

(*)E. U. de Enfermería (Povisa)

(*)ORGANIZACIÓN ACADEMICA

(*)

En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales ENFERMEROS.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que constantemente aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión ENFERMERA abarca los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas.

Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias medicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus CUATRO FUNCIONES : ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes. Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

- ☐ El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.
- ☐ El fomento de la aplicación práctica de los conceptos teóricos.
- ☐ Evaluación continuada del alumno por medio de tutorías.

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten.

Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

ORGANIZACIÓN CURSOS ACADÉMICOS

El plan de estudios de Grado tiene 240 CRÉDITOS ECTS distribuidos según tabla:

(*)PERSONAL DOCENTE

(*)PERSONAL ACADÉMICO GENERAL E.U.ENFERMERÍA POVISA:

Será requisito ineludible para ser profesor/a de la Escuela tener la titulación requerida por la legislación vigente y obtener la

"**VENIA DOCENDI**" de la Universidad de Vigo para la materia o disciplina que vaya a desarrollar.

La "**VENIA DOCENDI**" será solicitada por la Escuela con carácter previo a la formalización de cualquier contrato de profesorado; tendrá el carácter de permanente, salvo revisión realizada a propuesta del Delegado de la Universidad.

La "**VENIA DOCENDI**" será otorgada por el Rector a petición de los respectivos centros adscritos y después del informe del delegado de la Universidad.

La "**VENIA DOCENDI**" constituye un requisito explícito por parte de la Universidad de Vigo de que cada profesorado de un centro adscrito cumple con los requisitos exigidos para la docencia en el centro y facultan, al mismo tiempo, para firmar las actas oficiales de calificación de los estudiantes.

El profesorado que no posea "**VENIA DOCENDI**" no podrá formar parte del cuadro de personal docente ni ejercer la docencia en un centro adscrito a la Universidad de Vigo.

La selección del personal docente e investigador de los centros adscritos se llevará a cabo respetando los principios de igualdad, mérito y capacidad de acuerdo con lo establecido en la legislación vigente.

El nombramiento y contratación del personal docente e investigador de los antedichos centros le corresponden al titular de los mismos, una vez que los candidatos propuestos soliciten de la Universidad de Vigo la "**VENIA DOCENDI**" correspondiente.

CUADRO GENERAL DEL PROFESORADO SEGÚN CATEGORÍA ACADÉMICA, SU VINCULACIÓN CON LA UNIVERSIDAD Y SU DEDICACIÓN AL TÍTULO.

La figura de coordinador/a de curso, asegura la adecuada coordinación docente en el proceso de programación de la evaluación continuada de las materias en cada curso académico a través de reuniones de seguimiento y coordinación.

Esas reuniones de curso, arrancarán con una inicial, previa al comienzo de curso, en la que el coordinador planteará un calendario de actividades cuyo fin último es que no se produzcan solapamientos entre las distintas actividades que se proponen en las distintas guías docentes. Adicionalmente, esas reuniones iniciales servirán también para corregir la tendencia a incluir un excesivo número de actividades.

Se busca, por tanto, que la evaluación continuada se materialice en una distribución equilibrada de tareas a lo largo de todo el curso académico, apoyada en una programación racional de las materias. Para lograrlo, se dispondrán con cierta periodicidad reuniones de seguimiento y el coordinador del curso emitirá informes de seguimiento, destinados a mantener informados al Profesorado y Dirección sobre incidencias y eventos relevantes. Al finalizar el curso se celebrará una última reunión destinada a hacer balance y destacar posibles problemáticas a resolver para el siguiente curso.

RELACIÓN DE COORDINADORES CURSO ACADÉMICO:

Coordinador **1º** Curso:

Vicente Suárez González

Coordinador **2º** Curso:

Esperanza M^a Giraldez Miranda

Coordinador **3º** Curso:

Alicia Muiños Álvarez

Coordinador **4º** Curso:

Alfonso Eduardo Maldonado Arroyo

Además, existen las figuras del coordinador/a de prácticas externas (de ser el caso) y del trabajo de fin de grado, que se encargarán de coordinar los distintos/as tutores/as.

La Escuela de Enfermería de POVISA establecerá reuniones periódicas con las escuelas ubicadas en Vigo que comparten centros de prácticas para facilitar la coordinación vertical entre cursos de las prácticas y el intercambio de experiencias.

