing new algorithms, devices, techniques or models which are useful for the protection public, private or commercial of digital assets.
C1	To know, to understand and to apply the tools of cryptography and cryptanalysis, the tools of integrity, digital identity and the protocols for secure communications.
C2	Deep knowledge of cyberattack and cyberdefense techniques.
C3	Knowledge of the legal and technical standards used in cybersecurity, their implications in systems design, in the use of security tools and in the protection of information.
C4	To understand and to apply the methods and tools of cybersecurity to protect data and computers, communication networks, databases, computer programs and information services.
C5	To design, deploy and operate a security management information system based on a referenced methodology.
C6	To develop and apply forensic research techniques for analysing incidents or cybersecurity threats.
C7	To demonstrate ability for doing the security audit of systems, equipment, the risk analysis related to security weaknesses, and for developing de procedures for certification of secure systems.
C8	Skills for conceive, design, deploy and operate cybersecurity systems.
C9	Ability to write clear, concise and motivated projects and work plans in the field of cybersecurity.
C10	Knowledge of the mathematical foundations of cryptography. Ability to understand their evolution and future developments.
C11	Ability to collect and interpret relevant data in the field of computer and communications security.

C12	Knowledge of the role of cybersecurity in the design of new industrial processes, as well as of the singularities and restrictions to be addressed in order to build a secure industrial infrastructure.
C13	Ability for analysing, detecting and eliminating software vulnerabilities and malware capable to exploit those in systems or networks.
C14	Ability to develop a continuity business plan on the guidelines of commonly accepted norms and standards.
C15	Ability to identify the value of information for an institution, economic or of other sort; ability to identify the critical procedures in an institution, and the impact due to their disruption; ability to identify the internal and external requirements that guarantee readiness upon security attacks.
C16	Ability for envisioning and driving the business operations in areas related to cybersecurity, with feasible monetization.
C17	Ability to plan a time schedule containing the detection periods of incidents or disasters, and their recovery.
C18	Ability to correctly interpret the information sources in the discipline of criminal law (laws, doctrine, jurisprudence) both at the national and international levels.
C19	To learn how to identify the best professional profiles for an institution as a functions of its features and activity sector.
C20	Knowledge about the firms specialized in cybersecurity in the region.
D1	Ability to apprehend the meaning and implications of the gender perspective in the different areas of knowledge and in the professional exercise, with the aim of attaining a fairer and more egalitarian society.
D2	Ability for oral and written communication in Galician language.
D3	Ability to include sustainability principles and environmental concerns in the professional practice. To integrate into projects the principle of efficient, responsible and equitable use of resources.
D4	Ability to ponder the importance of information security in the economic progress of society.
D5	Ability for oral and written communication in English.

General description	The Master Thesis (TFM) is an academic work, personal and original that is presented in public and that is evaluated by a panel.			

It is a project where the student has to show the knowledge acquired during the master studies. It must conclude with a written dissertation including explanations, theories, ideas, reasonings, description of developments or designs, etc. It should address a topic chosen by the student, and supervised by a director or directors, that will care for its progression and its quality. Nonetheless, the Master Thesis is the responsibility of the aspirant to the title of Master.

**Competencies**

Code	
A1	To possess and understand the knowledge that provides the foundations and the opportunity to be original in the development and application of ideas, frequently in a research context.
A2	Students will be able to apply their knowledge and their problem-solving ability in new or less familiar situations, within a broader context (or in multi-discipline contexts) related to their field of specialization.

## Contents

### Topic

The Master's Thesis is an academic, personal and original work in which the student has to show the knowledge obtained during the master.

Therefore, the content of each work must be unique. Nevertheless, it must show the ability of the student to analyze a problem in a systematic way, propose solutions, analyze the results obtained and expose them clearly.

## Planning

	Class hours	Hours outside the classroom	Total hours
Mentored work	0	350	350
Presentation	1	24	25

\*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

## Methodologies

Description

Mentored work	The student will complete an academic, personal and original work in which he will have to show the knowledge obtained during the master. It must conclude with a set of written explanations, theories, ideas, reasoning, description of developments or designs, etc. on a subject chosen by the student, and supervised by a tutor or tutors, who will ensure the correct progression and the quality level.
---------------	---

## Personalized assistance

### Methodologies Description

Mentored work	During the Master's Thesis there will be periodic meetings between the student and the tutors to define, orient, supervise and delimit the work, as well as to orient the writing of the dissertation.
---------------	--

### Tests Description

Presentation	The directors of the work will guide the student in the preparation of the presentation of the work at the end of the master's degree.
--------------	--

## Assessment

	Description	Qualification	Training and Learning Results
Mentored work	The work will be evaluated by a panel. The student will provide a written dissertation, and will make a public presentation. The panel will use a rubric that will be publicly available.	100

### Description

=== EXCEPTIONAL PLANNING ===

Given the uncertain and unpredictable evolution of the health alert caused by COVID-19, the University of Vigo establishes an extraordinary planning that will be activated when the administrations and the institution itself determine it, considering safety, health and responsibility criteria both in distance and blended learning. These already planned measures guarantee, at the required time, the development of teaching in a more agile and effective way, as it is known in advance (or well in advance) by the students and teachers through the standardized tool.

=== ADAPTATION OF THE METHODOLOGIES ===

To public presentation will be performed using videoconferencing tools.

There are no other changes in the subject.