Con ello se persigue analizar las distintas propuestas de mejora, establecer criterios básicos de evaluación y organizar actividades conjuntas que afecten a más de una materia, por citar algunos objetivos concretos.

En definitiva, el sistema de coordinación que se propone constituye un elemento fundamental en la introducción de los nuevos objetivos y metodologías y, sobre todo, servirá para profundizar en una mejor y mayor coordinación entre docentes y entre éstos y el Centro.

En un futuro, dado que la coordinación del conjunto de actividades resulta clave para el adecuado aprovechamiento del alumnado, se pretende continuar este diseño, adecuándolo a las nuevas exigencias y tratando de garantizar niveles satisfactorios de coordinación vertical y horizontal.

PERSONAL NO DOCENTE E.U.ENFERMERÍA POVISA:

PAS: PERSONAL DE ADMINISTRACIÓN Y SERVICIOS.

- 1 Jefe de Servicios administrativos

- 1 oficial administrativo a tiempo completo.
- 1 auxiliar administrativo a tiempo completo

(*)INFORMACIÓN ESTUDIANTES PRIMERO Y TRASLADOS

(*)

ESCUELA UNIVERSITARIA DE ENFERMERÍA POVISA

INFORMACIÓN GENERAL.

La Escuela Universitaria de Enfermería de POVISA, adscrita a la Universidad de Vigo, nació oficialmente en el año 1991 bajo el patronazgo del HOSPITAL POVISA con la idea de desarrollar una función docente que consideraba adecuada y beneficiosa para un HOSPITAL de sus características, formando profesionales de Enfermería que cuando terminaran sus estudios, pudieran pasar a formar parte de la División de Enfermería del hospital.

Nuestra Escuela se rige por la Legislación Universitaria vigente, y por tanto, el Plan de Estudios está homologado y compartido por las otras E.U.E. adscritas a la Universidad de Vigo, la cual emite el título de Grado en Enfermería, lo que nos permite una comunicación fluida y facilita los posibilidad de traslados de estudiantes entre las Escuelas que en su momento pudieran surgir.

Las clases teóricas se imparten en las instalaciones en la calle Romil 75-77 y las prácticas se realizan en los distintos Departamentos, Servicios y Laboratorios del Hospital Povisa, y en hospitales de la red pública, así como en Centros de Salud y Residencias de la Tercera edad.

EQUIPO DIRECTIVO:

- **Director:** Alfonso García Suárez
- **Subdirectora:** M^a Concepción Agras Suárez
- **Secretario:** Ángel Marcial Pérez

Además cada uno de los cursos del Grado tiene un tutor que será referente de los alumnos con respecto a temas relacionados con la docencia.

TUTOR 1º CURSO:

- **VICENTE SUÁREZ GONZÁLEZ** profesor de la materia **PSICOLOGÍA** de 1º curso

TUTOR 2º CURSO:

- **MARÍA GIRALDEZ MIRANDA** profesora de la materia **INTRODUCCIÓN A LA ENFERMERÍA CLÍNICA** de 2º curso.

TUTOR 3º CURSO:

- **ALICIA MUIÑOS ALVAREZ** profesora de la materia **ENFERMERIA CLINICA III** de 3º curso.

TUTOR 4º CURSO:

- **EDUARDO MALDONADO ARROYO** profesor de la materia de **TFG** de 4º curso.

PLAN DE ESTUDIOS

En lo que respecta al desarrollo de dicho Plan, el objetivo primordial de la escuela es formar profesionales **ENFERMEROS**.

ENFERMERÍA es hoy en día una disciplina compleja del área de salud, con un gran impacto social que, constantemente, aumenta sus funciones para satisfacer las necesidades que impone el cuidado de la salud en un mundo en cambio, siendo además un elemento esencial en la planificación comunitaria de los servicios de salud.

Así pues la profesión **ENFERMERA** abarca **los cuidados, autónomos y en colaboración, que se prestan a las personas de todas las edades, familias, grupos y comunidades, enfermos o sanos, en todos los contextos, e**

incluye la promoción de la salud, la prevención de la enfermedad, y los cuidados de los enfermos, discapacitados, y personas moribundas. Funciones esenciales de la enfermería son la defensa, el fomento de un entorno seguro, la investigación, la participación en la política de salud y en la gestión de los pacientes y los sistemas de salud, y la formación.

Siendo aun una ciencia joven cuenta con principios propios, pero al ser una profesión vinculante exige que se nutra de otros conocimientos alcanzados por las ciencias médicas, a su vez sustentadas por los avances en biología, sociología y psicología.

Esto aporta a nuestra profesión una sólida formación teórico-práctica en sus **CUATRO FUNCIONES: ASISTENCIAL, DOCENTE, GESTORA E INVESTIGADORA** que permite al terminar los estudios de Grado desempeñar de forma altamente cualificada la profesión y trabajar en colaboración con otros profesionales de la salud para conseguir objetivos comunes.

Y para llegar a esta meta, la formación del alumno se apoya en tres pilares fundamentales:

□ *El desarrollo de clases teórico-prácticas enfocadas a la resolución de problemas.*

□ *El fomento de la aplicación práctica de los conceptos teóricos.*

□ *Evaluación continuada del alumno por medio de tutorías.*

El profesorado está formado en su mayor parte por especialistas en cada una de las materias que se imparten.

Dentro de la filosofía de la Escuela tienen un apartado importante las relaciones internacionales; el intercambio de estudiantes y profesores a través del Programa Sócrates-Erasmus dentro del ámbito europeo.

Esto permite que tanto profesores como alumnos tengan una visión más amplia de la profesión y su desarrollo en otros países, lo que adquiere una especial relevancia en una época donde los cambios tanto sociales como profesionales se suceden con gran rapidez, y en la que las posibilidades de trabajo se han ampliado al ámbito europeo.

El título de Graduado en Enfermería es válido en toda España y con los efectos legales que los convenios internacionales otorgan para otros países.

General description	Subject destined to the acquisition of theoretical competitions-practical in relation with the taken care and procedures of infirmary in the field of the specialized attention.			

Competencies

Code	
A2	Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
A4	Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B4	To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
B6	To apply the nursing interventions on scientific evidence and on the available resources.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B8	To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
B9	To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
B10	To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
B11	To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
B12	To apply the ethical and deontological code of Spanish nursing, understanding the ethical implications of health in a world in transformation.
B13	To apply the principles of health and socio-health financing and use properly the available resources
B15	To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinary and interdisciplinary way and the rest staff of the welfare organizations.
B16	To be able to use health information systems.
B17	To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
B18	To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
C4	Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
C8	To apply the technologies and information systems and communication of health care
C10	To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
C11	To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
C12	To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.

C13	To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
C17	To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
C18	To know and apply the principles underlying the comprehensive nursing care
C29	To identify care needs arising from health problems.
C31	To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
C33	To have cooperative attitude with the different members of the team.
C35	To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
C36	To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
C37	To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.
C42	To identify structural, functional, psychological and life forms changes, associated with the aging process
C44	To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
C49	To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
C50	To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork
D6	Skills in interpersonal relationships
D7	Critical reasoning.
D8	Autonomous learning.
D10	Motivation for the quality.
D11	Sensitivity towards environmental issues.

General description	Matter allocated the acquisition of theoretical competitions-practical in relation with the cares and procedures of infirmary in the field of the skilled attention.			

Competencies

Code	
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
A4	Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B5	To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
B6	To apply the nursing interventions on scientific evidence and on the available resources.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B8	To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
B9	To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
B10	To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
B11	To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
B15	To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinary and interdisciplinary way and the rest staff of the welfare organizations.
B16	To be able to use health information systems.
B17	To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
C4	Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
C8	To apply the technologies and information systems and communication of health care
C10	To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
C11	To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
C12	To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.
C13	To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
C17	To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
C18	To know and apply the principles underlying the comprehensive nursing care
C29	To identify care needs arising from health problems.
C31	To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.

C33 To have cooperative attitude with the different members of the team.

C50 To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.

D1 Analysis and synthesis ability

D2 Organization and planning ability

D3 Information management ability.

D4 Problem solving and decision making.

D5 Multidisciplinary and multilingual teamwork

D6 Skills in interpersonal relationships

D7 Critical reasoning.

D8 Autonomous learning.

Learning outcomes

Expected results from this subject	Training and Learning Results			
Be able to participate in the cares that have like purpose guarantee the greater degree of independence of the people in his basic and specific needs, so much in skilled attention as in institutions partner-sanitary.	A4	B1 B3 B6 B7 B8 B9 B10 B11 B15 B16 B17	C4 C8 C10 C11 C12 C18 C29 C31 C33	D1 D2 D3 D4 D5 D6
Be able to provide cares to the patient applying the Process of Infirmary, establishing an empathic attitude with him patient and the family, what will guarantee the right to the confidentiality, privacy and dignity.	A3 A4	B2 B3 B5 B6 B16	C4 C8 C12 C13 C17 C18 C29 C31 C50	D1 D2 D3 D4 D7 D8

Contents

Topic	
Rotatory of practical preprofesionales that allow the application and the acquisition of competitions of the theoretical and methodological knowledges of the Infirmary in the clinical practice in areas of hospitalisation and institutions partner-sanitary.	Realisation of the activities referred to the periods of clinical practices in the corresponding services asistenciales applying taken care of basic and skilled infirmary, according to the individual needs of each patient, as well as technical and corresponding procedures. Realisation of the folder - memory of the student in each period asistencial. Preparation of PAES

Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	2	0	2
Case studies / analysis of situations	4	6	10
Clinical practice	420	0	420
Portfolio / dossier	6	12	18

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the alumnado, as well as to present the matter.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.
Clinical practice	The student will develop the activities in a context related with the exercise of a profession in the area of Sciences of the Health.

Personalized attention	
Methodologies	Description
Introductory activities	Activities directed to take contact and gather information on the alumnado, as well as to present the subject.
Case studies / analysis of situations	Analysis of a fact, problem or real event with the purpose to know it, interpret it, resolve it, generate hypothesis, contrast data, reflexionar, complete knowledges, diagnose it and train in alternative procedures of solution.
Clinical practice	The student develops the activities in a context related with the exercise of a profession in the area of Sciences of the Health.
Tests	Description
Portfolio / dossier	The student will realise a portfolio in which it will include his memory of the practices as well as the daily description of the activities and procedures of Infirmary observed or realised by the student. Also it will have to describe the degree of difficulty that supposed him said acquisition of competitions.

Assessment		Qualification Training and Learning Results					
	Description						
Clinical practice	Evaluation of the competitions that purchases and show the/the student during unroll it of his practices in centres *asistenciales and partner-sanitary. It will evaluate : 1. Theoretical knowledges - practical 2. Attitudes 3. Skills 4. Fulfillment of the norms	95	A4	B1 B2 B3 B6 B7 B10 B11 B15 B16 B17	C4 C8 C10 C11 C12 C13 C17 C18 C31 C33	D1 D2 D3 D4 D5 D6 D7 D8	
Portfolio / dossier	The student will present when finalising the period the corresponding folder that will include the activities developed during the practices and the degree of difficulty.	5	A4			D1 D2 D3 D4 D7 D8	

Other comments on the Evaluation

The definite qualification will calculate on a maximum of ten points. Including all the quoted sections in the evaluation. In case that the student do not deliver, in time and forms the folder and the memory of practices, in addition to the *PAES corresponding, properly corrected and reviewed by the professor-tutor, *repercutirá negatively in the note, subtracting in each one of the cases 5% of the *final qualification. The student explains his disposal with a rule of assistance to practices, of forced fulfillment, the one who will be able to access through the page web of the escuela.en said rule include relative appearances to the penalties in the final evaluation by faults of assistance without justifying the practices, as well as to the general and disciplinary norms of the centre.Also, in the rule include the criteria of selection for to the election of the service where the student will unroll his clinical practices.

General description				

Competencies

Code	
A1	Students have demonstrated knowledge and understanding in an area of study that comes from the basis of the general secondary education, and it is often found at a level that, if well supported on advanced text books, it also includes some aspects that involve knowledge from the forefront of their field of study.
A2	Students know how to apply their knowledge to their work or vocation in a professional manner and have the skills that are often demonstrated through the preparation and defense of arguments and the resolution of problems within their area of study.
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
A4	Students will be able to convey information, ideas, problems and solutions to specialist and non-specialist audiences
A5	Students have developed those skills needed to undertake further studies with a high degree of autonomy.
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B4	To be able to understand the interactive behaviour of a person on the basis of gender, group or community within his social and multicultural context.
B5	To design care systems conducted to individuals, families or groups, assessing its impact and making the necessary modifications.
B6	To apply the nursing interventions on scientific evidence and on the available resources.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B8	To promote and respect the right of participation, information, autonomy and informed consent in assisted people decision making , in line with the way they live their health-disease process.
B9	To promote healthy lifestyles and self-care, supporting the maintenance of preventive and therapeutic behaviours.
B10	To protect the health and well-being of individuals, families or groups assisted, ensuring their safety.
B11	To know how to establish effective communication with patients, families, social groups and colleagues. To promote training and information for health.
B12	To apply the ethical and deontological code of Spanish nursing, understanding the ethical implications of health in a world in transformation.
B13	To apply the principles of health and socio-health financing and use properly the available resources
B14	To establish mechanics of evaluation, taking into account the scientific, technical and quality aspects
B15	To be able to work with a professional team as the basic unit in which professionals are structured in uni or multidisciplinary and interdisciplinary way and the rest staff of the welfare organizations.
B16	To be able to use health information systems.

- B17 To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
- B18 To apply strategies for means of comfort and care for symptoms, directed to the patient and family, in the implementation of palliative care that contributes to alleviating the situation of patients in advanced or terminal disease situations.
- C1 To know and identify the structure and function of the human body. To understand the molecular and physiological basis of cells and tissues.
- C2 To know the use and indication of nursing care-related health products
- C3 To learn about the different groups of drugs, the principles of their authorisation, use and indication, and their mechanisms of action.
- C4 Use of drugs, evaluating the expected benefits and associated risks or effects derived from its management and consumption.
- C5 To know and assess the nutritional needs of healthy people and problems of health throughout the vital cycle, to promote and reinforce healthy eating guidelines.
- C6 To identify the nutrients and the food in where they are.
- C7 To identify the nutritional problems of major predominance and to select the suitable dietetic recommendations
- C8 To apply the technologies and information systems and communication of health care
- C9 To know the physiopathologic processes, its declarations and the factors of risk that determine the states of health and illness in the different stages of the vital cycle.
- C10 To identify the psychosocial answers of people facing the different situations of health (in particular, the illness and the suffering), selecting the correct actions to provide help in these.
- C11 To establish an emphatic and respectful relationship with the patient and family, according to the situation of the person, problem of health and stage of development.
- C12 To use strategies and skills that allow an effective communication with patients, families and social groups, as well as the expression of its worries and interests.
- C13 To recognize situations of vital risk and to be able to execute maneuvers of basic and advanced vital support.
- C14 To know and to identify the psychological and physical problems derived from the violence of genre to qualify students in the prevention, the precocious detection, assistance, and rehabilitation of victims of this violence.
- C15 To identify, integrate and relate the concept of health and care, from a historical perspective, to understand the evolution of the nursing care.
- C16 To understand from an ontological and epistemological perspective, the evolution of the core concepts that make up the discipline of nursing as well as the most relevant theoretical models, applying scientific methodology in the process of care, developing appropriate care plans
- C17 To apply the nursing process to provide and ensure well-being, quality and safety to assisted people.
- C18 To know and apply the principles underlying the comprehensive nursing care
- C19 To lead, assess and provide comprehensive nursing care, to individual, family and community.
- C20 Ability to describe the basics of the primary level of health and activities to develop to provide comprehensive nursing care to individual, family and community.
- C21 To understand the function and activities and cooperative attitude that the professional has to develop in a primary health care team.
- C22 To promote the involvement of individual, groups and family in their health-disease process.
- C23 To identify factors related to health and environment issues, to assist people in situations of health and disease as members of a community.
- C24 To identify and analyze the influence of internal and external factors in the level of health of individual and groups.
- C25 To apply methods and procedures in its scope to identify the most important health problems in a community.
- C26 To analyze statistical data related to population studies, identifying possible causes of health problems.
- C27 To educate, inform, facilitate and support the health and well-being of community members, whose lives are affected by problems of health, risk, suffering, disease, disability or death.
- C28 To know adult health alterations, identifying manifestations appearing in different phases
- C29 To identify care needs arising from health problems.
- C30 To analyze collected data in the assessment, prioritize the problems of the adult patient, establish and execute care plan and its assessment.
- C31 To perform the techniques and procedures of nursing care, establishing a therapeutic relationship with patients and families.
- C32 To select interventions to treat or prevent deviations from health-related problems.
- C33 To have cooperative attitude with the different members of the team.
- C34 To identify the characteristics of women at different stages of the reproductive cycle, the climacteric and the alterations that may appear, providing the necessary care at each stage.
- C35 To apply general care during maternity to facilitate women and infants adjustment to new demands and prevent complications.
- C36 To know the specific aspects of newborn care. To identify the characteristics of the different stages of childhood and adolescence and the factors that determine the normal pattern of growth and development.
- C37 To know the most common childhood health problems and identify its manifestations. To analyze child assessment data, identifying nursing problems and complications that can arise.
- C38 To apply techniques that integrate nursing care, establishing a therapeutic relationship with children and their caregivers

C39	To select interventions aimed to healthy and ill children, as well as those derived from diagnosis and treatment methods.
C40	To be able to provide training and information for health to parents or primary caregivers.
C41	To understand changes associated with the aging process and its impact on health.
C42	To identify structural, functional, psychological and life forms changes, associated with the aging process
C43	To know the most common health problems in elderly.
C44	To select care interventions aimed to treat or prevent health problems and its adjustment to everyday life by proximity and support resources to elderly.
C45	To know Spanish sanitary system
C46	To identify characteristics of the directive function of nursing services and care management.
C47	To know and be able to apply techniques of team management
C48	To know applicable legislation and the Spanish code of ethics and deontologism of nursing, inspired in the European code of ethics and deontologism of nursing.
C49	To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
C50	To personalise care considering age, gender, cultural differences, ethnic group, beliefs and values.
C51	To know the most relevant mental health problems at different stages of vital cycle, providing comprehensive and effective care in the field of nursing.
C52	To know palliative care and pain control to provide care that soothe the situation of patients in advanced or terminal illness situation.
D1	Analysis and synthesis ability
D2	Organization and planning ability
D3	Information management ability.
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork
D6	Skills in interpersonal relationships
D7	Critical reasoning.
D8	Autonomous learning.
D9	Adaptation to new situations. Initiative and entrepreneurial spirit. Creativity
D10	Motivation for the quality.
D11	Sensitivity towards environmental issues.

Planning

	Class hours	Hours outside the classroom	Total hours
Master Session	35	50	85
Teaching and/or informatives events	4	48	52
Classroom work	12	0	12
Multiple choice tests	1	0	1

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Master Session	Presentation by the teacher of the contents on the subject under study, theoretical and / or guidelines for a job, exercise or project to be developed by the student.
Teaching and/or informatives events	Conferences, lectures, exhibitions, panel discussions, debates ... performed by renowned speakers, which you can drill or supplement the contents of the field.
Classroom work	Students develop exercises or classroom projects under the guidance and supervision of the teacher. May link autonomous development of student activities.

Personalized attention

Methodologies Description

Classroom work	Students develop exercises or classroom projects under the guidance and supervision of the teacher. May link autonomous development of student activities.

General description				

Competencies	
Code	
A3	Students have the capacity to collect and interpret relevant data (normally within their area of study) to make judgments that include a reflection on relevant topics of social, scientific or ethical nature.
B1	To be able, in the field of nursing, to provide a professional and technical health care, appropriate to the health needs of people they assist, in accordance with the state of development of the scientific knowledge of each moment and with the quality and safety levels established in the legal and ethical applicable standards.
B2	To know how to plan and provide nursing care to individuals, families or groups, aimed at health results, evaluating their impact through clinical and care practice guidelines, that describe the processes by which a health problem is diagnosed, treated and looked for.
B3	To know how to apply the foundations and technical and methodological principles of nursing.
B7	To know how to understand, without prejudice, people, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their views, beliefs and values, besides ensuring the right to privacy, through professional confidentiality and secrecy
B17	To perform nursing care based on the comprehensive health care that involves multiprofessional cooperation, integration of processes and the continuity of care.
C8	To apply the technologies and information systems and communication of health care
C9	To know the physiopathologic processes, its declarations and the factors of risk that determine the states of health and illness in the different stages of the vital cycle.
C18	To know and apply the principles underlying the comprehensive nursing care
C49	To provide care, guaranteeing the right to dignity, privacy, confidentiality and problem-solving ability of the patient and family.
D2	Organization and planning ability
D4	Problem solving and decision making.
D5	Multidisciplinary and multilingual teamwork

Learning outcomes				
Expected results from this subject	Training and Learning Results			
Be able of *reconocer *los diverse *roles, responsibilities *y work of join *enfermera.	A3	B1 B2 B3 B17	C18 C49	D2 D4 D5
Be able to undertake *valoraciones exhaustive *y systematic using wools *herramientas *y suitable frames stop he patient, *teniendo in *cuenta *los physical factors, *sociales, *culturales, *psicológicos, *espirituales *y *ambientales *relevantes.	A3	B1	C18	D2 D4
Be able of *reconocer and interpret signs *normales the changing of *salud-bad *salud, *sufrimiento, *incapacidad of wool *persona (assessment *y diagnostic).	A3	B1 B2 B3 B17	C9 C18 C49	D2 D4
Be able of *mantener wool *dignidad, *privacidad *y *confidencialidad of him patient (using wools skills...).		B7	C49	

Be able to consider *los *cuidados *emocionales, physical *y *personales, *incluyendo satisfy wools needs of *confort, nutrition and *higiene *personal *y allow he *mantenimiento of wools activities *cotidianas (using wools skills...).	B1 B3	C18
*Conocer Of form *relevante *y be able to apply *tecnología and computing to *los *cuidados of *salud.		C8 D2

Contents

Topic	
1. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN NUCLEAR MEDICINE	1.1. Description of processes diagnostics in Nuclear Medicine. 1.2. Ganglion *centinela. 1.3. Cares of Infirmary in Nuclear Medicine.
2. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN CONVENTIONAL RADIOLOGY And *INTERVENCIONISTA.	2.1. Description and classification of the different technical of *radiodiagnóstico. 2.2. Radiology *Intervencionista 2.3. Cares and procedures of infirmary in radiology *intervencionista and conventional.
3. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN PLASTIC And BURNED SURGERY	3.1. Surgical technicians applied the the plastic surgery and *reconstructiva: *injertos, *colgajos, etc. 3.2. *Reimplantes Of members and transfers. 3.3. Cutaneous tumors. 3.4. Surgery of breast: plastic - *reconstructiva and aesthetic. 3.5. Burns. 3.6. Cares of infirmary.
4. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN CARDIAC And THORACIC SURGERY.	4.1. Introduction to the processes *fisiopatológicos related with the cardiac and thoracic surgery. 4.2. Description of the surgical technicians. 4.3. *Perfusionismo And *hemodinamia 4.4. Cares of infirmary.
5. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN ORAL SURGERY And *MÁXILO FACIAL.	5.1. Oral surgery and *implantología. Pathologies more common and indications of the surgery. 5.2. Articulation *témporomandibular: pathophysiology, classification of the main alterations, possibilities of treatment 5.3. Pathologies of the glands salivated, tumors, classification and surgical technicians employees. 5.4. Congenital cervical pathology and purchased: diagnostic and treatment. 5.5. *Oncología Oral and *maxilofacial: classifications, diagnostic and possible treatments. I handle of the patient *oncológico in plant. 5.6. Traumatology *craneo-*maxilofacial: I handle of the patient *traumatizado, types of fractures, treatment and handle *postoperatorio. 5.7. Deformities *dentofaciales: classification, diagnostic and treatment.
6. CONCEPTUAL BASES OF DIAGNOSE And CARES OF INFIRMARY IN *NEUROCIRUGÍA	6.1. Cranial aneurisms. 6.2. Cerebral tumors. 6.3. Pathology of the column: hernias ... 6.4. Cranial traumatisms. 6.5. Cares of infirmary in *neurocirugía.

7. CONCEPTUAL BASES OF DIAGNOSTIC And CARES OF INFIRMARY IN RADIOTHERAPY

7.1. Classification and *descripción of the different technical *radioterápicas: *Braquiterapia, therapy *metabólica, ...

7.2. Complications of the radiotherapy: *radiodermatitis

7.2. Cares of infirmary in radiotherapy.

Planning

	Class hours	Hours outside the classroom	Total hours
Introductory activities	1	0	1
Seminars	6	0	6
Master Session	44	29	73
Multiple choice tests	2	68	70

*The information in the planning table is for guidance only and does not take into account the heterogeneity of the students.

Methodologies

	Description
Introductory activities	Activities directed to take contact and gather information on the *alumnado, as well as to present the matter.
Seminars	Activities focused to the work on a specific subject, that allow to deepen or complement the contents of the matter. Can employ as I complement of the theoretical classes.
Master Session	Exhibition by part of the professor of the contents on the matter object of study, theoretical bases and/or guidelines of a work, exercise or project to develop by the student
